Ancient Greek Education

66479

Lecturer in Charge

Prof. dr.sc.
Marko Pranjic

Course Description

The objective of the course is to:

Introduce students to the oldest educational customs in the time of Homer

Understand how education had functioned before the concept was created

Make students capable of interpreting ancient Greek notions of paideia, trefo, pedagogos, arete, kalokaghatia etc.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the basic pedagogical concepts detected in Homer's epics
2. Analyze ancient Greek educational thought throughout several centuries of Greek history
3. Interpret humanistic and social scientific bases of ancient Greek understanding and practicing of education
4. Compare Homeric and contemporary educational content
5. Explain the continuity and/or discontinuity of educational content
6. Evaluate the bases of educational practice of Antiquity
7. Interpret the main characteristics of Homeric education.

General Competencies

At the level of the programme, Ancient Greek Education makes the students capable of:

Identifying central educational values found in the oldest European literary work, that of Homer

Explaining why certain educational values were strongly insisted upon

Detecting the continuity and discontinuity between ancient Greek educational values and the ones insisted upon in pedagogy today.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Output knowledge is evaluated successively and according to the student's proficiency level in all three continuous assessment exams taken during this course. The student's motivation for the course content is evaluated as well as the ability to observe central educational values at the time of Homer. The students are confronted with contemporary educational content to observe the continuities and discontinuities regarding educational values. The final grade is the mean of the three continuous assessment grades, whereby special emphasis is put on obligatory literature content.

Week by Week Schedule

1. The students will acquire the educational content in the following way:
2. Heliocentric circle of cultures
3. Paideia – ancient Greek educational form
4. Arete – eminent Greek educational value
5. Homer's educational values
6. Telemachus – ancient Greek educational character
7. Telemachus's narrower educational circle
8. Telemachus's wider educational circle
9. Friendship in Antiquity
10. The role of deity in growing-up in the time of Antiquity
11. Telemachus's educational path
12. In the search for the father
13. In the non-educational environment
14. All faces of ancient evils
15. Settling accounts with the evil

An Introduction to Global Communication

141160

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The main objective of course is to analyse the process of globalization and his relationship to mass media. In particular, we must seek to ask what purchase the theory of globalization gives us on contemporary developments in the mass media. Later during the course we will consider the value of the theory of globalization and the role of mass media in the global world to recognize and evaluate this theory in both directions: positive and negative one.

Study Programmes

» Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the phenomenon of globalization;
2. Interpret variety of relationships between media and phenomenon of globalization;
3. Compare economic and social imbalance between the developed and the developing world;
4. Recognize the fact that the growth of global media concentration is threatening freedom of communication;
5. Analyze origins of MC, its driving forces (technology and money), ownership and control,) varieties of global MM, international media dependency, cultural imperialism (and beyond), the media transnationalization process, international news flow, the global trade in media culture, concepts of national and cultural identity, and global media governance.

General Competencies

Define, describe and evaluate global communication and his central problems; Apply, classify and distinguish the professional terminology of this research field; Identify and interpret interdisciplinary nature of communication science, linking individual segments of the history and characteristics of the communication sciences with the corresponding segments of the history and characteristics of the social sciences and humanities as well as various aspects of social development; Discuss, clearly show and analyze complex academic and non-academic contents in written and oral form.

Applied Developmental Psychology

53801

Lecturer in Charge

Prof. dr.sc.
Andreja Brajša-
Žganec

Course Description

Familiarize students with the knowledge of the applied to the field of developmental psychology of the child's birth until adulthood and old age. Throughout the course, students will become familiar with the basic theoretical approaches to some specific aspects of the development of the individual, especially children and young people with an emphasis on scientific knowledge and research results carried out in the world and in our country. Students will acquire knowledge of the specific characteristics of individual development from childhood to adulthood. Special attention will be devoted to understanding the major approaches and methods of working with children and young people. Attending this course should enable students an insight into the various forms of work with target groups of children, young and old within the institutions, organizations and the wider community .

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the underlying determinants of early childhood development and areas of influence .
2. Analyze the ecological approach to children's developmental needs and problems.
3. Assemble knowledge of the regulation and socialization of emotion in childhood
4. Interpret and compare Individual and environmental influences on the psychosocial adjustment of children and adolescents.
5. Synthesize the characteristics of the psychosocial adjustment of children and adolescents.
6. Synthesize the effects of war on the mental health of children and youth .
7. Assemble knowledge about helping children in specific circumstances (i.e. homeless, from non-traditional families, from problem families).
8. Interpret and compare the current issues in the psychology of adulthood and aging
9. Synthesize knowledge about foster care, child care outside the family .

ECTS Credits 3.0

English Level L2

E-learning Level L2

Study Hours
Lectures 30

Grading

Students are evaluated continuously during the semester. The final grade is based on two elements: regular lecture attendance and field work and one test or final written exam. In total, students can gain 50 points. 10 points for regular attendance and field work and 40 points for the test or final exam. If the student did not meet the tests of the passage (the passage tests is below 50 %) or has failed to take the written exam. For the written exam the student can achieve a maximum 40 points. Points that student scores on the written exam are added to the points raised by the student for attending classes and field work .

General Competencies

Appraise fundamental theoretical knowledge of psychology and its relationship with different branches of applied psychology.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Week by Week Schedule

1. Fundamental determinants of early childhood development and areas of influence .
2. Ecological- developmental approach to children's needs and problems.
3. Regulation and socialization of emotion in childhood.
4. Individual and environmental influences on the psychosocial adjustment of children and adolescents.
5. Characteristics of psychosocial adjustment of children and adolescents.
6. The consequences of war on the mental health of children and youth .
7. Different approaches and methods of working with children and young people (individual and group work with children , working with parents , interventions related to school).
8. Help children in specific circumstances (eg homeless , from non-traditional families , from problem families).
9. Foster care , child care outside the family .
10. Current topics in psychology of adulthood and aging.
11. Selected topics in socio-emotional development of preschool children
12. Selected topics in socio-emotional development of school children
13. Selected topics in socio-emotional development of adolescents
14. Selected topics in socio-emotional development of adult
15. Selected topics in socio-emotional development of old people

Archivistics for historians

158266

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

Course objectives are to achieve theoretical and practical knowledge about archives and archive materials for acquisition of competence in history research work when searching for new historical sources. Students will be introduced with archives, their organization, evolution of creating historical sources and their lifecycle from creation to the historical archive.

The aim of this course is to offer students theoretical and practical knowledge about accessing historical sources found in the archives, analysing them (inside and outside characteristics of the document, seals and stamps, letters, transcription etc.) and presenting them in a written way (publishing paper).

Study Programmes

- » Science Stream (Smjer) (*archival and historical sciences, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the various types of archives, how are they organized, what is their purpose and what do they archive
2. Describe historical-research plan of the work for searching new historical sources in archives
3. Use catalogues and inventories of archives
4. Analyze internal and external elements of the source and create transcription of the historical sources, especially for the handwritten documents
5. Demonstrate the discovered historical document in a written paper scientific form
6. Demonstrate differences between research in the archives with modern history materials and the middle ages history sources

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours

Seminar 30

Teaching Assistant

Valerija Macan Lukavečki, dr. sc.

Grading

Student activity will be evaluated during entire semester. The class attendance is obligatory. The exam is written with possibility of oral exam.

Week by Week Schedule

1. Introduction into the course
2. Definition of the terms: archivalistics, archives and archive material? What are the historical sources, archive documents..? Nature of the archive material
3. Life of the archive material
4. Forms and types of documents. Preparing and creating a document.
5. Diplomatics. Internal and external analysis of the historical document. Transcription.
6. Diplomatics. Internal and external analysis of the historical document. Transcription.
7. Organization of the archival materials/documents
8. Field work
9. Conservation of the archival materials
10. Registering of the archival material.
11. Using archival materials for the scholars.
12. Physical protection of the archival material.
13. Use of modern technologies.
14. Creating a system of document registering.
15. Final remarks and discussion

Biblical Archaeology

158270

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

The course provides insight into the history of Biblical archaeology from its beginnings to modern day scientific investigations.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the development of biblical archaeology from its beginnings to modern day research
2. List all of the most prominent biblical sites in the middle east
3. Explain the role of societies that were organized during 19th century and their discoveries
4. Discuss the material finds and objects of undisproved biblical origin
5. List institutions that are involved in modern day research of biblical sites
6. List museums that hold important artefacts

Forms of Teaching

- » Predavanja
- » lecture

Week by Week Schedule

1. Introduction – plan of the course, students' commitments and assignments
2. History of Biblical archaeology
3. Development of Biblical archaeology and schools of thought
4. Important archaeological sites and their researchers
5. The age of the Patriarchs and the story of Ur
6. Bronze Age Canaan and the city of Hazor
7. Egypt dominance - the case of Aphek and Bet Shean
8. Conquest of the promised land – was there a battle of Jericho?
9. The city of David and Tel Dan Stele

Book and Library History in Croatian Cultural Territory

144799

Lecturer in Charge

Izv. prof. dr.sc.
Tamara Tvrtković

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Lucija Krešić, dr. sc.

Grading

Regular attendance and active participation in discussion, oral presentation and oral exam.

Course Description

The subject goals are to introduce students with manuscript books, and the process of making it; than to introduce them with the making of printed books. Consequently, library development in Croatian territory will be discussed.

There are no conditions for joining the subject.

The subject contributes at every study level.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define book history as a discipline.
2. Analyze "book" in different social and cultural processes.
3. Describe book-library interaction.
4. Define the role of the book in relation with social activities and conditions.
5. Explain preparation of manuscript book in medieval times.
6. Compare codex and printed book.
7. Analyze the development of printing in certain European parts.

Screening of student's work

- 1 ECTS Pohađanje nastave [EN]
- 1 ECTS Seminarski rad [EN]
- 2 ECTS Usmeni ispit [EN]
- 4 ECTS

Forms of Teaching

- » Seminar
 - » Oral discussions, writing tests

Week by Week Schedule

1. Introduction. Book history - development and status of the discipline. Ancient cultures and books (Greece, Rome and Egypt). Papyrus.
2. Codicology, paleography, epigraphy. Illumination. Writing supports, bookbinding, parchment and its preparation.
3. The oldest books: Euangeliarium Spalatense and Passionale MR 164.
4. Medieval scriptoria. Europe's scriptoria. Dalmatian's scriptoria and its litteral heritage.
5. Metropolitana library in Zagreb and its oldest Latin manuscripts.
6. Three-script and three-language Croatian medieval heritage. Glagolitic script. Oldest Glagolitic manuscripts.
7. Gutenbergs printing machine and paper production.
8. Latin incunabula.
9. Aldo Manuzio and his books. Printing in Venice. Croatian Latinists in Italian and Venetian printing offices.
10. National and University Library in Zagreb: history, development and mission.
11. European printing development. The most significant printing offices and Croatian Latinists. Croatici auctores qui Latine scripserunt in European libraries.
12. Croatian printing development. The main and first printing offices in Zagreb, Rijeka, Karlovac, Dubrovnik, Varaždin, Osijek and Zadar.
13. Library history and bookselling history in Croatia. Bibliographies, encyclopaedias and lexicones as a sources of information (it's development in Croatia).
14. The most significant European libraries. The most significant libraries in Europe.
15. Libraries in 21st century. Subject conclusion and preparing for exam.

Seminar 30

Teaching Assistant

Marko Jerković, dr. sc.

Grading

40% essay; 40% research; 20% oral exam

Course Description

In the framework of this course medieval chapters and monasteries are being studied. These were the institutions which were the leaders of the cultural, social, legal and religious life of the Hungarian-Croatian Kingdom. The main research objectives: institutional history, incorporation into the legal system, relations with the centres of the power, prosopography, influence on the society.

Study Programmes

- » Science Stream (Smjer) (*archival and historical sciences, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Indicate the main trends in the history of the chapters and monasteries.
2. Analyze the diplomatic, legislative and narrative church sources of the Middle Ages
3. Explain the development of the ecclesiastical institutions
4. Identify the most important canons, monks, friars and bishops Croatian Middle Ages.
5. Point out the development of the chapter and monasteries in Croatia during the Middle Ages.
6. Analyze comparatively Croatian and European ecclesiastical history

Screening of student's work

- 2 ECTS Istraživanje [EN]
- 2 ECTS Seminarski rad [EN]
- 1 ECTS Usmeni ispit [EN]
- 5 ECTS

Forms of Teaching

» Seminar

» Students are writing their research essays under the tutorship of the teacher.

Week by Week Schedule

1. The main paradigms in the research of the chapters and the monasteries
2. Sources in the research of the chapters and the monasteries
3. Cathedral chapters in Europe and in the Croatian-Hungarian Kingdom
4. Internal hierarchy of the chapters and the monasteries
5. „Case study“: the Zagreb cathedral chapter
6. Collegiate chapters
7. Chapters with the early Christian tradition
8. Chapters landed estates
9. Canons as the social group
10. Benedictine monasteries
11. Cistercians
12. New medieval spirituality: Franciscans and Dominicans
13. Cultural importance of the chapters and the monasteries
14. Chapters and the monasteries as the "places of authentication" (loca credibilia)
15. Archives

Children 's Literature

144620

Lecturer in Charge

Doc. dr.sc.
Dubravka Zima

Course Description

To qualify students to work with the texts of children's literature which are included in the Croatian language teaching programme for higher grades of primary school.

Study Programmes

» Teaching Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the functions of children's literature in the educational process;
2. Analyze and articulate differentiating categories in the relationship between the children's literary system and the system that is not children's
3. Identify the strategies of production and shaping of meaning in the context of children's literature;
4. Apply the knowledge of basic concepts of the theory of children's literature in the teaching of children's literature in primary education (types of children's literature, ways of adapting genres to children's literature, the basic history of the Croatian children's literature);
5. Analyze, interpret and methodically process the assigned literary samples in the teaching that concerns the required reading in upper grades of primary education;
6. Select and interpret additional literary samples in the teaching that concerns required reading in the upper grades of primary education;
7. Explain and recommend optional literary reading to pupils in primary education.

General Competencies

Apply the knowledge and learnt methodical patterns in the teaching of the Croatian language in higher grades of primary education. Apply teaching methods in primary school teaching. Distinguish between the teaching content and teaching methods.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Active participation in class - 20%; required reading within deadlines - 20%; seminar paper - 20%; preliminary exams / written exam / research / collaborative work - 20%. A student may either choose to pass the written final exam or complete preliminary tests which include a research and collaborative work. Oral exam - 20%.

Week by Week Schedule

1. Practical guidelines for the study of children's literature. Introduction to the study of children's literature. Concepts of children's literature and youth literature. The image of a child and the image of children's literature. Historical (non) permanence of images.
2. Children's literature as a literary system: connections with other literary and non-literary systems. Child / childhood: a cultural view. Children and adolescent literature as a pedagogical activity? Production of meaning. Children's literature and stereotypes: supervision of the communication system. Ways to approach children's literature: intrinsic and extrinsic.
3. Children's literature: the issues. Children's literature as a literary system: connections with other literary and non-literary systems. Children and adolescent literature as a pedagogical activity? Production of meaning. Children's literature and stereotypes: supervision of the communication system. The notion of implicit reader. Texts: David Rudd: Theorizing and theories. How does children's literature exist? U: Peter Hunt (ur.) Understanding children's literature. Civilization of Violence

57189

Lecturer in Charge

Izv. prof. dr.sc.
Renato Matic

Course Description

The objective of the course is to prepare students for recognizing and understanding social activities and circumstances that result in violence, as well as for autonomously recognizing the process of institutionalizing both violence and the social framework within which violence with time becomes an acceptable and desirable social activity.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4420): elective courses, 1st semester (science stream), 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the phenomenon of violence in a wide range of theoretical perspectives in sociology,
2. Present arguments regarding the significance of critical (self)awareness and interdisciplinarity,
3. Analyze the forms of social activity and social structures that produce violence,
4. Recognize and reveal common and generally accepted institutional practice that encourages violence in social reality,
5. Recognize the process of the institutionalization of violence and the social, framework within which violence with time becomes an acceptable and desirable social activity.
6. Evaluate different programs of prevention of violence and recommend improvements

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Attending classes and active participation brings 20% of the final grade. Regularly writing essays and participating in discussions carries 20% of the final grade. Individual oral presentations of assigned seminar topics and a written term paper carry 20% of the final grade. Final oral exam carries a maximum of 40% (excellent).

General Competencies

Explain the initial assumptions of various political, religious and cultural orientation,
work in a team with colleagues from different disciplines, attitudes and orientations,
engage in solving social problems,
explain the key structural factors that shape the social world,
explain the personal and local social issues in a broader social context, particularly in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization,
explain the origin of social problems and conflicts while keeping in mind the way in which the social order is maintained and questioned,
promote sociology and social research methods as relevant to solving current social problems and issues.

Week by Week Schedule

1. Introduction to syllabus
2. Defining the basic concepts
3. Defining the basic concepts
4. Freedom and/or safety;
5. The concept of power in sociology
6. Redistribution of power among social groups and using violence with the aim to assume and retain power;
7. Sociability and allowed forms of violence, cases in which the mechanism of social control is applied with different levels of social sanctions
8. Particular interests and the making of decisions regarding the forms of violence that will be subject to social control mechanisms on the one hand and the ones that will be left a wider space of freedom or will not be defined as violence at all
9. Redistribution of the relations of power and interests and the construction of social control mechanisms
10. Violence as an alternative and desirable means of achieving social goals;
11. Violence as a legitimate model for various forms of strategic activity;
12. The example of terrorism as a form of violence directed towards achieving political and economic goals dilemmas about the causes and consequences of terrorism;
13. Violence and moral panic, the forms of violence that serve to redirect attention from the critical recognition of the civilization of violence.
14. Seminar presentations
15. Seminar presentations

Clinical Interview

53879

Lecturers in Charge

Doc. dr.sc.
Ljiljana Pačić Turk

Doc. dr.sc.
Anita Lauri
Korajlija

Course Description

The aim of the course is to enable students to conduct clinical interviews and to structure their interviews customized according to the case at hand.

Applicability of the acquired knowledge into practice in working with the client:

- planning clinical interview according to the case at hand,
- using medical history and heteroanamnestic data and observations;
- making hypothesis and planning procedures of further clinical assessments based on the data collected during the clinical interview, from the medical history and heteroanamnestic data, and based on observations on the behavior of the client

Study Programmes

- » Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Plan the type and structure of the clinical interview for the given individual case
2. Select relevant information from the medical history and heteroanamnestic data and medical records
3. Analyze client's behavior during the interview
4. Analyze relevant information obtained by the procedures used
5. Analyze and plan review of the case on the basis of relevant information
6. Plan the process of further clinical evaluation appropriate to the given individual case based on data from clinical interviews, medical history and heteroanamnestic and behavioral observations of the client
7. Plan the clinical interview for further neuropsychological assessment
8. Plan the interview in accordance with the specifics of different populations of patients and the specifics of the various disorders

ECTS Credits 2.0

English Level L1

E-learning Level L1

Study Hours

Exercises 30

Teaching Assistant
Ljiljana Muslić, dr. sc.

Grading

The final grade consists of grades awarded for attendance, completion of individual tasks and success in the final examination. Some of the exercises will be held at various sites, most of the Zagreb University Hospital.

General Competencies

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Week by Week Schedule

1. The role of the interviews and observations in clinical assessment.
2. Medical history and hetheroanamnesis data and medical records
3. Types of interviews.
4. Planning interview structure.
5. Specifics of interview according to specific disorders.
6. Specifics of pshychotherapeutic interview
7. Specifics of pshychotherapeutic interview - case studies
8. Group-specific interviews - children and adolescents
9. Group-specific interviews - mental disorders
10. Age-specific interviews - elderly
11. Age-specific interviews - neurological defects
12. Age-specific interviews - couples
13. Special features of interviews with the aim of neuropsychological assesment
14. Special features of interviews with the aim of neuropsychological assesment - case studies
15. Qualitative analysis of the data, establishing of the level of relevancy of the data and planning the further clinical evaluation

Clinical neuropsychology

115674

Lecturer in Charge

Doc. dr.sc.
Ljiljana Pačić Turk

ECTS Credits 3.0

English Level L2

E-learning Level L1

Study Hours

Lectures 30

Grading

100% exam

Course Description

To provide information of basic neuropsychological diagnostics (deficits of cognitive and executive functions and personality evaluation) and assessment (tests, procedures, quantitative and qualitative analysis of results).

Study Programmes

» Psychology (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and diagnose deficits of cognitive and executive functions and personality changes in brain damaged patients
2. Plan the individual neuropsychological assessment needed
3. Make the basic quantitative and qualitative analysis of neuropsychological assessment results
4. Interpret given results

General Competencies

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Identify the neural and other biological mechanisms of specific psychological processes and behaviours, their developmental changes, protective and risk factors, and select the appropriate methods for their testing and measuring.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Week by Week Schedule

1. Basic concepts - cognitive and executive functions and personality variables
2. Behavioral and functional geography of the brain
3. Influence of neurobehavioral variables
4. Neuropathology
5. Neuropsychological assessment - procedures and tests

6. Tests and assessment procedures for orientation and attention
7. Tests and assessment procedures for perception and construction
8. Tests and assessment procedures for memory
9. Tests and assessment procedures for verbal functions and language skills
10. Tests and assessment procedures for concept formation and reasoning
11. Tests for intellectual functioning - qualitative analyses
12. Tests and assessment procedures for executive functions and motor performance
13. Test for personal adjustment and emotional functioning
14. Neuropsychological assessment - interpretation
15. Neuropsychological assessment - reports writing

Clinical Psychodiagnostics

130561

Lecturers in Charge

Doc. dr.sc.
Anita Lauri
Korajlija

Doc.
Slavka Galić

Course Description

Students will understand the specifics of the classification and diagnostic of psychiatric disorders. They will develop the skills needed for clinical assessment: interviewing, observation and application of psychological instruments. They will know to write psychological report and procedures that follow after diagnosis.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the clinical symptoms of various psychological disorders
2. Plan a clinical assessment appropriate to the clinical symptoms
3. Select appropriate psychodiagnostic measures and instruments
4. Arrange the data collected with clinical assessment for writing psychological report
5. Write psychological report
6. Distinguish and classify the clinical symptoms of various psychological disorders

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

ECTS Credits 4.0

Course Description

The aim of the course is to train the students to write an independent opinion of the psychologist in clinical practice, with regards to the purpose and objective of the clinical assessment.

Study Programmes

- » Psychology (Studij) (*specific and professional skills, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Select relevant information from clinical interviews, medical history and heteroanamnestic information, medical records and observations of client behavior
2. Write a quantitative and qualitative analysis of data obtained by means of applied psychodiagnostic methods
3. Summarize relevant information obtained by the above procedures
4. Create a case presentation on the basis of relevant information
5. Write formal and substantive findings, depending on the purpose and objective of the clinical assessment performed
6. Write an independent opinion of the psychologist, depending on the purpose and objective of the clinical assessment
7. Write findings of neuropsychological assessment of the client
8. Explain the importance of teamwork in the decision-making process on the client and further treatments

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Exercises 30

Grading

Attendance - exercises, active participation, individual writing task - finding. Final score is derived from data on exercise attendance and accomplishment of particular tasks - students need to write five independent findings graded with any of the passing grades. A large part of practical training takes place at worksites - in Zagreb University Hospital Center and Psychological Medveščak

General Competencies

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Week by Week Schedule

1. Finding as the ultimate outcome of quantitative and qualitative analysis of the results of the clinical evaluation.
2. Formal structure of a finding.
3. Content of a finding.
4. Basic elements of a finding.
5. Specifics of a finding according to its goal and purpose of the clinical assessment.
6. Specifics of case presentation.
7. Case presentation - examples.
8. Population - specific case presentations - children and adolescents.
9. Findings according to the experts it is intended to.
10. Neuropsychological assessment and finding.
11. Neuropsychological findings - concrete examples.
12. Neuropsychological findings - a case presentation and writing exercises.
13. Neuropsychological findings - a case presentation and writing exercises.
14. Selection of relevant information from clinical interviews, medical history and heteroanamnestic information, medical records and observations of the behavior of the client and the results of psycho-diagnostic treatment.
15. Final considerations - most frequent difficulties in practice.

Cognitive Neuroscience of Emotion

133420

Lecturer in Charge

Doc. dr.sc.
Mislav Stjepan
Žebec

Course Description

The main objective of the course is to teach students about the new approach to the study of emotion, especially the methods of cognitive neuroscience. Cognitive neuroscience has a major role in the development of theories of cognitive functions that are based on the anatomical and functional characteristics of the human brain. Through the program, students will learn about the cognitive operations that are an integral part of emotional processing.

Study Programmes

» Psychology (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define processes of emotional processing.
2. Identify, classify and explain to different methods in emotion research.
3. Analyze research results
4. Describe the processes of emotional processing.
5. Estimate critically results of the emotional research

Cognitive Psychology

57110

Lecturer in Charge

Doc. dr.sc.
Mislav Stjepan
Žebec

Course Description

Introducing students to the basic paradigm of cognitive psychology information processing and related approaches that empirically model human cognition and mind (including possible advantages and limitations). Targeted upgrading of minor number of cognitive topics, attained at the undergraduate psychology study (attention, working and long-term memory, intelligence and cognitive development), and systematically introducing cognitive structures and processes that are not learned at undergraduate level (knowledge structures, mental representations, language, problem solving, decision making, inductive and deductive reasoning, artificial intelligence, expertise and consciousness). Generating at students an adoption of systematic representation of above mentioned cognitive psychology topics, by emphasizing: (1) construct and neural definition; (2) empirical findings for theoretical models construction, (3) optimal theoretical models, (4) arguments for the models validation, (5) possible measurement methods, and (6) the application in non-research situations. Preparing students for cognitive psychology research through the construction, presentation and discussion of seminar works on contemporary applied cognitive psychology topics, and thereby enable them for critical study of scientific and professional literature and train the skills of making professional/scientific presentation and of argumentative discussion. Making students sensible for specific aspects of cognitive psychology discipline by visiting laboratories for research and application of cognitive issues and giving them possibility of later scientific and professional engagement.

Study Programmes

» Psychology (Studi) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and critically judge the basic paradigm of cognitive psychology and its basic approaches and methods
2. Distinguish and organize neural basis of cognitive processes and structures
3. Explain specific aspects and components of essential cognitive processes and structures
4. Compare basic features of specific cognitive processes and structures and by using this comparison to successfully distinguish them
5. Classify and combine empirical findings for specific theoretical model of the observed cognitive structure/process, and by using this evaluate the model

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Vedrana Palavra

Grading

Class attendance - up to 12% of the course grade; group presentation (with discussion) - up to 12% of the course grade; a short quiz exam every second lecture - up to 12% of the course; two partial written exams (tests) - up to 40% of the course grade; oral exam - up to 24% of the course grade; extra points - up to 4% of the course grade.

6. Arrange occurrence of the same cognitive constructs and structures in different cognitive processes and thereby construct logical and integrated presentation of mind in the frames of information processing paradigm
7. Identify the importance of cognitive psychology in other fields of psychology and related disciplines
8. Analyze actual research controversies in cognitive psychology and, doing this, prepare and present seminar work
9. Argue on controversial, but also conventional phenomena of cognitive psychology
10. Evaluate scientific research and proofs in the domain of cognitive phenomena

General Competencies

Appraise fundamental theoretical knowledge of psychology and its relationship with different branches of applied psychology.

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Identify the neural and other biological mechanisms of specific psychological processes and behaviours, their developmental changes, protective and risk factors, and select the appropriate methods for their testing and measuring.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Screening of student's work

- 0.5 ECTS Pohadanje nastave [EN]
- 1.5 ECTS Kolokviji [EN]
- 0.5 ECTS Seminarski rad [EN]
- 1 ECTS Usmeni ispit [EN]
- 0.5 ECTS Quiz tests
- 4 ECTS

Forms of Teaching

- » Predavanja
- » Seminar

Week by Week Schedule

1. Introductory lecture: Course syllabus; Definition and focus of cognitive psychology; Historical development of cognitive psychology
2. Paradigms, research approaches and methods: Information processing - fundamental paradigm in theories and research of cognition; Research approaches and methods of cognitive psychology.
3. Attention: Definition (construct and neurological) and the role of attention in human cognition; Contemporary models and attention types; Measuring different aspects of attention
4. Working memory: Construct and neurological determination and the role of working memory in human cognition; Contemporary models of working memory and the relation with other cognitive subsystems; Measuring different aspects of working memory.

5. Memory structures and knowledge structures: Construct and neurological definition of memory; Types and structures of long-term memory; Organization of declarative and non-declarative knowledge
6. Mental representations: Visual representations, propositions and mental models: theory, phenomenon and research findings; Spatial cognition and cognitive maps
7. Language: The components and features of language; The processes of language comprehension
8. Problem solving: definition and steps; Good and bad structured problems; Factors which facilitate and hinder problems solving.
9. Decision making: Decision making: definitions, models; Research findings and phenomena in decision making; Heuristics
10. Deductive and inductive reasoning: Deductive and inductive reasoning: definition and classification; Deductive conditional and syllogistic reasoning: logical basis and psychological phenomena; Inductive causal and categorical conclusion: logical basis and psychological phenomena.
11. Contemporary cognitive models of intelligence: Models from information processing approach to intelligence; Neural-based models of intelligence
12. Artificial intelligence and expertise: Artificial Intelligence - definitions and approaches; Expertise (definition, properties and relationships with problem solving)
13. Cognitive development: Definitions and approaches to cognitive development; Limitations of Piaget's theory and the development of neo-Piaget great theories of cognitive development; Overview of contemporary theoretical models of cognitive development.
14. Additional areas of cognitive psychology: Consciousness; Cognitive approaches to creativity.
15. Test.

Coherentism(Epistemology)

117076

Lecturer in Charge

Prof. dr.sc.
Zvonimir Čuljak

Course Description

Enable understanding of the concept of coherence as well its explanatory and normative function in epistemology, philosophy of language, philosophical semantics, philosophy of science and ethics. Provide students with classification and presentation of coherence theories in various philosophical branches. Enable students to correlate coherence theories with other theories in those branches of philosophy.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and define the concept of coherence with respect to the properties upon which coherence is based (consistency, logical relatedness, explanatory relatedness, probabilistic consistency)
2. Explain the explanatory and normative function of the concept of coherence with respect to the properties which are based on coherence (epistemic justification, meaning, confirmation grade, justification of induction, moral justification)
3. Develop their skill of conceptual analysis of basic epistemological and other concepts
4. Develop their skill of argumentation in the framework of epistemology, philosophy of science, philosophy of language and ethics
5. Explain some of the most important philosophical theories and phenomena (coherentism, holism, logical empiricism, theory of reflective equilibrium etc.)
6. Explain the connection between coherence, probability and truth.

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

On the basis of two seminar papers and of the final oral exam.

General Competencies

Students will be able to:

1. understand and analyze the concept of coherence with respect to other main explanatory and normative concepts in various philosophical branches (epistemology, philosophical semantics, philosophy of science, philosophy of science, ethics),
2. explain the explanatory and normative function of the concept of coherence in those various philosophical branches;
3. advance students skill of conceptual analysis and philosophical argumentation.

Screening of student's work

1 ECTS Referat [EN]

3 ECTS Usmeni ispit [EN]

4 ECTS

Forms of Teaching

» Predavanja

» Lectures: presentation of the main topics

» Seminar

» Analysis of the main concepts and the critical evaluation of the main arguments and attitudes

Week by Week Schedule

1. Introduction (1+0+1)
2. Idea of coherence in contemporary philosophy (1+0+1)
3. Semantic coherentism: coherence theories of truth (S. Haack) (1+0+1)
4. Semantic holism: W. V. O. Quine (1+0+1)
5. Confirmation holism / coherentism: O. Neurath, W. V. O. Quine (1+0+1)
6. Relational coherentism: K. Lehrer (1+0+1)
7. System coherentism: L. Bonjour (1+0+1)
8. Explanatory coherentism: W. Sellars, G. Harman, P. Thagard (1+0+1)
9. Probabilistic coherentism and the rationality problem: K. Lehrer, C. Elgin (1+0+1)
10. Perspectival and virtue coherentism: E. Sosa (1+0+1)
11. Hybrid theories: coherentist foundationalism and foundherentism: J. Cornman, S. Haack (1+0+1)
12. Reflective equilibrium (i): N. Goodman (1+0+1)
13. Reflective equilibrium (ii): J. Rawls (1+0+1)
14. Criticism of coherentism: counter-arguments and alternatives (foundationalism, contextualism, externalism) (1+0+1)
15. Concluding discussion (1+0+1)

Conducting Psychological Research

53876

Lecturers in Charge

Prof. dr.sc.
Josip Burušić

Doc. dr.sc.
Maša Tonković
Grabovac

Course Description

The aim of the course is to improve the students' competence in the field of research methodologies and to train students for the effective application of acquired skills and knowledge in professional work. Through successful fulfillment of obligations, the students will improve their competence in the selection and application of research methods and design, will improve their skill of independent planning, organizing and carrying out research, and scientific reporting. An important aim of the course is to improve the competencies of analytical and critical thinking of students.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the research process and the manner of planning, organizing and conducting a research project;
2. Analyze and evaluate the advantages and disadvantages of individual approaches to conducting a research project;
3. Create and shape the overall project plan in which they will be able to point out and evaluate key elements, threats and challenges;
4. Apply the acquired knowledge to planning, organizing and carrying out a research project;
5. Demonstrate results and outcomes of the conducted research project;
6. Apply the acquired knowledge and publicly present and critically evaluate the scope, advantages and disadvantages of the conducted research projects.

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Exercises 15

Grading

The final student grade is determined in the exam, which can be written, oral or a combination of written and oral. During the course, individual students' activities are granted points as follows: Students who collect points from just one activity and/or the number of obtained points does not exceed 25 are considered to have not met the minimum requirement for the course and are not eligible to receive signatures. The success of all students who during the semester obtain less than 50 points will without exception be determined through knowledge and competence assessment in exams during planned exam terms. The students who obtain 50 or more points are obliged to attend the exam during the exam terms in which their acquired point will be converted to initial grades according to the following procedure: 50,0 to 59,9 points - sufficient (2); 60,0 to 74,9 points - good (3); 75 to 84,9 points - very good (4); 85 to 100 points - excellent (5). In addition to adding points, the teacher has the right to organize for every student during the exam terms additional knowledge and competence assessments in order to determine the student's final grade. Attendance - 5 points; Solving practical research problem tasks - 5 x 5 = 25 points; Writing a clear theoretical paper with a research method elaboration - 25 points;

Screening of student's work

- 0.2 ECTS Pohađanje nastave [EN]
- 0.5 ECTS Kolokviji [EN]
- 0.4 ECTS Seminarski rad [EN]
- 0.4 ECTS Projekt [EN]
- 1.5 ECTS

Preliminary exam (written assessment of the students' achievements) - 45 points.

Grading

It is assessed the participation in class, activities during the class, the quality of the seminar paper presented to colleagues and teacher.

Course Description

Introduction to the Croatian language groups outside Croatia. Students are introduced to the literary production in standard Croatian language and in idioms of the autochthonous communities in Austria, Slovakia, Hungary, Rumania, Italy, Serbia, Montenegro. Developing the interest for the continuous monitoring of literature in the autochthonous minority communities.

Study Programmes

- » Science Stream (Smjer) (*elective courses 2, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Show the role of literature in preserving the national identity of the autochthonous Croatian minority communities.
2. Recognize the way in which the fundamental differences between certain minority communities reflect on literature.
3. Analyze certain writers.
4. Show the presence of certain literary genres in different minority communities and determine the causes of that situation.

General Competencies

Individual analyzing of poetical, prose and dramatic works written by Croats from the autochthonous minority communities. Students individually analyze the works in standard Croatian language and in dialectal idioms.

Week by Week Schedule

1. About the autochthonous Croatian communities in the Diaspora- types of autochthonous communities and the differences regarding the emigration.
2. Literature of the Molise Croats in Italia
3. Literature of Croats in the northern Burgenland in Austria
4. Literature of Croats in the middle and southern Burgenland in Austria
5. Literature of Croats in the western Hungary (part 1)

6. Literature of Croats in the western Hungary (part 2)
7. Literature of Pomurje-Croats in Hungary
8. Literature of Podravina-Croats in Hungary

Contemporary Sociological Theories

53911

Lecturer in Charge

Prof. dr.sc.
Ivan Markešić

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Study Programmes

» Sociology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic theoretical conceptions of contemporary sociological theories with the emphasis on their mutual dependencies.
2. Recognize specific and common problems of contemporary sociological theories.
3. Analyze systemic differences of modern theoretical constructions.
4. Evaluate and connect different theoretical approaches.
5. Recognize new social phenomena in the context of contemporary sociological approaches.
6. Compare different approaches to solving of theoretical approaches.
7. Use contemporary analytical tools in analysis of contemporary social phenomena.
8. Synthesize sociological theoretical debates.
9. Plan and write complex science papers.
10. Compare and oppose sociological theories.

General Competencies

Upon successfully passed exam, students will be able to:
 Use the general knowledge of society and of social processes.
 Explain the key structural factors that are shaping society.
 Explain the social change using classical and contemporary sociological approaches.

Corporate Communications

125909

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

Introduce students to the characteristics of communication within corporations and companies, organizing their departments and services for corporate communications and public relations. Train students for work in public relations in corporations and businesses.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and explain corporate communications
2. Apply specific tools and techniques in corporate public relations
3. Analyze the place and role of corporate public relations in society
4. Demonstrate the ability to perform tasks starting job in corporate public relations

General Competencies

Apply knowledge of the basic concepts of public relations, primarily related to corporate communications and public relations. Define, explain and critically analyze the characteristics of public relations, primarily in the corporate sector. Apply skills and techniques of public relations. Effective self-fulfilling work tasks.

Week by Week Schedule

1. Corporate Communications - concept, definition, meaning;
2. Characteristics of the organization and efficiency of corporate communications
3. Characteristics of the organization and efficiency of corporate communications
4. Corporations and responsibility - corporate and social responsibility, public presentation;
5. Presentation of the company / corporation to the public;
6. Corporations and external public - the place of corporate communication in industry, image and reputation of the company;

Correlation Practicum in the Methodology of Teaching

144745

Lecturers in Charge

Doc. dr.sc.
Anita Dremel

Lekt.
Zdravka Martinić-
Jerčić

Pred.
Dunja Jurić
Vukelić

Course Description

The main objective of the course is to prepare the students for the observation classes they are obliged to attend during this course in elementary and secondary schools, with special emphasis on correlational relations between courses.

Study Programmes

- » Psychology (Studij) (*elective (teaching module), 2nd semester, 1st year*)
- » Psychology (Studij) (*elective (teaching module), 4th semester, 2nd year*)
- » Teaching stream (Smjer) (*required course, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop the plan and programme for classroom teaching lessons.
2. Prepare and execute correlational lessons in cooperation with a student from other faculty.
3. Evaluate the importance and necessity of correlational relations between different courses.
4. Conclude about what didactically and methodologically well prepared teaching lessons with high-quality content should be like.
5. Describe how high-quality correlational lessons should be executed.
6. Plan and execute classroom teaching lessons.
7. Prepare and execute high-quality parent meetings.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Exercises 30

Seminar 15

Teaching Assistants

Filip Brčić, mag. hist.

Anela Mateljak Popić, dr. sc.

Grading

Since the students are grouped in smaller groups, their motivation for working and their future profession as teachers is easily monitored. This also provides insight into the flexibility of the students, and their openness to new and alternative forms of work as well as their desire for innovation. The feedback information from the mentors in schools and visits to schools during the students' observation classes provide insight into the comprehensiveness of the acquired knowledge and skills and competences, that is the student's final competency for the teacher profession.

General Competencies

Implementation of relevant content that the students obtained in the theoretical teaching methodology courses through the correlation practicum. In this sense, the students will be enabled to:

- define the the correlational principle of the way teaching functions in general;
- evaluate the contribution of the subject they will teach to the integral education of the schoolchildren;
- assess the contribution of other subjects contributing to the integral education of the schoolchildren;
- explain the senselessness of competition in the importance between individual subjects and the underestimation of other subjects for the integral development of schoolchildren;

Screening of student's work

- 1 ECTS Pohadanje nastave [EN]
- 1 ECTS Seminarski rad [EN]
- 1 ECTS Projekt [EN]
- 2 ECTS Praktični rad [EN]
- 5 ECTS

Forms of Teaching

- » Seminar
 - » Students need to design one teacher master class plan and one plan for parent meeting.
- » Vježbe u praktikumu
 - » Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.

Week by Week Schedule

1. Since the course is a Correlation Practicum in Subject Specific Teaching Methodology, lectures are reduced to a minimum and are only short instructions of the professor and comments and/or suggestions made after the students carry out their correlational lessons within the course, turn in their papers, as well as analyses of the observation classes held in schools.
2. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
3. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
4. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
5. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
6. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
7. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.

8. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
9. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
10. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
11. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
12. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
13. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
14. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.
15. Students from different study programmes (History, Philosophy, Psychology, Croatology, Sociology, Latin...) who participate in this course are paired up in order to carry out the correlational lessons.

Creative Techniques in Psychotherapy and Counselling

147470

Lecturers in Charge

Doc. dr.sc.
Adrijana Bjelajac

Doc. dr.sc.
Eva Anđela Delale

Course Description

The course is developed in order to acquaint the students with various techniques in psychotherapy and counseling practice through experiential learning. Experiential learning implies active involvement in exercises which will be demonstrated through work on personal examples and experiences. The students will work together, in pairs and small groups. Through immediate use of the techniques the students will also get acquainted with specificities of different psychotherapy modalities and approaches.

Study Programmes

» Psychology (Studij) (*specific and professional skills, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply counseling and psychotherapy techniques.
2. Estimate critically their own professional role in work with people
3. Appraise the importance of particular communication skills for successful psychological practice
4. Argue the importance of raising awareness of their own cognitive, emotional and physical processes in work with people
5. Assemble previously acquired theoretical knowledge in psychological practice

General Competencies

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Value the importance of life-long professional education.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Exercises 30

Grading

Class attendance and participation in exercises - 70%, essay - 10%, Oral exam - 20%.

Prerequisites

Psychotherapy Modalities
Psychological Counselling

Forms of Teaching

» Seminar

» twice a month, four classes

Week by Week Schedule

1. Introduction - introduction of the course, introductory exercises
2. Visualization and drawing - technique of guided fantasy, drawing the experience, verbal work through experience
3. Visualization and drawing technique of guided fantasy, drawing the experience, verbal work through experience
4. Associative cards - getting acquainted with various decks of associative cards thorough work in pairs and in group
5. Associative cards - getting acquainted with various decks of associative cards thorough work in pairs and in group
6. Movement and body work raising awareness of the body, experimenting with movement and positions, muscle testing, dance movement psychotherapy
7. Movement and body work raising awareness of the body, experimenting with movement and positions, muscle testing, dance movement psychotherapy
8. Techniques in work with children and adolescents drawing the feelings, technique of defining goal and steps, dialogue, family maps, assorting stones; puppets, fairy tales, stories
9. Techniques in work with children and adolescents drawing the feelings, technique of defining goal and steps, dialogue, family maps, assorting stones; puppets, fairy tales, stories
10. Role playing and "empty chair" technique working through potentially challenging communications and situations with others and within oneself
11. Role playing and "empty chair" technique working through potentially challenging communications and situations with others and within oneself
12. Gestalt dreamwork retelling dream in present tense, identification with particular element of the dream, working through relationship between different elements of the dream, closing the story, rearranging the dream
13. Gestalt dreamwork retelling dream in present tense, identification with particular element of the dream, working through relationship between different elements of the dream, closing the story, rearranging the dream
14. Constellations and spatial relations exploring personal place in the system (family, peers, coworkers), exploring the dynamics between members of the system, experimenting with different positions within the system
15. Constellations and spatial relations exploring personal place in the system (family, peers, coworkers), exploring the dynamics between members of the system, experimenting with different positions within the system

Criminology of Bullying

148529

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

The aim of the course is to enable students to recognize different patterns of violence including violent crimes and to understand the key issues in explaining different patterns of violent behaviour. Within the course, students will learn interdisciplinary approach to violent behaviour and familiarize with recent research in the field. They will demonstrate mastery of the broad knowledge and in-depth understanding required in the field of prevention of violence.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4420): elective courses, 1st semester (science stream), 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply typologies of violent crime
2. Distinguish the key issues in explaining patterns of homicide
3. Distinguish the key issues in explaining patterns of sexual violent crime
4. Distinguish the key issues in explaining patterns of hooliganism
5. Distinguish the key issues in explaining of robbery
6. Explain the meaning of the violence for public safety
7. Classify the major characteristics of violent persons
8. Identify the social context in which violence occur

Critical Thinking in Sociology

132300

Lecturer in Charge

Izv. prof. dr.sc.
Renato Matic

Course Description

To train students for the interpretation of ideas and author's contributions; analysis of basic concepts that have arisen as a result of the development of critical thought in sociology primarily through the activity of the Frankfurt School.

Study Programmes

- » Science Stream (Smjer) (*required course, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the terms and theoretical concepts developed as a part of critical thought
2. Interpret correctly the widest range of theoretical perspectives and authors' contributions to critical thinking in sociology
3. Argue the importance of developing critical thinking in social sciences
4. Analyze social phenomena using the basic concepts and approaches that have arisen as a result of the development of critical thought in sociology primarily through the activity of the Frankfurt School
5. Demonstrate the ability to recognize the autonomous process of institutionalization of ideology; doubt the ultimate truth about society
6. Compare and contrast the dialectical critical approach to social phenomena as opposed to the empirical analytical one

ECTS Credits 5.0

Seminar 15

Grading

Attending classes and active participation brings 20% of the final grade. Individual oral presentations of assigned seminar topics and a written term paper carry 20% of the final grade. Final oral exam carries a maximum of 60% (excellent).

General Competencies

Read and interpret classical sociological texts in light of philosophical influence on them,
 correctly interpret the basic concepts of the profession,
 differentiate, classify and compare different theories of society,
 argue the pros and cons of different rationales behind the theoretical and methodological paradigms / programs,
 analyze the adequacy of contemporary social theory regarding actual empirical situation and social and cultural conditions ,
 correctly interpret the importance of teaching classical sociological theory in its generality and specificity,
 analyze the diachronic development of thinking about society,
 interpret philosophical and critical basics of discipline,
 apply the lessons learned to the analysis of research achievements,
 synthesize lessons learned through the efforts of its contribution through the writing of a paper, oral presentations and asking critical questions.

Week by Week Schedule

1. Introduction
2. What is critical thought
3. Significant authors and ideas of critical thought before the Frankfurt School
4. The social and historical circumstances that preceded the establishment of the Institute for Social Research in Frankfurt
5. The mission of the Institute and of the activity: the initial year, sheltering from Nazi persecution, work in the United States, and the return in the post-war era
6. Max Horkheimer
7. Theodor Wiesegrund Adorno
8. Herbert Marcuse
9. Erich Fromm
10. Franz L. Neumann
11. Jürgen Habermas
12. "Post-Frankfurt" period of critical thought
13. Critical thought in national sociology
14. Seminar presentations and discussion
15. Seminar presentations and discussion

Croatian Culture in within Mediterranean and Western Culture

57142

Lecturer in Charge

Prof. dr.sc.
Slobodan
Prosperov Novak

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Grading

Two essays during the semester. Paper at the end.

Course Description

During this course students will acquire the knowledge on comparative history of Croatian literature but also arts, sciences and philosophy of modernity specially in the early modern and modern time. Attention is going to be given to all subjects dealing with the cultural contacts between Croatian and various European cultures and literatures. Participation of main capitals of European nations in the building of Croatian cultural identity and the form of the principal institutions. Analyses of Croatian regions and their synchronic relationship with other nations. The question of otherness in modern anthropology. Introduction in the imagology.

Study Programmes

» Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the features of Croatian culture in the framework of the Mediterranean and western European cultures
2. Apply acquired knowledge interpreting the state of national consciousness and its changes through the history
3. Describe the Croatian ideas of others as well as perceptions of Croats by others
4. Define the prejudices that are part of the cultural identity of the Croatians as well of the other Europeans
5. Describe the features of Croatian culture within the Mediterranean and western European culture
6. Apply the acquired knowledge to reconstruct elements of the Croatian national identity in and analyze may elements on which are built the prejudices

General Competencies

Upon the completion of this course, students will be able to distinguish between content and semantic features in the field of comparative history of Croatian literature, arts, sciences and philosophy of modernity but also of the early modern period literature and culture. They will be trained to analyze the Croatian cultural regions and their synchronic relationship with related countries and their identities.

Week by Week Schedule

1. Introduction in the history of Croatian comparative literature with special insight into the activities of Vatroslav Jagić, Mirko Deanović, Josip Badalić, Ivo Hergušić, Josip Torbarina. Idea of comparative literature and its metamorphosis.
2. Italy and its literary spots. Geography and literature within the theses of Carlo Dionisotti. The influence of Italian cities in the cultural history of Croats: Rome, Milano, Venice, Florence.
3. As a cultural laboratory. Italian universities and Croats.
4. Croats in Italy. Italians in Croatia. Synoptic look at the phenomenon of transmitters. From Giovanni of Ravenna to Gritzko Mascioni. Concept of Orientalism and the Concept of half Orientalism.
5. Canon and the process of literary canonization. Examples: Marin Držić, Ivan Gundulić, Miroslav Krleža.
6. Vienna as a European cultural capital. Croatian traces in Austria. Spirit of Austrian Monarchy and its influences on the modern Croatian culture and ideology. Croatian myths in the Austrian context. Example: Zrinski myth.
7. France and Croats. Literary canon in French Literature. Moliere in Dubrovnik. Šenoa and French literature. Matoš in Paris.
8. Party of Right and Russians. Križanić in Russia. Radić and Križanić as Krleža's symbolic twins.
9. Richard the Lion Heart in Dubrovnik. Shakespeare's knowledge of Croats and Croatia. The Concept of Illyria. Travelers as the writers in the early modern age. Croatian travelogue.
10. India and Croats. The concept of India in the western literatures. The case of Ivan Vezdin.
11. Croatian literary and artistic heritage in the Bay of Kotor in today's Montenegro. Franciscans in Turkish Bosnia. Heritage of Croats in Hungary and by Slovaks. Croats in Prag.
12. Croatian identity and church orders: the contribution of the Benedictines, Franciscans, Dominicans and Jesuits.
13. The history of theater in the Croatia and in the Europe. Comparative view. Festivals and the outdoor theater in the European experiences.
14. Dubrovnik as a literary myth. Brothers Vojnović. Myth of Dubrovnik.
15. Croatian islands and their cultural profile. Example: Island of Hvar. The literary experiences of the Mediterranean people. Balkan and his mentality.

Croatian Educational Thought in the Renaissance

61962

Lecturer in Charge

Doc. dr.sc.
Marinko Šišak

Course Description

Introduce the students to Croatian renaissance thought, the philosophy of education and the most significant thinkers – humanists. Show the actuality and relevance of moral-didactic and pedagogical guidelines and works of our Renaissance thinkers in the context of pedagogical thought then.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the foundations of pedagogy in humanities and social sciences,
2. Interpret the main determinants of Renaissance educational theories and thinkers,
3. Define Croatian pedagogical thought within the general framework of the development of pedagogical ideas,
4. Assess the humanistic and social role of education in the Renaissance,
5. Compare pedagogical theories and practices,
6. Apply the acquired knowledge in teaching.
7. Analyze the works of Croatian pedagogical writers
8. Describe the impact of Croatian Renaissance pedagogues on contemporary pedagogical thought

General Competencies

The students will be able to recognize a significant phase in the development of pedagogical theories and the formation of the foundations of the modern conception of pedagogy as a science.

ECTS Credits	3.0
English Level	L1
E-learning Level	L1
Study Hours	
Lectures	15
Seminar	15

Grading

In all three stages that the students in this course go through evaluation of output knowledge is conducted successively and according to the level of training. The first level shows the motivation of the student for the course, previous knowledge about the topic, and the dilemmas discussed. On the second stage the student individually chooses a research problem, topic or thinker, and presents it to other students, encouraging thereby discussion among colleagues. On the third level the student's systematic knowledge of the taught content is evaluated, by means of the final exam.

Week by Week Schedule

1. The course content is offered through power point presentations, students' presentations, discussions and other forms.
2. The main characteristics of the Croatian Renaissance and Humanism,
3. The influence of the Italian Renaissance authors and their philosophical schools on Croatian thinkers (Platonism, Averroism, Aristotelianism),
4. Studia humanitatis. Ethicists, educators, and moralists of the Italian humanism (Salutati, Bruni, Vergerio, Vegio etc.).
5. Pedagogical thought and the spirit of Catholic education i.e. Catholic restoration.
6. Religious monastic schools affiliated to different religious orders and their role in the development of public education (Benedictines, Franciscans, Dominicans),
7. Elementary public schools on the territory of Croatia (in the cities),
8. Jesuit schools, their Ratio studiorum, and their contribution to the development of the school system,
9. The language of school and humanism (Latin, Greek); the role of the vernacular in teaching,
10. Analyzing the education-related works of Croatian authors from the time,
11. Higher education in the Renaissance in Croatian cities,
12. Important humanists and teachers in Croatian schools in the Renaissance,
13. Benedikt Kotrulj (early 15th century) and his work *Della mercatura et del mercante perfetto* as the example of a practical work intended for the education of merchants and their households.
14. Analyzing Marko Marulić (early 16th century) and *De institutione bene vivendi* as the example of Catholic moral-didactic literature,
15. Nikola Gučetić (late 16th century) and his work *Governo della famiglia* as the first real pedagogical manual in Croatian Renaissance literature.

Croatian Educators – the Enlightenment

61956

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

The lecturer will acquaint the students with the beginnings of the development of pedagogy on the territory of Croatia prior to and during the creation of mass public education, when the state takes the organizing role regarding the school system. The objective is to study the first writers and performers of educational practice from the 16th to the second half of the 19th century.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize pedagogical elements in old Croatian writers' works of religious and general character,
2. Analyze the first elements of pedagogy in the works of Nikola Gučetić, Nikola Krajačević, B. A. Krčelić, M. A. Reljković and others, as well as in the works and activities of Jesuit, Fransican and other Enlightenment educators and writers (E. Pavić, A. T. Blagojević, J. Milunović, J. Mulih, A. Kanižlić, I. Velikanović etc.)
3. Identify the main development tendencies of pedagogical thought in the 19th century,
4. Recognize 19th century educators, the writers of the first pedagogy works and textbooks in the Croatian language, creators of the science of pedagogy in Croatia (Lj. Vukotinović, S. Ilijašević, S. Novotny, Lj. Modec, I. Filipović, S. Fabković, S. Basariček, I. Širola, V. Danilo etc.)
5. Interpret the activity of the main protagonists of pedagogical thought in the 19th century,
6. Identify the philosophers who start discussing educational issues (Franjo Marković, Đuro Arnold).

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Filip Brčić, mag. hist.

Grading

Regular attendance (verified by students personally, with the record checked during the ensuing class) and discussions with the lecturer and colleagues (10% of the final grade). Power point presentation of a book from the list of additional literature, and discussion with other students (30% of the final grade). Written exam based on obligatory literature, 15 questions (60% of the final grade).

General Competencies

At the level of the programme, the students will be able to:

Identify pedagogical tenets in the works of individual Croatian writers of the time.

Explain both the need for pedagogical ideas at the time on the territory of Croatia and the contribution to the entire pedagogical movement.

Week by Week Schedule

1. Introductory lecture: periodization, methodology, and objectives of the course.
2. Nikola Gučetić – Croatian Renaissance representative of pedagogical thought
3. Pedagogical elements in the Croatian Baroque works from the 17th century
4. National and moral instruction of Andrija Kačić Miošić
5. „Abecevice“, forewords and catechisms by Antun Kanižlić i Josip Milunović
6. Pedagogical elements in the moral works of Juraj Muliš
7. Enlightenment critique and lessons by Antun Matija Reljković
8. Moral and didactic booklets by Jakov Lovrenčić
9. Woman author, translator, and educator Marija Fabković
10. Pedagogical works and initiatives of Marija Jambrišak
11. The most influential educator, organizer and writer Ivan Filipović
12. Stjepan Basariček and the development of the Croatian science of pedagogy
13. Teaching methodology textbooks in the field of pedagogy by Ljudevit Modec
14. Skender Fabković as a translator, writer, and educator
15. The presence of pedagogical thought in the works of Croatian philosophers Franjo Marković and Đuro Arnold

Croatian Linguistic Prescription in the 20th Century

118517

Lecturer in Charge

Izv. prof. dr.sc.
Mario Grčević

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Class effort 20%, exam 60%,
class attendance 20%.

Course Description

The aim of the course is to familiarize the students with the main developments in the Croatian linguistic normative efforts in 20th century, from the early 20th century to the early 90s. The students shall be taught to understand more recent normative tendencies.

Study Programmes

- » Teaching Stream (Smjer) (*kro-dipl (13096): elective courses 1 (teaching stream), 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*kro-dipl (13096): elective courses 1 (teaching stream), 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why in the first decades of the 20th century a mix of older and more recent orthographic and linguistic rules was observable in Croatian literature (that of the Zagreb school of philology and that of Croatian vukovci);
2. Identify language policy guidelines in the first Yugoslavia, NDH and the Socialist Federal Republic of Yugoslavia, and their relation to ideology;
3. Explain the facts from the diachronically and structurally oriented normative effort;
4. Describe the major grammatical handbooks in the 20th century
5. Describe the major orthography handbooks in the 20th century
6. Describe the major dictionaries of the Croatian language in the 20th century

General Competencies

Define the basic normative guidelines in recent Croatian linguistic history. Understand and explain the normative divergence in recent Croatian linguistic history.

Week by Week Schedule

1. Croatian Vukovci - the origin and objectives

2. Grammar and language consulting activity, Neo-Shtokavian purism
3. Language policy of the Kingdom of Yugoslavia and the Croatian language, orthography
4. Society "Hrvatski jezik" (1936/1937), Movement for the Croatian literary language (1938)
5. Peter Guberina: "Why can we talk about a separate Croatian literary language?" P. Guberina Kruno Krstić: "Differences between the Croatian and Serbian literary language" (1940).
6. Language policy in the Independent State of Croatia
7. Croatian language in the Communist Party during the Second World War
8. Croatian language norm after World War II (1945)
9. Novi Sad Agreement (1954)
10. Declaration on the Status and Name of the Croatian Literary Language (1967)
11. Croatian grammar books in the second half of the 20th century
12. Lexical norm in the second half of the 20th century
13. Overview - orthographic norm
14. Overview - Croatian grammar
15. Croatian lexis and lexicography

Croatian Press in the Diaspora

57237

Lecturer in Charge

Izv. prof. dr.sc.
Sanja Vulić
Vranković

Course Description

The aim of the course is to enable the acquisition of a theoretical and analytical framework for understanding and analyzing the Croatian press in the Diaspora considering various aspects (media content, the role in the community in which they are printed, language/languages in which they are printed). Doing independent research (to search for new journals on the internet).

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*kro-dipl (13096): elective courses 1 (teaching stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze different genres in the Diaspora press
2. Explain the primary differences between the press in the autochthonous communities in the Diaspora and the immigrant press.
3. Explain the primary differences between the press on certain continents.
4. Explain fundamental critical competencies of classification, analysis and evaluation of certain newspaper content.

General Competencies

Understand why newspaper is important media for the communities in the Diaspora. Do research on different genres in the Diaspora press.

Week by Week Schedule

1. Basic concepts: the Diaspora, autochthonous communities (migration, autonomous, emigration), basic groups
2. Historical overview
3. Division of the Croatian press in the Diaspora according to the content and purpose
4. General press in the autochthonous Croatian communities in the Diaspora
5. General press in the Croatian diaspora

Croatian Standard Language

147177

Lecturer in Charge

Prof. dr.sc.
Branka Tafra

Course Description

The aim of this course is to strengthen the acquired knowledge of Croatian standard language, its history and the current standards, to apply this knowledge, to fill any possible gaps, deepen theoretical engagement with language, familiarize students with the curriculum of Croatian language in primary and secondary schools and to capacitate them to independently prepare materials for processing linguistic topics from the curriculum. Through individual and group work, the students will develop their abilities for critical deliberation of linguistic literature, as well as other required competencies.

Study Programmes

» Teaching Stream (Smjer) (*kro-dipl (4424): elective courses 1, 2nd semester (science stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic linguistic concepts;
2. Differentiate language varieties and linguistic levels;
3. Distinguish between diachronic and synchronic linguistic phenomena;
4. Distinguish norm from usage;
5. Prepare a lecture for a chosen linguistic topic and present it;
6. Relate linguistic and literary topics in teaching
7. Analyze and critically interpret linguistic handbooks and literature;
8. Describe and independently deliberate language.

General Competencies

Consolidate the overall knowledge on the Croatian language and approach it as a means of communication and artistic expression.

Forms of Teaching

- » Predavanja

Croatia Protected Natural and Cultural Heritage

57139

Lecturer in Charge

Doc. dr.sc.
Marina Šimunić
Buršić

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Seminar, class participation and exam (written and oral) are graded (40:10:50)

Course Description

Introduce the students attending the course to the wealth of tangible and intangible cultural heritage of the Croatian territory and emphasize the importance of natural resources and relief advantages in which our country abounds. Tangible heritage is relatively easy to present, define historically and socially, as it pertains to cultural monuments of general importance. Intangible heritage of Croatia comprises intangible cultural heritage such as oral traditions, social practices, rituals, festivals, and the knowledge and skills of traditional crafts. In addition to learning about the cultural heritage, the students will acquire basic knowledge about the natural monuments in the Croatian territory.

Study Programmes

» Science Stream (Smjer) (*kro-dipl (4422): elective courses 1, 2nd semester (science stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name tangible and intangible cultural heritage in the Croatian territory.
2. List protected natural heritage in the Croatian territory.
3. Explain the conditions under which certain content of general cultural significance becomes part of the wider world cultural and protected natural heritage.
4. Demonstrate the uniqueness of Croatia in terms of categorization and wealth of cultural heritage.
5. Evaluate the existing system of categorization of cultural heritage in Croatia.

General Competencies

Recount the facts and insights on intangible and tangible cultural heritage in the Republic of Croatia.

Week by Week Schedule

1. Introduction to basic concepts: cultural heritage, natural heritage, theories and methods of preserving heritage, familiarizing with the reference databases, getting to know Croatian laws that protect cultural heritage.

2. Convention Concerning the Protection of the World Cultural and Natural Heritage
3. Heritage of the Croatian Republic on the UNESCO World Heritage List
4. Heritage on the Croatian accession list
5. Diocletian Palace and Medieval Split, Dubrovnik Old Town, Early Christian complex of Euphrasius' Basilica in Poreč
6. Plitvice Lakes National Park, Historic City of Trogir, the Cathedral of Saint Jacob in Šibenik, Stari Grad Plain on the island of Hvar.
7. Intangible Heritage: Speech of the island of Susak, speech of Žminj, speech of Bednja, Istrian-Romanian speech, speech of village Siče in Posavina, Hum na Sutli speech, speech and toponymy of the village Vidonje, Kaikavian dialect (ikavian) of the lower Sutla
8. Dances: Drmeš, Kolanje, Lindo, Taraban, Trusa, Trojanac; singing: Istrian two-part singing and playing in the Istrian scale, Bečarac, Brojkavica, nursery rhymes, Klapa singing, Travel song
9. Traditional instruments: dvojnice, tambura, tambura samica, gajde, mih, lirica, lijericica, fičoške, drombulje, diplice, diple, svirale, gusle, harmonika triestina; Processions: Ljelje, betlemaši, u Cvitnicu Jelo (Bosniaks), Jela (Račinovci), kiti bunar (Babina Greda), Adam and Eve (Županja), riders
10. Manifestations: "Picokijada - Legenda o picokima" (Legend of the roosters), "Đakovački vezovi" (The Đakovo Embroideries), Varažin Baroque Evenings, Vinkovci Autumn Festival
11. Handicrafts, clothing, food: Svitak(svitek) from the island of Krk, production of wooden toys of the Croatian Zagorje, Croatian lacemaking from Pag, Hvar and Lepoglava, loom weaving, rules for maintaining and putting on traditional folk costumes, gold embroidery and silk embroidery, weaving and unweaving, rolling wool, traditional hairstyles and headgear
12. Games: Sinjska alka, Moreška, ball game in Trilj, Picigin
13. Liturgical and folk traditions: Festa of Saint Vlaho, Zvončari from Kastavština region, Ljelje in Gorjani, Procession of the Cross on the island of Hvar ("Za Križen")
14. Crafts and skills: Gingerbread hearts, Batana, construction skills (roof making, tamping dirt floors, wall construction by ramming, fence weaving from twigs, coating wattle), pottery, gingerbread and honey crafts, coal making, well making, traditional art of decorating Easter eggs, gingerbread heart, gourd decorating, Šibenik cap, Šibenik button, skill of constructing Rovinj batana
15. Field work

Culture, Identity and Globalization

57218

Lecturer in Charge

Doc. dr.sc.
Marinko Šišak

Course Description

Introduce students to the concepts of culture, identity and globalization, their theoretical considerations and systematization, and set in a mutual relationship. Analysis of different theoretical approaches to issues of personal and national identity in the modern era essentially defined globalization processes.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the theoretical approaches to the study of culture, identity and globalization.
2. Define global processes and their influence on culture and identity
3. Distinguish the basic concepts related to globalization
4. Argue and explain the theoretical approaches and their application to empirical material.
5. Analyze theories of culture
6. Analyze modernism and postmodernism and the concept of globalization

General Competencies

Analysis of contemporary globalization processes in the modern world and their impact on national culture and identity.

Week by Week Schedule

1. What is Identity?
2. Personal, human and social identity
3. Culture: Definition and Types
4. Theories of Culture
5. Globalization - theories and approaches
6. National and cultural Identity
7. The impact of globalization on national cultures
8. The economic foundations of globalization

ECTS Credits 5.0

Demography

53914

Lecturer in Charge

Doc. dr.sc.
Dario Pavić

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Seminar 30

Grading

Class attendance 10%; first test 35%; second test 55%.

Course Description

Getting to know with scientific basics of the course, methods of demographic research and techniques statistical data analyzing.

Study Programmes

» Science Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define demography as social science.
2. Classify the basic demographic indicators.
3. Explain the changes in the population structures.
4. Explain types of population policies.
5. Explain the basic types of demographic data sources
6. Explain the fundamental social causes of demographic change

General Competencies

Combine the society related data in the coherent written and oral form.

Outline the opposing view points and alternative hypotheses in the various social issues.

Outline causal relationships between the social phenomena.

Demonstrate the social impacts of the public policies.

Organize the teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Week by Week Schedule

1. Introduction to demography, demography as social science.
2. Sources for population data analysis, population censuses, methods of demographic research, divisions within demography.
3. Chosen topics in the demographic theory, theory of demographic transition.
4. Total population change, population change.
5. Components of natural population change (fertility, natality, mortality, natural change), determinants of natural population change.
6. Migrations (determinants, types)

7. General population dynamics.
8. Test
9. Depopulation processes.
10. Population structures (sex, age, economical, educational, family, religious, linguistic, racial, ethnic)
11. Demographic ageing, processes of deruralization and urbanization.
12. Dynamics and projections of the world population.
13. Population policy (postulates and types)
14. Demographic changes and social policy
15. Population in the international context.

Developmental Psychology

144712

Lecturer in Charge

Doc. dr.sc.
Eva Anđela Delale

Course Description

The course objective is to acquaint students with a systematic overview of scientific insights and concepts in the field of developmental psychology with special emphasis put on the phenomena appearing during the period of adolescence, and to enable students to connect theory and practice by applying the knowledge about developmental concepts and specificities of adolescence on the organization of the teaching process, monitoring the students' development and understanding individual differences in physical and psychological development.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 2nd semester, 1st year*)
- » Teaching stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare the teaching process in accordance with developmental achievements of the class and individuals;
2. Recognize deviations from the average developmental path and reasons for it in case of an individual student;
3. Assess the importance of building a constructive and quality identity;
4. Recognize developmental characteristics and the achieved level of every student in the psychomotor, intellectual, emotional and social areas
5. Assess the importance of establishing quality social relationships in class and make class a community of learning;
6. Identify the foundations for the development of a healthy learning motivation in line with insights of positive psychology.

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Lovorka Brajković, doc. dr. sc.

Grading

Lecture attendance is recorded as well as the amount and quality of interaction with the teacher. The asking of questions and initiation of discussions are encouraged and serve as the signal of comprehension and mastery of new concepts. There are among the written exam questions some questions aiming to check the understanding and generalisation of the regularities of development as well as the application of factual knowledge to practical problems. Creating links, making generalizations and providing examples of the application of acquired knowledge are particularly honoured in essay-type answers.

General Competencies

During the periods of lecturing, learning and evaluating the student will be able to:

Understand basic principles of an individual's development.

Explain the causes of individual deviations from the average developmental path.

Evaluate the insights of developmental psychology in the light of new research results from the fields of molecular biology, social psychology and positive psychology.

Apply the knowledge about the regularity of physical, intellectual, emotional and social development to educational processes, teaching and handling individuals at different developmental levels.

Forms of Teaching

» Predavanja

» once a week two hours

Week by Week Schedule

1. The concept of development.
2. Biological influences on development, critical periods, the influence of the biological system and character.
3. Social influences on development, socialization (ecological theories of development), parenthood.
4. Aspects of development (psychomotor, cognitive, emotional, social, personality).
5. Attachment as a socio-biological precondition of development.
6. Cognitive development.
7. Cognitive development as a precondition of memory, learning, and understanding in adolescence.
8. School development (influences on school development, school success, and early abandonment of school).
9. Emotional development, the development of emotional self-regulation, the importance of developing autonomy and independence, the origin of adolescent crisis.
10. Social development, the development of sociability, understanding relationships with others.
11. Moral development.
12. Socio-cognitive development, self-concept, self-image.
13. Insights of positive psychology (needs, reward, intrinsic motivation, goal orientations).
14. Identity in adolescence and identity crisis.
15. Continuous assessment exam.

Development in the Social Context

53863

Lecturer in Charge

Doc. dr.sc.
Eva Anđela Delale

Course Description

The content of the course enables students to interpret human behaviour using a multidimensional approach. Students will assess and evaluate contemporary research within bioecological theory framework on the impact of physical environment, culture, societal institutions, communities, families, and peers on the development of children and adolescents taking into account characteristics of individuals and their direct and indirect interaction with different levels of ecological systems. Through critical analysis of various theories and research, students will be able to assess the complexity and variety of life experiences of people and social groups in relation to the social context and environment in which they live. Students will distinguish favourable from unfavourable effects of microsystem, mezosystem, egzsystem and macrosystem on parenting and development of children and youth. Students will analyse the activities of children and youth in different microsystems, their transitions from one environmental context to another and the quality of relationships among their microsystems. Through independent and team work and discussions during the seminar on socially relevant topics, students will reassess their point of view and gain greater insight into their own values and attitudes. Upon completion of the course, students will increase their ability to participate in an interdisciplinary and team work in order to plan programs and interventions that promote positive development of children and youth.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the main concepts and propositions of bioecological theory of human development;
2. Evaluate the paradigms of research in developmental psychology with regard to whether they allow conclusions about the interaction effects of individual characteristics and different social contexts on the development of the individual;
3. Evaluate the significance and value implications of lay and professional theories of child development and their impact on the micro and macro levels;
4. Assess the effects of macrosystem and egzsystem on functioning and developmental opportunities of the poor and socially excluded families, children and youth, as well as other vulnerable and marginalized social groups;

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Grading

During the semester students are required to write and present case study and group seminar paper. Individual and group contribution, class presentation and discussion is monitored and evaluated, and the quality of the seminar paper and oral presentation contributes 40% to the final grade. Students' performance on written exam during the first and the second half of the semester or one final written exam contributes 60% to the final grade. Students who successfully pass two exams during the semester are not required to take the final exam. Students who do not wish to take two exams during the semester, as well as those students who are not satisfied with their achievement on these exams, are required to take the final written exam. The scope, the content and the corresponding ECTS points of the final exam meet the requirements of two exams conducted during the semester. Minimum achievement for a passing grade is 50% of the maximum number of grade points. The final grade is calculated based on points earned/total points possible for exams and seminar paper, as follows: 50% to 61% - sufficient, 62% to 74% - good, 75% to 87% - very good, 88% to 100% - excellent.

5. Explain parenting in different cultures and in different socio-economic conditions;
6. Choose the best ways to resolve conflicts of work and family roles;
7. Describe the main demographic, economic and social in modern society that affect the lives of young people during transition to adulthood;
8. Evaluate how the results of research on the development of children and youth in other cultures may be related to Croatian social context and suggest interventions to promote positive development;
9. Develop ethical sensitivity in working with people and collaboration with experts outside their own social context.

General Competencies

Students will:

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate the impact of social context and social changes on human development and behaviour of individuals, groups and systems.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specificities of their environmental and societal context.

Screening of student's work

- 0.3 ECTS Pohađanje nastave [EN]
- 2.1 ECTS Pismeni ispit [EN]
- 0.8 ECTS Seminarski rad [EN]
- 0.4 ECTS interview and/or data gathering for case study
- 0.4 ECTS group presentation
- 4 ECTS

Forms of Teaching

- » Predavanja
 - » twice a week
- » Seminar
 - » two hours once in two weeks
- » Terenske vježbe
 - » interview and/or data gathering for case study

Week by Week Schedule

1. Applied developmental science: The definition of a new discipline, aim and scope of work
2. Urie Bronfenbrenner: An ecological approach to the study of human development and criticism of previous research
3. Research paradigms in the study of human development: Class-theoretical models, process models and chronosystem models
4. Children's ombudsman; The Convention of the Rights of the Child
5. Educational system
6. Public health. Behaviors related to health of children and youth in the social context-research results.
7. Socioeconomic status and poverty: Effects on parenting and child development, methodological and ethical considerations
8. Culture and parenting: Parental ethnotheories and child-rearing practices

9. Social care system, work with children without parents. Family in contemporary society: Changes, challenges and the role in the development of children and youth. Conflict divorces.
10. Family and work: The impact of egzosystem on child-rearing. Employment of parents and parenting.
11. Neighbourhood and community effects on children and their families: risk and protective factors of development, resilience and coping, intervention programs.
12. Youth in the 21st century: postadolescence, social changes and growing up in a contemporary society - challenges and difficulties.
13. Friendship, peer groups and subcultures as a context of growing up.
14. Youth and work: Challenges during transition to the world of work
15. Leisure, media and new technologies: Positive and negative effects on children and youth

Development of the Croatian language

61936

Lecturer in Charge

Prof. dr.sc.
Georg Holzer

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Class attendance, acquired knowledge tested in a written exam.

Course Description

The aim of the course is to familiarize students with the development of the Croatian language of its earliest Indo-European origins to its present form. Special attention is given to ancient Slavic and generally Slavic past of the Croatian language, as well as various linguistic contacts between the ancient Slavic and Croatian languages and with other languages as well.

Study Programmes

- » Science Stream (Smjer) (*elective courses 2, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain fundamental facts on Indo-European languages
2. Describe developments of Croatian language from its Indo-European origins
3. Compare facts from Old Slavonic and General Slavonic history of Croatian language
4. Analyze early language contacts between Slavic languages, including Croatian

General Competencies

The students shall be able to describe the earliest phase in the development of Croatian language and understand language contacts between Slavic nations

Week by Week Schedule

1. The Indoeuropean language family and proto-language, the homelands of the Slavs
2. The relationship and contacts between the Slavic language in its homelands and the languages of the neighbors
3. Gothic and older loans in Slavic
4. The expansion of Slavic to the Danube
5. The multilingual Slavic society of those times in the light of anthroponyms
6. The role of the Avars in the development of Slavic
7. The "Great Expansion", Proto-Slavic and its reconstruction

8. The continuum of the Common Slavic dialects and the problem of drawing borderlines around and between South Slavic
9. The Protocroats
10. The Dalmatoromance loans in Croatian
11. Friulian loans in Croatian
12. Old High German loans in Croatian
13. The Slavic language of Thessalonike and Church Slavonic in Croatia
14. Ecclesiastical terms of Latin (and further Greek and Hebrew) origin in Croatian
15. The so called "Balkan" grecoisms in Croatian

Deviance at the Workplace

144630

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

The main objective of the course is to improve students' understanding of the diversity of deviant behaviour in the workplace. The course provides an overview of the most significant theoretical concepts and the most recent empirical data in the field of deviance at the workplace. Students will be given the opportunity to familiarize with different theoretical, empirical and practical approaches to deviance in the workplace in different countries. The course enables students to understand, manage and further explore different forms of deviant behaviour at the workplace.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl(5393): elective courses, 3rd semester (science stream), 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe typologies of deviance at the workplace
2. Explain the key issues in understanding patterns of destructive and constructive deviance at the workplace
3. Explain the key issues in explaining patterns of workplace incivility
4. Explain the key issues in explaining patterns of substance abuse at the workplace
5. Explain the key issues in explaining deception and theft at the workplace
6. Explain the key issues in explaining corporate deviance, corruption, scams, fiddles and sabotage at the workplace
7. Explain the key issues in explaining patterns of violence at the workplace
8. Identify the major personal and organizational predictors of deviance at the workplace

Diagnostic Criteria in Clinical Practice

53810

Lecturer in Charge

Doc. dr.sc.
Ljiljana Pačić Turk

Course Description

Enabling the students to plan psychological evaluations, conduct quantitative and qualitative result analysis and on the basis of these results and their interpretation enabling them to better distinguish diagnostic categories which they will most commonly encounter in clinical practice. The applicability of the acquired knowledge in the practice of working with clients - planning psychological evaluations with regard to individual cases and diagnostic categories.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and explain different diagnostic categories symptoms
2. Plan the clinical assessment procedure adjusted to each individual case
3. Analyze the relevant data obtained by psychological assessment procedure
4. Summarize the relevant information obtained from the above mentioned procedures
5. Prepare the clinical psychological assessment according to clinical disorders specificity
6. Distinguish most common diagnostic categories in clinical practice
7. Estimate most common diagnostic categories in clinical practice

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Dictatorships in Central Europe

158277

Lecturer in Charge

Prof. dr.sc.
Tihomir Cipek

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. The final exam is oral.

Course Description

Course objectives are to introduce students to the concept and main features of the dictatorship, the manner of origin, ideology, development and changes that were adopted in the second half of the 20th century in Central Europe. The emphasis is on the analysis of historical action 'structure of long duration' in contemporary politics.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify regional history as important in comparing the cases with Croatian,
2. Define the characteristics of a dictatorship in the Central European region,
3. Analyze the basic problems of regional history in comparative framework over the long term,
4. Define dictatorship as an important political concept,
5. Explain the causal relationship developing of countries and regimes in our immediate environment,
6. Use successfully comparative history as a model in the study of history,
7. Compare historical processes and the course of historical events in the regional area in the 20th century.

General Competencies

After finishing the programme student will be able to:
 explain cause and effect relations of historical events and processes,
 reconstruct historiographic tools in making conclusions of historical processes and events,
 compare historical processes of different periods,
 demonstrate the importance of interdisciplinary interpretatons of historical events,
 differentiate specificities of historical periods.

Week by Week Schedule

1. Central Europe, definition of the term Central Europe and show how it has changed throughout history. Emphasis will be on the analysis of its political function and history of European exploration of the region.
2. Dictatorships: term. Will be defined term of dictatorship. Will be analyzed differences between authoritarian and totalitarian dictatorship.
3. Authoritarian dictatorships in Central Europe. Will be displayed common characteristics of central authoritarian dictatorship between the two world wars.
4. Dictatorship of J. Pilsudski. Will be displayed basic features of a dictatorship in Poland, especially its function in the formation of Polish national identity.
5. Horthy dictatorship in Hungary. Will be displayed its basic features, especially the role of the aristocracy in a dictatorship.
6. Dictatorship J. Tisza in the First Slovak Republic. For example, this dictatorship will be displayed characteristics of fascist puppet regime under the influence of the Third Reich. It will be compared with the dictatorship of the ISC. This will serve a term that is another warning to the difference between the types of dictatorship.
7. Fascist and communist dictatorships. Shall be pointed out on their similarities and differences across the political theory of Hannah Arend and CJ Friedrich and Z. Brezynskog.
8. The establishment of totalitarian communist regimes in Central Europe. Will be displayed way they are set up, their ideology, and holders and supporters of this type political order in Central Europe.
9. Communist ideology and order in Central Europe. Will be displayed by analysis of the film Man of Marble A. Wajda. or the film The Lives of Others A. Donersbacha.
10. Crisis in the communist dictatorships. Will be displayed causes and outcome of the crisis in Hungary 1956. Czechoslovakia 1968.
11. Solidarity Movement. Will be displayed union movement led by L. Walesa beginning of the end breakdown of the communist dictatorship in Poland and Solidarity actions impact on other states.
12. The causes of the collapse of communist dictatorships in Central Europe. Will be displayed economic and political reasons for the collapse of the dictatorship and they will be comparable to the Communist dictatorships in the world.
13. Dictatorships in Croatia. Will be displayed main feature of both types of dictatorship in Croatia and compare them with similar ones in other countries of Central Europe.
14. Dealing with the past. Will be displayed process of dealing with the past. Lustration laws, policies memories of the past,
15. Modern democracy and the legacy of dictatorship. Will be displayed how to use the different interpretations of the past in contemporary political struggle and to shape today's political culture

Didactics

96487

Lecturers in Charge

Prof. dr.sc.
Marko Pranjic

Doc. dr.sc.
Marjan Ninčević

Course Description

The objective of the course is to acquaint students with didactics as the theory of learning and teaching, didactics research subjects throughout history and today, didactic epistemology, foundations of didactics in social sciences and humanities, and above all didactic teaching procedure structured through planning, delivery, and evaluation.

Study Programmes

- » Psychology (Studij) (*elective (teaching module), 1st semester, 1st year*)
- » Psychology (Studij) (*elective (teaching module), 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret correctly the basic concepts of didactics as a science
2. Analyze the historical development of didactic thought (Ratke, Komensky, Rousseau, Basedow, Pestalozzi, Trapp, Herbart, Ziller, Humboldt, Willmann, Weniger, Montessorri, Otto, Steiner and Scheibner)
3. Interpret social-scientific and humanistic foundations of didactics
4. Compare didactic theories
5. Explain the scientific method of didactics
6. Evaluate the social-scientific and humanistic nature of the subject matter of didactics (intrinsic and extrinsic genesis of human individuality, ethical and social-theoretical frameworks of the human being, partial theoretical foundations)
7. Interpret the main characteristics of didactic epistemology (didactic theories, scientific methods of didactics, didactics and its references, different ways of defining didactics)

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Goran Hajdin, dr. sc.

Grading

Students personally register their attendance at every lecture, they check the record the following time, and lead discussion with the professor and the colleagues (20% of the final grade). Students also conduct individual additional literature research on a specific didactic problem, report on it in front of all the students and lead a discussion about it, participate in seven similar projects of other students (30% of the grade) and take a written exam (15 questions) based on obligatory literature (50% of the grade).

8. Apply the theories of didactic procedure in teaching (planning, delivering and evaluating the teaching process)

General Competencies

At the level of the programme, Didactics makes students capable of:

Correctly interpreting of teaching and learning as the principal contents of Didactics and explain while is Didactics considered in the modern didactical literature as the theory of teaching and learning.

Week by Week Schedule

1. Contemporary teacher training in Croatia: Who can perform teaching jobs? What competences must a teacher have? How to acquire the needed competences? An overview of teacher training at Studia Croatica of the University of Zagreb. Theoretical aspect. Practical aspect.
2. Teacher's environment (principal, vice principal, School Council, colleagues, students, personnel, the Ministry of education, local authorities, parents, university, place, city/town, scientific associations, teaching associations, cultural organizations, economy, unions, school owners, political parties).
3. Three centuries of didactic thought. Two to three lessons are dedicated to acquainting students with the reasons behind the appearance of didactics as a science and practice and introducing fifteen most representative theoreticians and their ideas, used in contemporary didactics when reflecting on didactic theory or organizing didactic practice (see 2.4.).
4. Didactic etymology from the earliest times until today. Things in common: teaching activity, persons who teach, necessary qualifications for teaching, main contents that are taught, teaching media used, teaching environment, learning as the student's main activity.
5. Contemporary understanding of didactics (theory of teaching and learning, theory of school teaching, theory of educational contents, theory of learning processes management, theory of applying psychological knowledge in teaching and learning).
6. The basic concepts of didactics (teaching-tuition, learning, upbringing, education, school, dialectic interaction).
7. Didactic forms (didactic triangle, didactic quadrangle, didactic polygon).
8. Teaching forms (teaching oriented towards obtaining new knowledge, skills, educational attitudes, and open teaching structure).
9. Contemporary teaching principles (differentiating/individualizing, motivating, visualizing/realism, activation/self-engagement, structuring teaching contents, multiform perspectives, goal-orientedness, ensuring success).
10. Routine teaching planning (individual concept of the teacher, using professional literature, knowing the course/subject curriculum, a big number of textbooks, intellectual dialogue with colleagues, attending seminars, whence the teaching planning procedure can start, turning programme objectives into teaching objectives).
11. Time and shape of the working group (the role of place in teaching, the student's sitting place in the classroom – students oriented towards the teacher or working in groups, the U organization, individual work, students facing each other (one group versus the other), students in the circle, direct discussion).

12. Self-testing of the teacher (sufficient familiarity with the course and programme curriculum, precise formulation of the teaching unit objective, using sources and other materials, knowing the competences and experience of the students, envisaging various activities, personal conduct quality, equal activation of all students, the issue of attention, interest, and motivation, feedback information, special needs of students).
13. Realization of teaching (dialectic interaction, teaching objectives must become the student's objectives, personal activity of the teacher, flexible reactions, managing student attention, routine use of social forms of work, the rules of teacher behaviour, directions in cases of class obstruction).
14. Homework (evaluating homework, the role of homework, the types of homework, the objectives of homework, differentiating according to interests, competences, inclination, learning tools, environment, timing, and the ways of assigning homework)
15. Three types of teachers (authoritative, indolent, democratic - with the view of the following criteria: space, objective choice, activities, relationships, participation, evaluation).

Diploma Thesis

53899

Course Description

Diploma thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Study Programmes

» Philosophy (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Week by Week Schedule

1. Discussion of the topic, its approval and the acceptance of tasks.
2. Writing the thesis.
3. Writing the thesis.
4. Writing the thesis.
5. Writing the thesis.

Dubrovnik Republic in the Context of Croatian Cultural History

57147

Lecturer in Charge

Prof. dr.sc.
Stanislava
(Slavica) Stojan

Course Description

The course is based on literary and anthropological approach to the history of everyday life in the Republic of Dubrovnik. Literary works and archival documents will be analysed for this purpose. Interaction of history and literature will enable comprehension of the most exciting periods of Dubrovnik history and reconstruction of history of everyday life by observing the world and people in it through their mutual relations, individual experiences, symbols, oral tradition, custom, social norms, toponymy. It will be possible to observe how historical changes reflect on cultural patterns. The rich historiography on this matter will be addressed as well.

Study Programmes

- » Science Stream (Smjer) (*elective courses 2, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe processes related to the history of Republic of Dubrovnik
2. Define social, political, economical, and cultural characteristics of Republic of Dubrovnik in relation with other Croatian lands
3. Analyze them and interpret sources concerning the history of Dubrovnik
4. Compare historical processes of the Republic of Dubrovnik with historical processes which took part in other Croatian territories
5. Identify historical problems and questions related to political, economical, and cultural history of Republic of Dubrovnik
6. Explain problems related to specific historiographical questions of Republic of Dubrovnik

General Competencies

After finishing the programme student will be able to define and analyze historical processes related to cultural history of Republic of Dubrovnik and design own conclusions on different historical events and processes, and compare them with other notions in Croatiaology.

Economic History

53921

Lecturer in Charge

Izv. prof. dr.sc.
Marino Manin

Course Description

The main objectives of the subject are to introduce students to the basics of economic history, present the basics of economic doctrines and consider the development of economic thought in the Croatian field.

Study Programmes

» History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Classify the basic historiographical theses on economic history of the Middle Ages and the Modern ages
2. Show the most important data and processes that shaped the economy in the past,
3. Explain the causal link of official policy and economic development,
4. Compare processes of development such as agriculture, craft or trade in different historical periods,
5. Analyze the economic doctrines that were popular in certain historical periods,
6. Analyze specific development of economic thought in Croatia in relation to European examples,
7. Analyze on the significance and impact of various economic institutions in different historical periods on the socio-political life in general.

General Competencies

After finishing the programme student will be able to:

1. define historical processes typical for certain historical period;
2. explain cause and effect relations of historical events and processes;
3. reconstruct historiographic tools in making conclusions of historical processes and events;
4. compare historical processes of different periods;
5. combine a different historical processes.

Week by Week Schedule

1. Introduction to Economic History: time, space, economic processes

ECTS Credits 5.0

Educational Integration of Children with Special Needs

153303

Lecturer in Charge

Izv. prof. dr.sc.
Adinda Dulčić

Course Description

The course objective is to familiarise the students with the current educational status of schoolchildren with developmental disorders with an emphasis on educational integration, and with the Croatian legislative policies that relate to the education of children with developmental disorders with special reference to the reform that is under way. The students will be introduced to developmental disorders in accordance with the Diagnostic and Statistical Manual (DSM) IV (terminology, definition, etiology, phenomenology). The course will deal with the implementation of an individualised approach, the preparation of adjusted programmes and the evaluation of students with developmental disorders.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the status and rights of children with developmental disorders in the Croatian educational system
2. Identify the basic psychological functions in the development of children and adolescents
3. Recognize basic characteristics of children with developmental disorders in education
4. Distinguish developmental disorders
5. Recognize the significance of the role of the caregiver, teacher and expert associates in integrational education
6. Apply the principles of teaching methodology in working with students with developmental disorders
7. Define the significance of integration and/or inclusion and their implication for the education of children with developmental disorders.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Exercises 15

Teaching Assistants

Lidija Čilić Burušić, mr. sc.

Iva Tadić, mag.

Grading

The students' attendance at the lectures is personally attested and verified at the next lecture, possibility of discussion with the professor and other students (20% of the final grade). Personal research of one issue from the field of didactics through additional literature, the presentation of such research before the other students and discussion, participation in 7 such presentation of other students (30% of the final grade) and written exam based on the obligatory literature – 15 questions (50% of the final grade).

General Competencies

On the level of the teacher training programme, the Educational Integration of Children with Developmental Disorders Course will make students able to:

Identify the basics of developmental psychology.

Recognise developmental disorders.

Distinguish methodological and didactical procedures in working with children with developmental disorders.

Week by Week Schedule

1. Introduction to the course
2. Emotions and motivation
3. Intelligence
4. Communication
5. Children with reduced intellectual abilities; terminology, definition, etiology, phenomenology and classification of developmental disorders, developmental characteristics
6. Hearing and speech impairment; developmental characteristics, terminology, definition, etiology, phenomenology and classification of developmental disorders
7. Vision impairment; terminology, definition, etiology, phenomenology and classification of developmental disorders, developmental characteristics
8. Children with communication disorders; terminology, definition, etiology, phenomenology and classification of developmental disorders, developmental characteristics
9. Behavioural disorders, ADHD/ADD; terminology, definition, etiology, phenomenology and classification of developmental disorders, developmental characteristics
10. Speech and language disorders: terminology, definition, etiology, phenomenology and classification of developmental disorders, developmental characteristics
11. Specific learning disorders: terminology, definition, etiology, phenomenology and classification of developmental difficulties, developmental characteristics
12. Educational integration; basic preconditions of a successful integration, the role of the parents, teachers and the educational system
13. Models of support for educational integration; teacher's assistants, extended expert procedure, mobile team,
14. Individualised approaches; adaptation of premises, requirements, materials
15. Preparation of adapted programmes; technique and method of adjusting educational content

Educational Psychology

53870

Lecturer in Charge

Prof. dr.sc.
Andreja Brajša-
Žganec

Course Description

Familiarize students with the knowledge of the individual characteristics of students that can affect their academic achievement, theories and approaches to teaching and learning, theories of motivation and learning motivation, desirable features and characteristics of teachers, and how to create stimulating environment for teaching and learning in the school educational context. Throughout the course, students will become familiar with different theories, approaches and methods in the field of educational psychology and will be able to apply them in educational work.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe how individual students characteristics affect their academic achievement.
2. Describe and differentiate special needs students.
3. Compare and evaluate different theories and approaches to learning.
4. Describe and compare different motivational theories.
5. Differentiate and compare methods of teachers work evaluation.
6. Differentiate and compare methods of grading and evaluating students work.
7. Describe stimulating environment for teaching and learning.
8. Describe and argue desirable teacher characteristics for successful teaching.
9. Synthesize existing knowledge and apply them in designing workshops.

General Competencies

Appraise fundamental theoretical knowledge of psychology and its relationship with different branches of applied psychology.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Ivana Hanzec, dr. sc.

Grading

Students are evaluated continuously during the semester. The final grade is based on five elements: regular lecture attendance (4 points), regular seminar attendance (4 points), two tests or final written exam (72 points), individual assignment (10 points) and group assignment (10 points). In total, students can gain 100 points. A minimal requirement for passing the course is 60 points, with a condition of passing both tests during the semester or a final written exam with a minimum of 50%.

Screening of student's work

- 0.5 ECTS Pohađanje nastave [EN]
- 2 ECTS Kolokviji [EN]
- 1 ECTS Seminarski rad [EN]
- 0.5 ECTS Praktični rad [EN]

- 4 ECTS

Forms of Teaching

- » Predavanja
 - » interactive lectures
- » Seminar
 - » application of acquired knowledge in individual seminars and group workshops

Week by Week Schedule

1. Course introduction; presentation of content, working mode, students obligations (with theme selection for seminars) and the way of evaluation
2. Introduction to educational psychology (role in teaching and learning; research methods)
3. Individual students characteristics (cognitive abilities, personality, self-esteem, creativity)
4. Students with special needs (students with developmental disorders – school difficulties; gifted students)
5. Behavioural and cognitive approach to learning
6. Social theories of learning
7. Humanistic approach to education
8. Motivation in learning and teaching (Theories of motivation, self-regulated learning)
9. Positive and stimulating environment for learning (Classroom management, school discipline, cooperation with parents)
10. Teachers characteristics (competences, features, attitudes and skills)
11. Methods of successful teaching
12. Evaluation of teachers work
13. Evaluation and grading students work (Assessing and measuring knowledge - academic achievement, Assessment of students' abilities)
14. Description of the school psychologists work
15. Final discussion and course evaluation

Lecturer in Charge

Pred.
Dunja Jurić
Vukelić

Course Description

The main objective of the course is to introduce the students with the systematic overview of important theoretical insights in the field of pedagogical psychology. The students will learn about basic models of intelligence, cognitive styles, creativity, learning, motivation, and teaching. Special emphasis will be put on the application of this knowledge in the teaching practice. Also, the students will be acquainted with the needs of gifted children and the children with special needs in the school environment.

Study Programmes

- » Teaching stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret basic concepts and theoretical insights from the field (intelligence and creativity, motivation in school, learning, grading, class management, preparation of lectures and presentations, alternative teaching methods).
2. Compare different theories of intelligence, motivation and learning, as well as teaching methods.
3. Argue for and against different educational-psychological procedures and decisions in practical educational situations, especially the ones referring to prevention of bias and prejudice, adjust the methods of teaching to gifted students or students with special needs.
4. Apply valid student achievement evaluation techniques.
5. Prepare the curriculum/syllabus using the support of information and communication technology (e-learning).
6. Analyze contemporary topics and phenomena in the field of education using acquired knowledge in educational psychology..

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours
Lectures 30

Grading

Two continuous assessment tests are organized during the semester, each testing a half of the course content and carrying 40 % of the final grade (80% in total). Taking these exams is not obligatory, but they are held during regular classes and are announced in advance. The passing threshold is 50%. The students who fail to take these tests (or one) or fail to achieve a 50% threshold, as well as the students not satisfied with their grade, should take the final written exam during the exam term. The students who earn 50% or more on continuous assessment tests and accept the grade they get are freed from the final exam. Success threshold in the final exam is also 50%. 20% of the points may be collected by regular attendance and participation in discussions (and filling out worksheets in class). Active participation of students is evaluated throughout (+, ++, -).

General Competencies

The students will be able to:

Correctly interpret theoretical and practical knowledge in the field of pedagogical psychology,

Explain the challenges and characteristics of the teacher role,

Give reasons for using contemporary forms of teaching methods and social forms of teaching,

Identify the adjustments of the school environment and teaching process to talented children and children with special needs.

Screening of student's work

0.3 ECTS Pohađanje nastave [EN]

2 ECTS Kolokviji [EN]

0.7 ECTS Praktični rad [EN]

3 ECTS

Forms of Teaching

» Predavanja

» Lectures will be held weekly.

Week by Week Schedule

1. Introduction to educational psychology: what is educational psychology, the history of educational psychology and its objectives, the role in education and teaching, research methods.
2. Learning and teaching: cognitive approaches – cognitive development, information processing theory, attention.
3. Learning and teaching: cognitive approaches – short term memory, storing information in long term memory, information processing depth model, mental maps, mnemotechnics.
4. Learning and teaching – behaviourist approaches: classical and operant conditioning (generalization and discrimination of stimuli, positive and negative reinforcements, Premack's principle, rewards and punishments, application in practice).
5. Learning and teaching – communication-humanistic approach: communication approach to education (is there any other way?), basic assumptions and features of a communication-based teaching methodology – didactic game, functional language communication, the method of induction); humanistic approach to education (to what extent we influence personality development in school, why are students unsatisfied, the basic principles of humanistic education, application in practice).
6. Learning and motivation in school: (why motivation is important, intrinsic and extrinsic motivation, basic theories of motivation, how to motivate, the role of motivation in educational process).
7. Continuous assessment exam.
8. Individual differences: intelligence, creativity, gifted children.
9. Individual differences: learning difficulties, hyperactivity, and students with special needs.
10. Prejudice and violence in school: prejudice and self-esteem, self-fulfilling prophecy, latent and manifest prejudice, education of ethnic minorities, violence and its forms, possible causes of violence, how to recognize a bully, children victims of bullying in school, consequences of bullying, violence, and intimidation, what we can do.
11. Teacher's competences: what makes a good teacher; professional, educational-didactic-methodological, and work competences, European principles, teaching methods.

12. Evaluating student achievements: techniques for measuring knowledge, how to create a good/objective test, problems of school grading, standardized tests, cheating and plagiarism.
13. Classroom management: how to approach the class, how should a classroom look, setting the rules, small secrets of great teachers, learning from examples.
14. Classroom management: students responsibilities, influence of family on personality development and school success, cooperation between teachers and parents.
15. Continuous assessment exam.

Education in the Age of Antiquity

118717

Lecturer in Charge

Prof. dr.sc.
Marko Pranjic

Course Description

The objective of the course is to:

Introduce students to the understanding of education in ancient Greece, ancient Rome, and early Christianity, and to how education was practiced in everyday life, in both family and social environment.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 2nd semester, 1st year*)
- » Teaching stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the basic pedagogical concepts from the age of Antiquity
2. Interpret the bases of ancient understanding and practicing of education
3. Compare ancient and contemporary educational content
4. Explain the continuity and/or discontinuity of educational content
5. Evaluate the bases of educational practice of Antiquity
6. Interpret the main features of ancient education.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

During the three meetings organized in the form of continuous assessment exams, the students' motivation for the course content will be detected. Based on the students' reading of comprehensive teaching materials for this course, the first continuous assessment exam will evaluate the students' understanding of Greek educational values from Homer to Sparta and Athens, and also in the works of the main Greek thinkers with accentuated educational sensibility. The second continuous assessment exam demands of the students to expose the understanding of two levels of ancient Roman education and the work of the main ancient Roman thinkers. The third continuous assessment exam tests the understanding of the oldest forms of early Christian education, the central ideas connected with the time, the early Christian education of adults as well as the ideas of early Christian thinkers on education.

General Competencies

At the level of the programme, Education in the Age of Antiquity makes students capable of:

interpreting the basic concepts of education in the age of Antiquity,
 analysing the historical development of educational thought,
 interpreting antique educational content, skills, and virtues,
 comparing education over three periods and territories: Greek, Roman, and early Christian.

Screening of student's work

- 1 ECTS Kolokviji [EN]

Course Description

Enable students to independently conduct four standard workshops with the theme of preventing violence in adolescent relationships, as well as prepare them for the future creating and management of psychological workshops on different topics.

Study Programmes

» Croatian Latinity (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify problem of violence in adolescent relationships.
2. Use general knowledge about violence in intimate relationships and specifically on violence in adolescent relationships.
3. Develop competencies for working with adolescent population
4. Develop competencies to deal with more severe issues and taboo themes.
5. Develop competencies for creating workshops
6. Develop competences for conducting workshops
7. Develop organizational skills needed to organize workshops in secondary schools and similar institutions

General Competencies

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Prerequisites for

Elementary Greek II

Week by Week Schedule

1. Presentation of the program, its grounding, goals and student obligations, the discussion about the adolescent population in general (attitudes about adolescents, experience with adolescents, knowledge of the interests of adolescents), experience (direct or indirect) with violence in adolescent relationships, and violence in adolescence in other relations
2. First half of the students will have the task to present in pairs an article about the broader context of violence in adolescent relationships (e.g., the relationship between this type of violence with experiencing domestic violence, bullying, about impact of media on perpetration and/or experiencing violence in adolescent relationships etc.). After that, each pair will be required to give its critical review to the presented article (e.g. methodology, conclusions), try to link the content presented in the article with Croatian social context, prepare questions and lead a discussion about the specific topic of the article.
3. First half of the students will have the task to present in pairs an article about the broader context of violence in adolescent relationships (e.g., the relationship between this type of violence with experiencing domestic violence, bullying, about impact of media on perpetration and/or experiencing violence in adolescent relationships etc.). After that, each pair will be required to give its critical review to the presented article (e.g. methodology, conclusions), try to link the content presented in the article with Croatian social context, prepare questions and lead a discussion about the specific topic of the article.
4. Second half of the students will have the task to present in pairs an article about the more specific themes concerning violence in adolescent relationships (e.g. concerning the prevalence and consequences of the violence in adolescent relationships). After that, each pair will be required to give its critical review to the presented article (e.g. methodology, conclusions), try to link the content presented in the article with Croatian social context, prepare questions and lead a discussion about the specific topic of the article.
5. Second half of the students will have the task to present in pairs an article about the more specific themes concerning violence in adolescent relationships (e.g. concerning the prevalence and consequences of the violence in adolescent relationships). After that, each pair will be required to give its critical review to the presented article (e.g. methodology, conclusions), try to link the content presented in the article with Croatian social context, prepare questions and lead a discussion about the specific topic of the article.
6. Learning about the structure of the workshop (defining goals, identifying the contents, the criteria for selection of possible activities), short presentation of topics and subtopics of the standard “prevention of violence” workshops, a division into teams who will lead each standardized workshop in front of their peers (each student should participate equally in time - for example, if there is a 16 students on the course, each should take a quarter of one workshop).
7. Performance of the first standard workshop with the theme "I dream about good relationship" - expectations and rights in relationship (45 minutes), commenting on activities and workshop as a whole, discussion about possible improvements in the performance
8. Performance of the second standard workshop with the theme "With open eyes" - violent behavior in relationship (45 minutes), commenting on activities and workshop as a whole, discussion about possible improvements in the performance
9. Performance of the third standard workshop with the theme "My desires and boundaries" - non-violent resolution of conflicts (45 minutes), commenting on activities and workshop as a whole, discussion about possible improvements in the performance

10. Performance of the fourth standard workshop with the theme "How friends can help?" (45 minutes), commenting on activities and workshop as a whole, discussion about possible improvements in the performance
11. Discussion about the planned program and the possible difficulties, further practicing of "hard" parts of workshops - parts that will be additionally practiced depend on the students themselves, who choose the parts that they individually perceive as difficult, and can also choose the behavior of "class" (that is its counterparts) that they feel as problematic - the formation of teams of 4-5 members, selection of the theme and goals of "fifth" workshop within teams. Theme should be related to the prevention of violence in adolescent relationships, but to be completely or mostly uncovered in four standard workshops (e.g., jealousy, violence of girls towards boys).
12. Additional practicing of "hard" parts of the workshops; creation of activities of „fifth" workshops (within the teams)
13. Presentations of "fifth" workshops of each team, discussion about them
14. Organization of workshops in high-schools and support for conduction of workshops
15. Conducting of the focus groups, after all the students finish their workshops, aimed at experience exchange

Epistemology 2: Obligatory Seminar

53887

Lecturer in Charge

Prof. dr.sc.
Zvonimir Čuljak

Course Description

1. Present, explain and correlate the major contemporary externalist, naturalist and social-epistemological theories of knowledge and epistemic justification, providing their understanding and correlating, 2. Enable students to analyze and assess the pertinent epistemological theories as well as their arguments and counter-arguments, 3. Introduce students to meta-epistemological problems..

Study Programmes

» Philosophy (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, analyze and explain the relevant epistemological concepts (internal and external epistemic justification, production and revision of beliefs, the reliability of the belief-production processes and of the truth-indication, proper function, epistemic virtue, testimonial justification, collective knowledge and collective justified belief)
2. Analyze and evaluate the arguments for contemporary naturalist, externalist, social-epistemological and meta-epistemological theories
3. Demonstrate arguments and counter-arguments in the framework of the relevant epistemological analysis
4. Explain and present major contemporary epistemological theories and movements (externalism, naturalism, social epistemology)
5. Explain the relationship between individual and social epistemology
6. Explain major trends in the framework of the contemporary meta-epistemology (normativism and descriptivism, folk and scientific epistemology)

General Competencies

Students will be able to: 1. understand the interrelatedness of the epistemological analysis and the analysis in the framework of formal and informal logics, philosophical semantics, metaphysics and meta-ethics; 2. understand and explicate major historical theories of cognition and knowledge by means of the concepts of the contemporary epistemology; 3. apply some results of the epistemological analysis to other branches of philosophy (logic, metaphysics, philosophical semantics, meta-ethics).

Course Description

The objective of the course is to provide students with insight into the major metaethical theories and the ways of metaethical reasoning and argumentation. The course will comprise the introductory lecture, student presentations in the seminar and two tests. Introductory lecture will be a review of the basic positions in contemporary metaethics, whereas student seminar presentations will focus on the following topics: moral realism, moral antirealism (non-cognitivism), the problem of moral knowledge and moral observation, difference between evaluative and factual beliefs, descriptive and evaluative meaning, reductionism in ethics, relativism, utilitarianism, quasi-realism, particularism, internalism and externalism, weakness of the will and moral weakness.

Study Programmes

» Philosophy (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and enumerate major figures and writings of contemporary metaethics
2. Define and explain central theories and concepts of metaethics
3. Compare and interpret opposing metaethical viewpoints
4. Analyze and independently read literature on metaethics
5. Evaluate, criticize and justify particular metaethical views

General Competencies

After completing the course, students will be able to: (1) explain the place and significance of metaethics within the framework of contemporary philosophy; (2) apply metaethical knowledge and concepts when assessing theories from other philosophical disciplines (normative ethics, applied ethics, aesthetics, political philosophy); (3) integrate the metaethical model of reasoning into the general philosophical ability of critical thinking.

Forms of Teaching

EU Economic System

57187

Lecturer in Charge

Prof. dr.sc.
Luka Brkić

Course Description

Accelerated process of economic integration is one of the main characteristics of the contemporary society and modern economy. The main goal is to make students familiar with features of European economy and its position in international division of labor. Students will get insight into impact the process of globalization has on national economies as well as on evolution of european countries integration. The students will also get insight into all current developments in the economic life of EU countries.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl(5393): elective courses, 3rd semester (science stream), 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe classical and contemporary theories of integration and basic elements of economic integration of developing countries. Understand the difference between static and dynamic effects, integration success requirements as well as the benefits of integration.
2. Outline the basic instruments of the EMU such as the transfer of monetary policy from the member states to the Community's authority, as a narrower coordination of economic policy. Recognize that the removal of exchange rate fluctuations that disturb the functioning of the common market and monetary stability, preconditions of the strengthening of EU on the global market and regaining of monetary political effectiveness on the European level. rememebr that economic and monetary union has established a currency without a state, which is a unique experiment that connects the states into a united whole. . .
3. Recognize that the new challenges of the EU financial system arise from the desire to enlarge the Union. Understand that the instrument of financial plan has the cental position in extracontractual regulations and that not only the classification of costs was the iissue of disputes.

ECTS Credits 5.0

English Level L1

E-learning Level L2

Study Hours

Lectures 15

Seminar 15

Grading

Active participation in class
10%; seminar
paper/presentation 20%; two
tests 30%; oral exam 40%

4. Recognize the increasing importance of the European level for the social policy of the member states. Judicial practice of the Court of Justice of the European Union and the minimum standards dictated by the internal market are increasingly supplemented by active coordination on the EU level, which apart from the member states more and more frequently includes the EU institutions and interest groups.
5. Describe that competition is not possible without market orientation, which has the function of efficiently allocating goods and services over the price mechanism.
6. Explain that EC market competition regulations allow exceptions only in case of goods.
7. Recognize the need for removing market competition limits arising due to monopoly, oligopoly, price arrangements or state interventions. or

General Competencies

Combine the general knowledge of society and of social processes.

Outline the opposing viewpoints and alternative hypotheses in the various social issues.

Outline causal relationships between the social phenomena.

Demonstrate the social impacts of the public policies.

Illustrate the key structural factors that are shaping the society.

Week by Week Schedule

1. Economic integration in Europe in the 19th and 20th century
2. Economic situation in Europe after World War 1
3. World economic crisis 1929-1933 and its influence on European processes
4. Economic consequences of World War 2 in Europe
5. The beginning of the American century
6. The Cold War and economic and political divisions in Europe
7. The change of the nation state position
8. Free trade and protectionism
9. Marshall's plan of economic recovery of Europe
10. The beginning of integration processes
11. The objectives of economic integration in western Europe
12. Customs union, common market, economic and monetary union
13. The freedom of movement of goods, capital and workforce
14. Common agricultural policy
15. European economy and globalization

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

written exam, seminar paper,
term exam, topic
presentation.

Course Description

The aim is to make students familiar with basic features of EU integration process, theoretical origins, individuals and political parties that have the crucial impact on development of EU integration process.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4420): elective courses, 1st semester (science stream), 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze EU integration concepts.
2. Recognize EU integration concepts.
3. Apply general knowledge about EU.
4. Explain the role of specific countries in EU integration process.
5. Describe basic effects of integration process on national economy.
6. Name the basic elements of integration process.
7. Match the integration process to the changes in the role of the national state.
8. Compare relationship between processes of globalization and regionalization.
9. Develop interest for the studying the field of EU integration.

General Competencies

Upon the successfully passed exam, student will be able to:

Combine the general knowledge of society and of social processes.

Demonstrate the social impacts of the public policies.

Organize the teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Use the computer software for the analyses of qualitative and quantitative data.

Evaluate published sociological research with suggestions of possible improvements.

Week by Week Schedule

1. European Integration
2. Early process of European Integration
3. Franco-German Wars
4. Graf Coudenhove and Pan European Movement
5. Federalist Movements
6. European Integration after Second World War
7. Jean Monnet, Robert Schuman, Winston Churchill, Konrad Adenauer, Alcide De Gasperi
8. Role of USA in the process of European Integration
9. Creation of EEC
10. Conceptions of European Integration
11. France, De Gaulle and European Integration
12. Enlargement of the EC
13. Institutional Reforms
14. Creation of the European Union
15. From the Treaty of Paris to Lisbon Treaty

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Written exam, term exam,
seminar paper, presentation.

Course Description

The Europe of the 2010s has become a major focus of public discourse. Quickening of integration processes within European Union has raised the prospects of economic, monetary and political union. Croatia is on its road to become a full member of EU. It is important to understand a system and work of EU and the whole process of regional integration in Europe.

Study Programmes

» Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)

» Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze reasons of EU integration attractiveness.
2. Recognize political factors in process of joining Croatia to EU.
3. Apply knowledge in understanding of global world processes.
4. Explain relation between Eurosceptic and Europhil.
5. Describe roles of EU integration process
6. Name phases of relation between Croatia and EU
7. Match roles of national and international protagonists of EU integration process
8. Compare the process of Croatian joining to EU with other countries
9. Develop interest for studying process of EU enlargement
10. Use different methods of social research in analyzing relevant data

General Competencies

Combine the general knowledge of society and of social processes.

Demonstrate the social impacts of the public policies.

Illustrate the key structural factors that are shaping the society.

Point out the importance of the concepts of culture, socialization, stratification, social structure and institutions in the explanations of the social phenomena.

Analyse personal and local social questions in the broader social context, especially in the context of social class, ethnicity, gender, religion, capitalism, individualisation, nationalism, and globalization.

Week by Week Schedule

1. The Cold War in Europe
2. The role of USA in the process of EU Integration
3. The Schuman Declaration
4. Jean Monnet Plan
5. From ECSC to EU
6. France and West Germany
7. Regional Integration
8. Enlargement in EU
9. De Gaulle and Great Britain
10. Shaping The European Community
11. From European Community to European Union
12. European union and Croatia
13. Process of enlargement of Croatia in to the EU
14. Process of Negotiation
15. Croatia and full membership in EU

Evaluation and Measurement of Personality

167188

Lecturer in Charge

Doc. dr.sc.
Ana Butković

Course Description

Introduce students to different ways for measuring and assessing personality. Students will get insight into possibilities for measuring and assessing personality. They will be introduced to instruments for measuring and assessing personality, their characteristics and applications.

Study Programmes

» Psychology (Studij) (*elective methodology courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Evaluate the quality of instruments for personality measurement and assessment
2. Choose the instrument for personality measurement and assessment in line with desired purpose
3. Recognize the importance of decisions during instrument construction
4. Create and carry out all phases of instrument construction
5. Evaluate benefits and limitations of construction and translation of instruments

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Forms of Teaching

- » Predavanja
 - » Lectures are held in cycles.
- » Metodičke vježbe
 - » Practicals include reading and analyzing scientific articles, as well as filling in and constructing a personality questionnaire.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Exercises 15

Grading

Students will have to show in oral exam knowledge about different instruments, will have to be able to compare them and choose which one is adequate for specific purpose of personality measurement and assessment.

Week by Week Schedule

1. Methods of personality measurement and assessment
2. Purpose of personality measurement and assessment
3. Introduction to methods and instruments for personality measurement: projective techniques
4. Analysis of results of projective techniques
5. Introduction to methods and instruments for personality measurement: questionnaires 1
6. Analysis of results questionnaires 1
7. Introduction to methods and instruments for personality measurement: questionnaires 2
8. Analysis of results questionnaires 2
9. Defining the construct for instrument construction
10. Choice of measurement construct and assignments
11. Item formulation
12. Pilot version of the instrument
13. Data collection
14. Analysis of the instrument characteristics
15. Test

Factor Analysis

57113

Lecturer in Charge

Doc. dr.sc.
Toni Babarović

Course Description

Understanding the theoretical basis of factor analysis, independent analysis and evaluation of research papers in which some of the methods of factor analysis have been applied, designing research drafts where factor analysis is used as an adequate method of processing the collected data, independent practical application of factor analysis in psychological research using the SPSS software package.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain statistical and mathematical logic of exploratory factor analysis.
2. Assess the statistical requirements for the implementation of factor analysis.
3. Create a draft of research suitable for processing by factor analysis.
4. Analyze the data suitable for analysis through exploratory models of factor analysis using the SPSS software package.
5. Explain the results obtained from exploratory factor analysis within the frame of the posed research problem.
6. Explain the statistical parameters obtained from the analysis.
7. Assess the quality of the data processing produced by exploratory factor analysis in research.
8. Assess the range and reach of conclusions based on the application of exploratory factor analysis in research.

General Competencies

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

E-learning Level L1

Study Hours

Lectures 30

Exercises 15

Grading

Class effort (lectures and exercises) - 10%, seminars - 30%, homework 10%, written exam 20%, oral exam 30%.

Week by Week Schedule

1. Fundamentals of matrix calculus and geometry of vector space
2. The basic logic of factor analysis and factor extraction
3. Model main components
4. Determining the number of retained factors
5. Common factor analysis
6. Communality and communality estimation
7. Orthogonal graphical and analytical rotation
8. Oblique graphical and analytical rotation
9. Factor structure and factor pattern matrix
10. Factor scores
11. Higher-order factors
12. Other modes of factor analysis
13. Models of factor analysis on the transformed matrices
14. Introduction to confirmatory factor analysis
15. Using factors in other multivariate analyses

Field trip

64858

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

The aim of the course is to show students the scene of historic events and bring them some important historical events.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the relationship of historical events and locations
2. Explain the causes of historical events and processes
3. Distinguish the important from the unimportant circumstances
4. Compare different historical events and their relationship with its locality
5. Evaluate the significance of historical events
6. Write a term paper on fieldwork

General Competencies

After finishing the programme student will be able to: -identify major issues in interpretation of history -write an essay on different historical processes and events -design his/her own conclusion on different historical events and processes -demonstrate the importance of interdisciplinary interpretations of historical events.

Forensic Psychology

53786

Lecturer in Charge

Doc. dr.sc.
Ines Sučić

Course Description

To describe and give students the overview of key concepts, models and theories in forensic psychology. To explain and to compare different models and theoretical approaches in explanation of specific forensic phenomena, and to critically evaluate them. To relate theoretical frameworks to research findings and practical work. To foster application of gained knowledge in scientific and practical work.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Arrange concepts into models and theoretical frameworks in the field of forensic psychology
2. Evaluate contribution of psychology, law, policing, and psychiatry concepts to the forensic psychology field
3. Evaluate concepts, definitions, models and theories in the field of forensic psychology
4. Relate theories and models in forensic psychology and to relate them to the every-day experiences and psychological practices
5. Evaluate usefulness and applicability of different theoretical models in explanation of different types of antisocial behaviour
6. Prepare research in the field of forensic psychology

General Competencies

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Analyze scientific literature in psychology and related disciplines, and produce new scientific knowledge.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Grading

Class attendance and class participation will make up to 15% of the grade, preparing, writing and presenting report will make 15% of the grade, participation in research elaboration and conduction 30% of the grade, and the written exam will make a final 40% of the grade.

Week by Week Schedule

1. Introduction to concepts and scope of the field as well as students responsibilities during the course
2. Development of the discipline, and interrelatedness of forensic psychology to other disciplines (e.g. law, psychiatry)
3. Forensic psychology and policing. Roles and responsibilities of police psychologists.
4. Legal system and criminal procedure.
5. Theoretical approaches to psychological profiling of criminals, and geographical profiling of criminal cases.
6. Psychological profiles of certain groups of criminals (e.g. mass and serial killers, serial rapists).
7. Interrogation, investigative interviewing. Techniques and methods of interviewing suspects.
8. Techniques and methods of interviewing witnesses and victims. Cognitive interview. Conducting interviews with especially vulnerable populations (e.g. elderly, children).
9. Indicators and theoretical explanations of deception.
10. Techniques and methods for discovering deceptions and lying.
11. Psychological mechanisms of confessions. Types and determinants of false confessions.
12. Eyewitness credibility. Factors influencing perception and memory of eyewitnesses.
13. Methods and techniques for estimating statements credibility.
14. Psychological aspects of criminal procedures and verdicts.
15. Psychologist as court experts.

Genres of Latinity in the Age of Humanism and the Renaissance

144794

Lecturer in Charge

Doc. dr.sc.
Šime Demo

Course Description

Student will get familiar with literary genres of European and Croatian Neo-Latin literature of the Humanism and Renaissance, together with their representatives.

Study Programmes

- » Croatian Latinity (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and distinguish features of Neo-Latin.
2. Identify main features and properties of individual Latinist literary genre.
3. Describe the chronological and geographical context of individual works.
4. Relate the choice of a genre to the literary description of a topic.
5. Analyze literary and stylistical features of a Latinist work.

General Competencies

Describe and distinguish features of Neo-Latin. Analyze literary and stylistical features of a Latinist work.

Screening of student's work

Course Description

Course description

e-learning level 1

english level 2

Competency

Define, describe and evaluate global geopolitics and safety, their features and apply, classify and categorize technical terminology. In a professional way apply the acquired theoretical and practical knowledge to work in the media. Clearly present and analyze complex academic and non-academic contents in both, written and oral form. Impartially formulate arguments and strike a balance between opposing viewpoints.

Learning Outcomes

1. Define geopolitics, its features and significance.
2. Define global security, its basic features and problems.
3. Categorize the first theoreticians of geopolitics and know the gist of their theories.
4. Describe and critically analyze the development of geopolitics of the most influential countries of the world.
5. Categorize, describe and analyze geopolitics of the Republic of Croatia

Week plan

1. Introduction to the course; Geopolitics as a science;
2. Global security; Development of geopolitics through history;
3. The first theoreticians of geopolitics - Ratzel, Kjellen, Mackinder;
4. Geopolitics of the British Empire - development from the 18th century to 1922;
5. The geopolitics of the Great Britain from the World War II to the present;
6. The most prominent representatives, ideologues and theorists;
7. The geopolitics of the United States from the 18th century to the present;
8. The most prominent representatives, ideologues and theorists;
9. The geopolitics of Imperial Russia - from Peter the Great to 1917;
10. The geopolitics of the Soviet Union - development, ideologues and theorists
11. The geopolitics of the modern Russia from 1992 to the present;
12. The geopolitics of Germany - from Ratzel, through Haushoffer to Angela Merk;
13. Oil as the most important element of contemporary geopolitics and the greatest threat to global security;
14. Geopolitical significance of Croatia and its interests;
15. Geopolitics as a media appealing and deployed content and discipline;

Grading

100% exam.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define geopolitics, its features and significance.
2. Define global security, its basic features and problems.
3. Categorize the first theoreticians of geopolitics and know the gist of their theories.
4. Describe and critically analyze the development of geopolitics of the most influential countries of the world.
5. Categorize, describe and analyze geopolitics of the Republic of Croatia

General Competencies

Define, describe and evaluate global geopolitics and safety, their features and apply, classify and categorize technical terminology. In a professional way apply the acquired theoretical and practical knowledge to work in the media. Clearly present and analyze complex academic and non-academic contents in both, written and oral form. Impartially formulate arguments and strike a balance between opposing viewpoints.

Week by Week Schedule

1. Introduction to the course; Geopolitics as a science;
2. Global security; Development of geopolitics through history;
3. The first theoreticians of geopolitics - Ratzel, Kjellen, Mackinder;
4. Geopolitics of the British Empire - development from the 18th century to 1922;
5. The geopolitics of the Great Britain from the World War II to the present;
6. The most prominent representatives, ideologues and theorists;
7. The geopolitics of the United States from the 18th century to the present;
8. The most prominent representatives, ideologues and theorists;
9. The geopolitics of Imperial Russia - from Peter the Great to 1917;
10. The geopolitics of of the Soviet Union - development, ideologues and theorists
11. The geopolitics of the modern Russia from 1992 to the present;
12. The geopolitics of Germany - from Ratzel, through Haushoffer to Angela Merkl;
13. Oil as the most important element of contemporary geopolitics and the greatest threat to global security;
14. Geopolitical significance of Croatia and its interests;
15. Geopolitics as a media appealing and deployed content and discipline;

Graduate work

64813

Course Description

Graduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Study Programmes

» Croatology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Course Description

Graduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Study Programmes

» Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

Great Directors of European Cinema

64816

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

Getting to know the greatest directors of European cinema, their work and most important films. The seminar will show these most significant films and provide opportunity for their analysis, criticism and debate.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name and classify the greats of the European classic film
2. Define their place and role in the history of film and film art
3. Explain the impact of their masterpieces on the society
4. Define and explain the influence of cinema on the society development

General Competencies

Define, describe and evaluate European cinema, the history of its development and its central issues. Apply, classify and distinguish professional terminology. Present a reasoned and argued defense of one's own professional attitudes and insights. Expertly and professionally apply the acquired specialist theoretical and practical knowledge.

Group Processes and Impacts

130563

Lecturer in Charge

Prof. dr.sc.
Renata Franc

Course Description

The aim of the course is to familiarize students with the basic knowledge about groups, group dynamics and structures, group phenomena, various forms of social impacts, and with the basic knowledge of social identity, as well as the relationship between social and personal identity.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic concepts and theories in the field of groups, group processes, social identity and social impact. Become familiar with key research in the field of groups, group processes, social identity and social impact. Evaluate different theoretical approaches in areas related to the study of groups and group processes - for example in the area of leadership in the field of emotions in groups, in the field of collective behavior ...
Apply knowledge of group processes and impacts in practice
2. Explain the key research in the field of groups, group processes, social identity and social impact
3. Evaluate different theoretical approaches in areas related to the study of groups and group processes - for example in the area of leadership in the field of emotions in groups, in the field of collective behavior ...
4. Apply knowledge of group processes and impacts in practice

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Health Psychology

53869

Lecturer in Charge

Prof. dr.sc.
Jasminka Despot
Lučanin

Course Description

The aim of the course is to acquire psychological knowledge that can be applied in maintaining and improving health. Students will be trained to apply psychological knowledge and skills contained in a comprehensive, biopsychosocial model in order to help people maintain their health and help them cope better with different health problems.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the comprehensive, biopsychosocial model of approach to health and disease.
2. Explain the effects of psychosocial factors on health, disease, and health behaviour.
3. Explain specific communication between professionals and clients/patients.
4. Demonstrate the associations of stress, coping style, and physical stress.
5. Outline the interrelationship of physical disfunction, disease, and psychological state.
6. Evaluate the presence of psychological mechanisms in the pain experience.

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

ECTS Credits 4.0

Hellenistic Philosophy

83529

Lecturer in Charge

Izv. prof. dr.sc.
Pavel Gregorić

Course Description

The goal of this course is to acquaint students with the main concepts, positions and arguments of the main schools of Hellenistic philosophy: the Epicurean, the Stoic and the Pyrrhonian skeptic school. The approach will be mainly problematic, with emphasis on the central concepts and assumptions in ethics, psychology, epistemology and philosophy of nature. Students will also learn of the philological and philosophical challenges associated with study and interpretation of Hellenistic philosophy, as well as of their influence on later, especially Early Modern philosophy.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the main representatives of the three main schools of philosophy in the Hellenistic age: the Epicurean, the Stoic and the Pyrrhonian skeptic school.
2. Define philosophical concepts and problems characteristic for the three main Hellenistic schools of philosophy
3. Identify the main points of influence of earlier philosophers — especially Heraclitus, Democritus, Xenophon and Plato — on the leading Hellenistic philosophers
4. List the philosophical preoccupations of Hellenistic philosophers from those of Platon and Aristotle
5. State the main avenues of influence of Hellenistic philosophers on Early Modern philosophers

Heritage of Other Cultures in the Croatian Culture

57135

Lecturers in Charge

Prof. dr.sc.
Radoslav Katičić

Doc. dr.sc.
Marinko Šišak

Course Description

Show the cultural pervasiveness in the Croatian region and how it grew into what today lives as the Croatian culture. Examined are the country and the people in it, beginning with the Slavic ethnic tradition faced with prehistoric cultures encountered in the new land and with an ancient civilization on it.

Study Programmes

» Science Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the kind of influences on the formation of the Croatian culture.
2. Compare historically relevant cultural circles and their reception in the entirety of the Croatian culture interdisciplinary and multidisciplinary.
3. Describe the historical stages in the development of the Croatian culture and dominant influences.
4. Argue the specificity of the Croatian culture compared to other cultures.
5. Identify the specifics of Croatian culture
6. Identify the impacts of certain European cultures in the history of Croatian culture

General Competencies

Define and argue the layering, influences and pervasiveness of the Croatian culture with other cultures in contact synchronically and diachronically.

Week by Week Schedule

1. The aura of Rome and Constantinople, the impact of heritage in the time of the Avar Khanate, the atmosphere of the Carolingian Renaissance, Venetians and the dynamic area of the Hungarian development.
2. Pre-Romanesque and the Benedictines.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Student's involvement in debated topics based on spontaneous or planned discussions is being estimated. Preparing presentation for the fieldwork.

3. The heritage of Cyril and Methodius, the impact of the Ottonian Renaissance and the Cluniac Reforms. The western influences of the Romanesque and Gothic period and great orders and their role in creating the Croatian cultural space.
4. Scholasticism and European universities.
5. Wider European frameworks of the Pre-Renaissance in the Croatian region.
6. Intercultural connection of humanism, both in the Adriatic and the Pannonian region.
7. Reformation, Protestantism of Croats and Croatian protestants in Germany. The presence of the Oriental literature and spirituality, Catholic renewal and Baroque. The Society of Jesus and the Order of Saint Paul.
8. Encyclopedism in Baroque. Spiritual atmosphere of the Enlightenment, of Podunavlje, of Maria Teresa's and of Adriatic (physiocracy): Classicism and Pre-Renaissance.
9. The Napoleonic era and its cultural influences and incentives.
10. The Illyrian movement and the Croatian National Revival. National romanticism and romanticism in its full sense.
11. Realism and naturalism, historicism.
12. Modernism, "art for art's sake", Art Nouveau.
13. The Left and the Catholic Croatian intelligence in their European contexts.
14. Expressionism and other modernist tendencies, and combative social consciousness.
15. Exacerbated position between the western and eastern Europe in both Kingdom of Yugoslavia and the Republic of Yugoslavia and different ways of their participation in the whole of Europe. Croatia in the EU.

- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain the related disciplines.
2. Define the development of archaeology as a scientific discipline.
3. Explain the archaeological methods.
4. Explain the methods of the conservation of the excavated material.
5. List contemporary guidelines of museology.
6. Identify the most important archaeological sites in Croatia and several European and Near Eastern sites.

General Competencies

After finishing the programme student will be able to: define the methods of archaeology; identify the most important archaeological sites; explain the connection between archaeology and history and the importance of the interdisciplinary research; interpret several finds.

Forms of Teaching

- » Predavanja
 - » lecture
- » Seminar
 - » students prepare short lecture about chosen archaeological site
- » Terenske vježbe
 - » students visit several museums in Zagreb and archaeological park Andautonia

History of Christianity in Croatia

57136

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

Since Christianity is one of the essential elements of Croatian identity and that Europe, indeed, rose from Christian roots, the main objective of the course is to familiarize the students with the historical processes and events related to the Church (in the broadest sense of the word), and which shaped and strengthened the Croatian identity. The issue in question is not the identification of the religious with the national, but rather their mutual understanding and interpretation. Through the lectures, which are organized around selected questions and supplemented with individual work, the students will become capable of understanding the issues and problems of the Croatian religious history and, ultimately, of working in the interdisciplinary field of Croatology more fruitfully.

Study Programmes

» Science Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of the history of Christianity among the Croats and determine the key events and protagonists of this history.
2. Explain historical events in the causal process.
3. Connect the events from the Croatian religious history with the events at the European and historical scene.
4. Present the hierarchy of historical events and discern their relevance for the present moment.
5. Present Christianity as a component of the Croatian identity.

General Competencies

The students are expected to master the general chronological order of the history of Christianity in Croatia, to understand the context of specific events and to be able to understand the entire history of Christianity in Croatia as part of the Croatian culture. They will be taught to critically evaluate the present moment into which Christianity is unquestionably woven, and to read the Croatian identity in the context of global processes.

History of Croatian Cinema

61935

Lecturer in Charge

Doc. dr.sc.
Tomislav Šakić

Course Description

The students will be introduced to the history of Croatian film, with special emphasis on the different approaches to the study of film history and the position of the Croatian film with respect to the global context, especially in terms of industry and ideology. The main objective is, however, to establish an overview of the aesthetic history of the domestic film, with insight into the most important directors and authorial opuses, genres and stylistic guidelines.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*required course, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*kro-dipl (4423): elective courses I, 1st semester (teaching stream), 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Present and situate the history of film in the general context of art history
2. Analyze and understand the aesthetics and the issues of aesthetic changes (on the example of film)
3. Apply the knowledge of critical theory and the theory and history of literature (especially from narratology and the study of popular culture) in the area of film
4. Apply the interpretation and textual analysis (in the area of film analysis)
5. Recognise the fundamental film narrative styles (classical and modernist)
6. Recognize the fundamental stylistic determinants of a film, along with the ability to analyze and interpret the film at the fundamental level of stylistic interpretation.

General Competencies

The students should be able to situate the history of film in the general context of art history, to further understand the aesthetics and the issues of aesthetic changes (on the example of film), to apply their knowledge of critical theory and the theory and history of literature (especially from narratology and the study of popular culture) in the area of film, as well as to apply the interpretation and textual analysis (in the area of film analysis).

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Exercises 15

Grading

Activity at classes - 20%;
Project tasks - 30%; Written
exam - 50%.

Course Description

Improving specific students' competencies in effective management of human resources through an understanding of the basic theoretical concepts and current trends in practice. Students will analyse the basic theoretical models of human resource management and be able to apply those models in a real working environment. Students will be encouraged to evaluate strategies of human resource management and apprise modern trends in this area from the perspective of an organizational psychologist.

Study Programmes

» Psychology (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply psychological theories in the field of human resources management and practice
2. Combine the appropriate method of job (position) analysis in practice
3. Justify the use of different methods of advertising in the process of recruiting staff
4. Evaluate the use of psychological tests in the selection process
5. Develop a system and assessments for monitoring the efficiency of employee performance
6. Develop a reward system in firm.
7. Name the types and forms of training and professional development for employees in accordance with personal and organizational needs.
8. Modify changes in organizations.
9. Develop techniques for strengthening the organizational culture

General Competencies

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Week by Week Schedule

1. The role of human resources in the modern organization
2. Jobs Analysis
3. Ways of advertising and recruiting employees
4. Methods of selection of personnel
5. Tests in the selection - the validity of the selection process
6. Monitoring and evaluation of employee performance
7. Reward systems
8. Motivation for work
9. Professional training and professional development
10. Communication and interpersonal relations in the organization
11. Management changes in organization
12. Organizational Culture

Course Description

This course is carried out in order to provide a student with a basic understanding of international relations and social processes taking place in the modern world.

The world is in a process of constant change with uncertain outcomes. Many processes take place independently to knowledge and will of the people. Therefore, the participants of this course are to become familiar with the subjects of international relations, their mutual relations, and the effects of their actions.

A national state, which used to be a classic fundamental subject of international relations, loses its importance and the role it had in the second half of the nineteenth and in the twentieth century.

Currently a regional integration as a phenomenon connected to process of globalization is taking place, in which new actors in international relations emerge.

It is especially important to note that role and significance of certain countries are changing. While some lose their role and significance, the others are embarking on path of stronger engagement in global processes. The role and significance of international organizations is also changing, including the regional integrations such as the European Union, which are increasingly acting on behalf of their member states and replacing their global presence.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze international relations in modern world
2. Identify the main subject in international relations
3. Apply the acquired knowledge to understand international relationships
4. Explain relationships between small and big countries
5. Describe circumstances giving rise to new global order
6. List the main subjects in international relations
7. Combine all the factors that influence functioning of the international order
8. Compare relations between the world's major powers

9. Develop interest for research of international relations
10. Use the acquired knowledge for written and verbal presentation

General Competencies

Upon successful completion of the course, students will be able to: Connect general knowledge of society and social processes. Point out the conflicting opinions and alternative hypotheses in various social issues. Point to the social outcomes of public policies. Display key structural factors that shape society. Show the relevance of concepts of social structure and social institutions in explaining social phenomena. Analyze personal and local issues in a broader social context.

Week by Week Schedule

1. International Relations
2. International Relations in American and European tradition
3. Theory of International Relations
4. Methods in Teaching International Relations
5. Subjects of International Political Relations
6. National State and International Relations
7. National State and Regional Integration
8. Supranational and Intergovernmental character of Regional Integration
9. Role of National State in International Relations
10. Evolution of the role of National State in International Relations
11. Typ of International Relations
12. International Relations and Economics
13. Ideological division of the World
14. Religion and International Relations

Introduction to Comparative Literature

57156

Lecturer in Charge

Doc. dr.sc.
Dubravka Zima

Course Description

Introduce the students to the basic literary theories, contemporary and historical, and provide them with a systematic overview of the Croatian scientific study of literature. Read and understand the most important texts of the Croatian literary science, from the immanentism of the sixties of the 20th century until the contemporary culturology.

Study Programmes

» Teaching Stream (Smjer) (*kro - dipl (13096): elective courses 1 (teaching stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Present and independently select and pose a literary-theoretical or cultural-theoretical problem;
2. Analyze and articulate the task of the selected problem treatment on an immediate literary example or cultural practice/practices;
3. Present and report on the read secondary literature and establish a critical relationship to it;
4. Apply the read secondary literature in the independent treatment of assigned tasks;
5. Analyze and independently write an academic written paper.

General Competencies

Independently select and pose a literary-theoretical or cultural-theoretical problem;

Week by Week Schedule

1. Introductory agreement with the students on the course content and the mode of work. Literature, exam seminar assignments, student obligations.
2. Introduction to Comparative Literature. Croatian comparative literature. Ivo Hergešić, Miroslav Beker.
3. Introduction to Comparative Literature. History, theory. Zagreb School. Immanentism (term D. O. Tolić)

Introduction to Historical Science

57158

Lecturer in Charge

Prof. dr.sc.
Mladen Ančić

Course Description

The objectives of this course are to introduce students to the way in which it once formed and then played, and currently works as a scientific field of historical research. Students are introduced to the processes and procedures that characterize scientific activity and the discussion about read articles practically acquainted with the scientific dimension of history.

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic notions of scientific research of the past,
2. Explain the basic forms of communication of scientific research,
3. Demonstrate basic skills of designing complex knowledge,
4. Describe the meaning of term multiple perspectives
5. Compare different scientific paradigms,
6. Apply learned lessons to the further continue of scientific direction of graduate study history.

General Competencies

After finishing the programme student will be able to: compile a list of literature for each historical period, design his/her own conclusion on different historical events and processes, demonstrate the importance of interdisciplinary interpretations of historical events compare historical processes of different periods, appraise the value of historiographic interpretations, differentiate specificities of historical periods, distinguish difference between important and non-important facts within historiographic interpretation

Week by Week Schedule

1. Introduction differences between activities of playback historical knowledge through the education system and the history of scientific research.
2. Professionalization of academic historiography and its consequences.
3. The current state of the scientific field of history.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Introduction to Scientific Research

61243

Lecturer in Charge

Prof. dr.sc.
Branka Tafra

Course Description

The aim of the course is to provide the students in one place with basic knowledge about scientific-research (theoretical and practical) work and teach them to independently apply this knowledge in completion of their graduate theses, or in their own research.

Study Programmes

» Science Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic terminology of the methodology of scientific work
2. Develop the ability to write in scientific style
3. Analyze, search and use different bibliographic sources
4. Develop the ability for critical evaluation and argumentation
5. Sketch the draft of their research
6. Apply the learned lessons in their own research, especially in completion of their graduate theses within the study of Croatian culture
7. Apply the ethical codex of scientific and academic profession

General Competencies

The students will acquire basic factual knowledge related to scientific-research work in general and in particular the basic knowledge required to complete a high-quality graduate thesis in the field of social sciences and humanities. The students will learn the basic terminology of the methodology of scientific work, develop the ability to write in scientific style, be able to independently analyze, search and use different bibliographic sources, develop the ability for critical evaluation and argumentation, be able to present the draft of their research, primarily in the completion of their graduate thesis within the study of Croatian culture.

Introduction to Sociolinguistics

133474

Lecturers in Charge

Izv. prof. dr.sc.
Danijel Labaš

V. pred. dr.sc.
Lucija Miškulin
Saletović

Course Description

The course provides an introduction to sociolinguistics, i.e. to the study of why we speak the way we do, and the social factors that influence our linguistic decisions. Key issues of the complex interaction between language and society are explored, including register, genres, styles, code-switching, diglossia, bilingualism, language and power, language and identity, communication across cultures, language change, language policy and planning, all of which are unified by the common denominator called language variability and diversity. Considerable attention is devoted to the ways in which spoken and written language may be interpreted depending on the context and expectations of the participants.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe diverse factors of linguistic micro-choices (social stratification, gender and age), as well as of macro-choices (boundaries, background, functional restrictions)
2. Discuss a wide range of factors relevant to language issues in cross-cultural and intercultural communication
3. Illustrate various aspects of language change over time and explain possible reasons
4. Explain the interplay between both language and power, and language and identity
5. Examine language policies in a particular country or area (of students choice), including goals, measures, implementation, monitoring and actual or probable outcomes
6. Analyze the sociolinguistic situation in a particular country or area (of students choice) by applying the key sociolinguistic concepts

General Competencies

Students will be able to: - describe and critically evaluate various types of interaction between the society and the language - evaluate the social context of the language use

Grading

Class effort, quality of essays and presentations, knowledge demonstrated in the oral exam are considered in the final grade.

Course Description

The course deals with the definition of culture from various perspectives, the notion of identity, ethnicity and medial cultural tradition. The focus is on the historical continuity of the Croatian culture in the atmosphere of regional cultures, its participation in the European cultural circles, and the preservation of cultural heritage in addition to the integration of foreign influences. The aim is to present the science of culture in relation to European discourses on culture, provide overview of the historical development of the Croatian culture as an expression of the culture of the region, and to consider important cultural circles in which the Croatian culture has participated, starting from the Mediterranean cultural circle, over the long-term influence of the Central European cultures, all the way to the Western influences with interruptions in the twentieth century.

Study Programmes

» Science Stream (Smjer) (*kro-dipl (4422): elective courses I, 2nd semester (science stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the Croatian culture in the present and the past in relation to its European roots and processes of integration with other cultures.
2. Define the concept of cultural identity and the ability to apply it to different forms of cultural expression.
3. Summarize the insights about the culture and introduce them to a wider audience.
4. Explain the integration of Croatian culture in the Mediterranean and Central European cultural flows.

General Competencies

Students will be able to identify and define the systems for evaluation of the expressive forms of Croatian culture and cultural contacts. They will be able to explain the features of the cultural tradition and European determinants of the Croatian culture. They will be taught how to define cultural concepts and methods and to apply the acquired knowledge in their consideration of Croatian cultural past and its European integration.

Week by Week Schedule

1. Historical overview of the development of culture in our area from the beginning before the arrival of the Slavs and the early Croatian culture built on the remains of antique period and Celtic cultures,
2. Middle Ages at the border between the Franks and Byzantium,
3. The role of Venice, northern Croatia,
4. Religious culture, the culture of cities, building styles and architecture,
5. Triliterate and trilingual cultural heritage,
6. The Mediterranean and later Central European culture in Croatia,
7. The influence of the Croatian culture in the Central and Western Europe
8. Development of the concept of Croatian identity
9. The relationship of identity and language,
10. Contacts in the new era,
11. Turks and Franciscans in Bosnia,
12. The contribution of religious orders to the development of culture,
13. The awakening of national consciousness in the Croatian culture of the 19th century,
14. Language and cultural complex in the twentieth century, modern and European integrations,
15. Culture of communism, contemporary culture.

Intuitions [Epistemology]

160857

Lecturer in Charge

Prof. dr.sc.
Zvonimir Čuljak

Course Description

The aim of this course is to inform the students with problems concerning intuitions as the source of epistemic justification and knowledge, and with their role in philosophical methodology. Explain the main epistemological stances on intuitions, and to analyze and evaluate the most important arguments within epistemological and metaphilosophical debate.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain fundamental epistemological concepts and theories concerning the problem of intuitions in contemporary analytic philosophy
2. Analyze the method of applying intuitions as the source of epistemic justification and knowledge
3. List and evaluate arguments in the rationalists and empiricists dispute
4. List and evaluate arguments in the traditionalists and experimentalists dispute
5. Explain the role of the experimental philosophy in the metaphilosophical context

Kajkavian Literary Heritage

57146

Lecturer in Charge

Prof. dr.sc.
Alojz Jembrih

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Class activity 20%, seminar assignment 30%, exam 50%.

Course Description

Introduce the students to: the beginnings and the development of the Kajkavian language from the earliest beginnings to the 19th century, with written texts in Kajkavian from the 16th century, printed Kajkavian works of the 16th - 19th century, with the commitment of individual members of the Jesuit, Pauline and Franciscan order to the creation of Kajkavian literary works, with the printing activity in Nedelišće, Varaždin and Zagreb, and other printing houses outside Croatia which produced Kajkavian printed books, with the Kajkavian epic poetry of the 18th and 19th century and Kajkavian literature for children of the 18th century.

Study Programmes

- » Science Stream (Smjer) (*elective courses 2, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*kro - dipl (130 96): elective courses 1 (teaching stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the socio-political context of the development of the Kajkavian language and literature over the centuries (16th - 19th),
2. Explain the value of the Kajkavian dialect as the primary literary and communicative medium in the time of regional fragmentation of the Croatian lands,
3. Present the general contribution of the Kajkavian literature and linguistics to the entire Croatian corpus from the 16th to the 19th century,
4. Indicate the characteristics of the Baroque and Enlightenment Kajkavian literature,
5. Analyze and critically formulate the attitude towards the contribution of the Croatian nobility of the time to the Kajkavian literature,
6. Compare the literary achievements with other regional literatures in Croatia in the period from the 16th until the 19th century

General Competencies

Students will gain knowledge about: shaping kaikavian language in the context of South Slavic languages, get familiar with Kaikavian literature from 16th - 19th century, get familiar with Latin script, which was written aforementioned literature, get familiar with kaikavian literary works in the context of classification on content and purpose, introduce handwritten kaikavian songbooks from 16 - 19 century, familiar Kaikavian literature of the Baroque and Enlightenment, with religious and secular content, familiar works kaikavian lexicography, familiar kaikavian grammar and spelling, familiar dialect kaikavian contemporary literary production of the 20th and 21st century. By writing seminar work students will learn about the original kaikavian works and acquire the ability to read and interpret it.

Week by Week Schedule

1. The foundation of the Zagreb Diocese
2. Geographical territory and the development of the Kaikavian tradition compared to other South Slavic languages
3. The traces of Kaikavian linguistic features in the Latin charters of the Hungarian kings in the 13th century
4. Kaikavian-linguistic interferences in the Glagolitic manuscript codices of the 15th century
5. Manuscript Kaikavian monuments of the first half of the 16th century.
6. First printed Kaikavian books in Nedelišće i Varaždin
7. Kaikavian literary works of Ivan Pergošić and Antuna Vramec
8. Kaikavian literary-linguistic activity of the Jesuits and Paulines in the 17th and 16th century
9. The Baroque and Enlightenment Kaikavian Literature
10. Manuscript Kaikavian songbooks of the 17th and 18th century
11. Kaikavian lexicography and its authors of the 17th and 18th century
12. Kaikavian literature for children in the 18th and 19th century
13. Homiletic Kaikavian literature in the period from the 16th until 19th century
14. Kaikavian epic poems of the 18th and 19th century
15. Contemporary literary Kaikavian dialectal literature of the 20th and 21st century

Latin Paleography and Epigraphy

86899

Lecturer in Charge

Prof. dr.sc.
Franjo Šanjek

Course Description

The aim of the course is to familiarize students with the basic features of cultural context of the Latin script, with special attention on Croatian ethnic and cultural area. During the year students will become familiar with the most important Latin script which were used in the Croatian region in the period from the Early Middle Ages to the advent of printing (Beneventan script, Carolingian minuscule, Gothic minuscule and Humanist minuscule). Also the students will become familiar with the Croatian epigraphic sources. By participating in lectures and study of archival materials and medieval manuscripts the students will acquire useful knowledge and be trained for their scholarly research.

Study Programmes

» Croatian Latinity (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important Croatian medieval sources written in Latin language
2. Describe the importance of the Latin script as a tool for detecting and defining Croatian cultural identity
3. Explain origin and development of particular variants of the Latin script
4. Apply acquired knowledge about the stages of development and characteristics of particular variants of the Latin script for dating of manuscripts
5. Analyze and transcribe manuscripts written in Beneventan script, Carolingian minuscule, Gothic script and Humanist minuscule
6. Prepare a critical edition of a hitherto unpublished medieval manuscripts
7. Analyze and interpret the epigraphic monuments

General Competencies

Interpret Latin epigraphic sources according to its content and from the point of view of philology.

Transcribe Latin manuscripts.

Prepare Latin manuscript for publishing.

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Vladimir Preselj, mag. comm.

Grading

Lecture attendance, literature reading and participation in discussions with the professor and the colleagues (25% of the final grade), seminar paper with presentation (25% of the final grade) and final exam (50% of the final grade).

Course Description

The aim of the course is to familiarize the students with the legal standards that regulate the profession of public relations and present the standards and codes of ethical action and communication in public relations, and encourage them to critically assess ethical dilemmas.

Study Programmes

- » Communication Sciences (Studij) (*public relations, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*public relations, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the implementation of legal regulations that concern the constitutionally guaranteed right of access to information and prepare the devising of communications policy based on transparent information provision and communication in public relations with the public
2. Apply legal regulations that concern the obligation of publicizing and informing in corporate communication
3. Explain intellectual property rights
4. Distinguish between legal and ethical prohibitions in covert public relations in terms of covert advertising
5. Apply the ethical principles of public relations and business ethics
6. Point out ethical dilemmas in public relations
7. Apply the principles of the code of ethics of public relations (CPRA)
8. Explain the model of excellence in public relations practice

General Competencies

Define, describe and evaluate the legal standards of public relations and the central problems;

Define, describe and evaluate the ethical standards of public relations and the central issues;

Apply, classify and distinguish professional terminology;

Expertly and professionally apply the acquired specialist theoretical and practical knowledge to working in public relations;

Successfully collaborate with different individuals and groups in discussions and finding answers to various theoretical and practical issues;

Week by Week Schedule

1. The right of access to information in Croatia and the European Union, guidelines for spokespersons in public authorities
2. The Capital Market Act, the Code of Corporate Governance, guidance for dealing with investors
3. Copyright and related rights, industrial property rights, guidelines for the protection and designing of PR-publications
4. Copyright and related rights, industrial property rights, guidelines for the protection and designing of PR-publications
5. Legal requirements concerning the content in provision of information and publications in public relations: obligation to provide accurate information, protection of secret, personal and business related, as well as state secret, personality rights, competition offense
6. Prohibition of covert PR activities in terms of covert advertising, legal and ethical guidelines
7. Prohibition of covert PR activities in terms of covert advertising - practical experience and examples from the media
8. Prohibition of election promotion of state bodies, guidelines for spokespersons and PR experts in political and public institutions
9. Personal ethics of PR professionals - loyalty to the employer / profession / society / themselves, ethical dilemmas
10. Ethics of public relations and crisis communication
11. Business ethics and the ethics of public relations
12. Codes of ethics: international, European and national
13. code of ethics of the Croatian Public Relations Association, interpretation, practice
14. The normative model of public relations and of excellence in public relations from an ethical point of view
15. Corporate Social Responsibility

Legal Bases and Pedagogical Documentation

53900

Lecturer in Charge

Doc. dr.sc.
Irena Klasnić

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Active participation, written exam (or two colloquiums).

Course Description

The objectives of the course Legal Bases and Pedagogical Documentation are: to introduce legal regulations in the field of education in elementary and secondary schools, to explain the origins and purpose of these regulations, to critically assess legislation in the field of education in elementary and secondary schools, to introduce e-Matica and e-Dnevnik.

Study Programmes

- » Psychology (Studij) (*elective (teaching module), 1st semester, 1st year*)
- » Psychology (Studij) (*elective (teaching module), 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name the basic regulations in the field of education in primary and secondary schools
2. Identify the importance of legal regulations for the realization of educational objectives and the principles of education in primary and secondary schools
3. Distinguish temporal and space organization of work in school
4. Interpret national educational standards
5. Plan adequate forms of work with students with special educational needs
6. Use pedagogical documentation and records, e-Matica and e-Dnevnik
7. Evaluate the work of students
8. Describe the school management system and the rights of students and parents
9. Explain the supervision of a school institution.

General Competencies

Upon the completion of the teacher education programme, the student is capable of:

Distinguishing between legal regulations, decisions, provisions...of the Republic of Croatia connected with the teaching profession

Use the said documents necessary for the teaching profession

Interpret based on the said documents the rights and obligations of the employees of educational institutions

Recommend the criteria for evaluation in the teaching process.

Lexicology and Lexicography of the Croatian Language

147174

Lecturer in Charge

Prof. dr.sc.
Branka Tafra

Course Description

The main objective of this course is to give the students a thorough description of general and Croatian lexis in one place and to process the majority of issues related to the notion of lexical units. By confronting different theories, students will be encouraged to independently consider universals through semantic relations between lexical units: which is one, and which is two (relation between polysemy and homonymy); what is the same and what is different (relation between synonymy and paronymy); what is a possibility, and what is realization (relationship between paradigmatic and syntagmatic). In addition to gaining theoretical knowledge and be given a historical overview of the development of the Croatian lexis, the students will, through interactive classes, enrich their vocabulary, be able to observe lexical errors in public communication, properly use lexical units and thereby develop the ability of naming concepts in Croatian words. During the semester, the students will be able to apply the knowledge acquired through classes and constant reading of lexicological works and deal with smaller assignments, and check what they have learned through lexicographic examples.

Study Programmes

» Croatology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply and master the lexicological and lexicographic terminology
2. Distinguish between linguistic units
3. Distinguish linguistic levels and understand the concept of a lexical unit
4. Identify and analyze interlexeme and intralexeme semantic relations
5. Analyze and observe universal relations and discuss abstract concepts
6. Apply theoretical knowledge on specific examples
7. Discover the world of science by cognition of language universals.

General Competencies

Master the lexical level and integrate the conversance of all language levels.

ECTS Credits 5.0

Literature and Culture of Croats in the Diaspora

126030

Lecturer in Charge

Izv. prof. dr.sc.
Sanja Vulić
Vranković

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Final exam - 100 %.

Course Description

Introduction to the Croatian language groups outside Croatia. Students will learn about Croatian idioms in Austria, Slovakia, Hungary, Rumania, Italia, Serbia, Montenegro and a sociolect of the Janjevci Croats in Bulgaria. After acquiring theoretical and analytical framework, students will locate these idioms in the frameworks of Croatian dialectology. Based on the example of certain idioms which have been disappearing, the phenomenon of the language death is being introduced.

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define certain Croatian language communities in the Diaspora.
2. Describe the location from which they emigrated and the time of emigration
3. Describe which Croatian variants, dialects and subdialects are spoken in the Diaspora
4. Analyze the phonology of certain language groups.
5. Analyze the morphological system of certain language groups.
6. Analyze the lexis of certain language groups
7. Interpret different language influences.

General Competencies

After the course is finished, students will be able to independently analyze dialect samples in the Diaspora, which contributes to their cognitive ability of better understanding of language situation in the Diaspora and the sociolinguistic aspect of language groups in the Diaspora.

Week by Week Schedule

1. Basic concepts: the Diaspora, autochthonous communities (migration, autonomous, emigration), basic groups
2. Idioms of Croats in Italia
3. Idioms and language in literary works of Croats in Austria

4. Idioms and language in literary works of Croats in Slovakia and Moravia.
5. Idioms of Croats in western Hungary
6. Language in literary works of Croats in western Hungary
7. Idioms of Pomurje-Croats and Podravina-Croats in Hungary
8. Language in literary works of Pomurje-Croats and Podravina-Croats in Hungary
9. Idiom of Hajmaš in Hungary
10. Idioms of the Slavonian dialect in Hungary and Vojvodina
11. Neo-Shtokavian idioms of Croats in Hungary and Vojvodina
12. Idioms of Croats in the Bay of Kotor
13. Idioms of the Janjevci Croats in Kosovo and Bulgaria
14. Idioms of Croats in Rumania
15. Croatian language on other continents

Literature and Culture of the Croats in the Diaspora

57134

Lecturer in Charge

Prof. dr.sc.
Alojz Jembrih

Course Description

Introduce the students to the literature and culture of Croats in the so called Old Diaspora – the European border countries in which the descendants of Croatian immigrants still live as national minorities: Austria, Hungary, Slovakia, Rumania, Serbia, Montenegro, Italia as well as immigrants in the USA, Canada, Chile, Australia, Argentina

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the reasons of Croatian emigration across the Europe from the 15th to the 17th century.
2. Recognize the cultural, literary and language factors according to which Croats in the Diaspora adapt to the culture and literature of their parent nation in the Republic of Croatia.
3. They will show the identification factors through culture, religion, literature and language of Croats in the Diaspora.
4. They will analyze the valuable positive attitude towards culture and literature of Croatian minorities in the domicile country.
5. They will show with their seminar paper and will gain the skill in finding primary and secondary literature on Croats in the Diaspora.

General Competencies

Introduce the students to the history of Croatian diaspora in Europe or the overseas countries. Introduce them to the reasons of Croatian emigration in the 15th, 16th and the 17th century. Show the cultural and national identity of Croatian minorities in the European border countries: Austria, Slovakia, Hungary, Italia, Rumania, Serbia, Montenegro. Introduce them to the reasons of the emigration to the overseas countries. Introduce them to the main factors which influenced the conservation of the Croatian culture and the Croatian language of Croats in the Diaspora.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

At the beginning of the semester the incoming students' competencies will be tested and they will receive the instructions about the possible lack of knowledge on the subject being thought. The examination of the subject and writing the seminar paper. At the end of the semester, the subject and the professor who teaches it will be evaluated. Professors will use the information for self-evaluation and possible reconstruction of teaching, work methods and student evaluation. The examination and writing the seminar paper.

Week by Week Schedule

1. The socio political context in Europe and the Croatian countries in the 15th and the 17th century.
2. The reasons of Croatian emigration from the Croatian countries in the 15th, 16th and the 17th century.
3. Southern and northern emigration direction of Croats in Europe
4. The Molise Croats: origins, culture and language
5. The Croatian nobility as an important factor in the Croatian emigration to: the western Kingdom of Hungary and Moravia
6. The life of Croats in the new environment of the Habsburg region in the 16th and the 17th century.
7. The attitude of the domicile population towards Croatian immigrants in the western Kingdom of Hungary
8. Croatian literary and language monument of Croats in the western Kingdom of Hungary in the 16th century.
9. The first book printed in Latin alphabet and intended for Croats in the western Kingdom of Hungary.
10. The literature of Croats in the western Kingdom in the 17th and the 18th century.
11. The guardians of the Croatian language and caretakers of literature of Croats in the western Kingdom of Hungary from the 17th to the 19th century.
12. Destiny of Croats in the western Kingdom of Hungary after the First World War.
13. Croats in other European border countries after that war.
14. Croats and their culture in the overseas countries.
15. Publicist and literary activity of Croats in the so called emigrational epoch.

Course Description

To introduce students to the development of a theoretical study of mass communication and journalism from modernism to the present, with movements, schools and theories that have been aroused and become the foundation of contemporary media theory as well as those to be used, according to experts, to establish mass communication and media activity in 21st century.

Study Programmes

» Communication Sciences (Studij) (*media, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce, itemize and explain processed theory.
2. Apply, use and be acquainted with technical terminology
3. Explain and understand the interdisciplinary nature of the communications and explain processed theories in the context of other science under whose influence emerged.
4. Analyze critically and explain processed theory, their significance for journalism and mass communication.
5. Argue and rationally defend your own attitude about analyzed theme.
6. Demonstrate the ability to understand and process of academic and non-academic texts and reproduce their basic meaning and content.
7. Reproduce and present with arguments critical essay on a book that you read.

General Competencies

Define, describe and explain the basic theory of mass communication and journalism incurred in the period under review. Apply, classify and distinguish professional terminology. Identify and provide reasoned interpretation of interdisciplinary nature of the study of mass communication and journalism, connecting the individual segments of their characteristics with the corresponding segments of the history and characteristics of the social sciences and humanities as well as various aspects of social development. In written and oral arguments clearly show and analyse complex academic and non-academic contents.

Week by Week Schedule

1. Introduction to the subject, modernism
2. Doctrine of Marshall McLuhan
3. Structuralism
4. Deconstructionism
5. Normative theory of the media
6. Theories of responsibility and integrity, the economic theory of media
7. Media monopoly and concentration of ownership
8. Concepts of public and commercial broadcasting
9. Futuristic media theory: post-industrial society
10. Emotional art - mosaic of culture
11. Technotronic society
12. Theory of the third wave
13. Information society
14. "Networked society"
15. Practical application of theoretical knowledge

Mass Communication: Cultural Aspects

63567

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

The aim of the course is to familiarize students with the role of the media in the culture of the society, with cultural values of media content and industry of culture as a phenomenon of contemporary consumption. It also aims to facilitate the adoption of terminology and theoretical and analytical framework for analyzing media writing or research in cultural phenomena and media.

Study Programmes

» Communication Sciences (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare different theoretical approaches and critical role of the media in culture
2. Differentiate terminology and methodological research practice of cultural aspects of mass communication.
3. Distinguish between different cultural media genres
4. Classify and explain various cultural trends and their impact on mass communication and media content
5. Identify 4 types of cultures in mass media.
6. Distinguish and monitor the cultural contents in different media.
7. Distinguish and interpret the relation between culture and politics in media presentation.
8. Define the terms associated to the popular culture, high culture, digital culture and traditional culture.

General Competencies

Apply, classify and distinguish the professional terminology related to the content of the study course; identify and interpret arguments for interdisciplinary nature of communicology, linking individual segments of the peculiarities of communicology, mass communications with various aspects of social development; consider and assess the legitimacy of various theoretical and practical suggestions, taking into account the specificities of the various areas of life and work environment; coordinate discussions and provide explanatory comments on a number of issues, primarily communicational nature, but of cultural nature as well.

Mass Communication: Political Aspects

57211

Lecturer in Charge

Doc. dr.sc.
Jelena Jurišić

Course Description

Mass communication has given character to human society since its beginning, and its forms have evolved in parallel with social and technological development and had impact on the character of political relations. The information society is characterized by a pronounced influence of the media on social life, and the emergence of new media is again changing the forms of communication and strongly influences the methods of politics.

The aim of the course is to enable students to gain insight into the latest developments in the political aspects of mass communication, and the role of communication in the political process. The course will contain an introduction to the structure of the political process, the history of political ideas and public phenomenon as a framework for communication and legitimacy based on political decisions. The course should enable students to acquire knowledge and adoption of appropriate methods of research.

Study Programmes

- » Communication Sciences (Studij) (*media, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*media, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, classify and distinguish between political communication and political aspects of mass communication;
2. Define, explain and be familiar with the relationship between politics and the media;
3. Explain and understand the development of mass communication, with an emphasis on the political aspects of mass communication;
4. Define, explain and recognize the role of media in a democracy;
5. Define, identify and use a variety of political approaches to media content;
6. Define and explain the use of political and democratic values in the work of the media.

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Lucia Vesnić Alujević, dr. sc.

Grading

A prerequisite for the successful completion of the course is regular and active participation. During the semester, students should submit a paper on a given topic, write an essay on the same topic, participate in two colloquia and show initiative during the discussion.

General Competencies

Define, describe and evaluate the political aspects of mass communication, the history of their development and the central problems;
 Apply, classify and differentiate professional terminology;
 Coordinate discussions and provide explanatory comments on a number of issues, primarily of communicational nature, but also of a political nature;
 Conceptually clearly present information and different political views and critically assess the credibility of statements, assumptions and arguments mediated through a variety of media;
 Identify and use arguments to interpret interdisciplinary nature of communications, linking parts of the history and characteristics of mass communication with the corresponding segments of the history and characteristics of the social sciences, particularly political science, and political aspects of social development.

Week by Week Schedule

1. The fundamental issues of politics: Plato, Aristotle, Cicero
2. Christianity and Politics: St. Augustine, Thomas Aquinas, Thomas Morus
3. Machiavelli and politics as the art of the possible
4. Early modern political concepts: Hobbes, Locke, Rousseau, Mill
5. Cognitive processes and policies: F. Hegel and Kant
6. Marxism and the fate of social visions
7. The structure of the political process
8. Politics as a vocation: M. Weber
9. Colloquium
10. Language and politics
11. New media, social networks and politics
12. Globalization and integration processes in the world
13. Journalists as political actors
14. Journalists as political actors
15. Colloquium

Mass Communication Research Methodology

57208

Lecturer in Charge

Doc. dr.sc.
Ivan Burić

Course Description

At the beginning of graduate studies, the task of this course is to show the different possibilities and methods of scientific research of media to facilitate the students to decide what subject to choose for their research as well as subject of the MA thesis. As preparation for independent and responsible scientific research in the field of media research, the course will introduce students (both in theoretical and practical terms) to methodological approaches to mass communication research in the fields of mass communications.

Study Programmes

» Communication Sciences (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the basics of scientific research.
2. Define and describe specificity of quantitative research methods.
3. Define and describe specificity of qualitative research methods.
4. Apply scientific research methods in the study of mass communication
5. Write a research design.
6. Analyze and interpret data collected by scientific research methods in field of mass communication

General Competencies

Apply, classify and distinguish the professional terminology in various fields of communications.

Identify, evaluate and use a variety of scientific research methods of social science, applied at communication studies.

Carry out scientific research in teamwork settings in the field of communications with the help of modern scientific research methods; writing papers in a clear and organized manner.

Interdisciplinary thinking and acknowledgement of various scientific methodologies and perspectives on specific issues and problems.

Demonstrate developed social skills, critical thinking and reasoning arguments.

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Three-fifths of grade is based on participation in discussions and work at seminars, and two-fifths on proceedings of a written and oral exam.

Week by Week Schedule

1. Purpose and aims of course. Basic concepts of research methods in social sciences, specificity of scientific research methods of mass communication.
2. Aims and purposes of scientific research. Definition of theory. Types of theories in science. Function of theory in research process.
3. Development of science, the concept of scientific paradigm, classification of research approaches in science.
4. Basic principles of positivism, principles of the hermeneutical tradition in social sciences, implications of positivism on quantitative research methods development, implications of hermeneutical traditions on qualitative research methods development. Basic characteristics of qualitative and quantitative research methods.
5. Seminar:
History of Mass Communication Research
6. Compose a research design, defining research objectives and hypotheses, conceptualization and operationalization.
7. Seminar:
Survey Research and Questionnaire
8. Sampling, function of sample in scientific research. Universe and sample. Types of sample: probabilistic and non-probabilistic sample, sample size
9. Seminar:
Content Analysis.
10. Basic principles of qualitative research methods, basic characteristics of interview, focus groups and observations.
11. Seminar:
Qualitative research process and data analysis.
Focus groups.
12. Seminar
Discourse Analysis.
Mixed research methods.
13. Seminar:
Case study.
14. Seminar:
Qualitative and quantitative research methods in journalism.
Ethnographical research method in journalism.
15. How to structure a research report, how to present research results?

Mass Communication: Sociological Aspects

64752

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The main objective of this course is to expand knowledge about the sociological aspects of mass communication.

The specific objective of the course is to deepen students' knowledge on Media activities and their impact on society. Analysis of specific issues that relate to culture, society and communication. Special reference to the sociology of culture and the four major theoretical and philosophical traditions in the study of communication and culture:

positivist functionalism, critical analysis of democracy, cultural studies and popular culture.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*mass communication research, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare sociological terms connected with media culture
2. Explain issues of relationship between culture, society and communication
3. Argue importance of familiarity with four major theoretical and philosophical traditions: positivist functionalism, critical analysis democracy, cultural studies and popular culture;
4. Describe and explain problems of cultural policy of mass media and problems of mass media and national development
5. Analyze and interpret issues related to the mass media and globalisation, with critical examination of mass communication
6. Produce a competent analysis of communication models from sociological aspects

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

10% attendance, 20% participation in discussions, 30% writing a student paper and presentation, 40% student papers, written papers

General Competencies

Define, describe and evaluate disciplines of sociological aspects of mass communication;

Apply, classify and distinguish the professional terminology;

Identify and interpret interdisciplinary nature of communicology, linking individual segments of the history and characteristics of the communications with the corresponding segments of the history and characteristics of the social sciences and humanities and different aspects of social development;

Analyze clearly and supported with relevant argument the complex academic and non-academic contents in written and oral form.

Week by Week Schedule

1. Introductory course: introduction to the subject course, review of the literature and explanation of student's obligations.
2. Subject and methods of sociology of mass communications.
3. Stages of empirical research and theoretical regard of social communication.
4. Researches in communicology.
5. Models of social communications, typology and development of the model.
6. Relationships between the communicators and recipients.
7. Media organizations.
8. New media in mass culture.
9. Origins of sociology of mass communications.
10. Society and mass culture in American sociology.
11. Dialectic sociology of Frankfurt School.
12. Media content.
13. Sociology of mass media and public.
14. Effects of mass media on media users.
15. Structures, functions and styles of mass culture. Conclusions.

Master Thesis

118526

Course Description

Master thesis is integral, thorough and highly independent requirement by which student finishes his studies. Student has to demonstrate his ability in analyzing required research topic or problem in theoretical and practical sense and as researcher in the field or branch in which the scholarly programme is constituted. The aims of this course are: to learn students how to demonstrate his knowledge in researched topic, to show his ability to conduct an independent research, to apply his knowledge learned from secondary literature in scholarly and academic research, and to apply adequate methodology in his research.

Study Programmes

» Croatian Latinity (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze, gather and critically approach to scholarly literature
2. Choose master thesis
3. Write syllabus of his thesis
4. Plan the course of his scholarly research in default given framework
5. Define research problems, hypotheses and methods by which student will acquire relevant results
6. Write master thesis in extent of 9000 to 10000 words (50-60 pages)

General Competencies

Apply, classify and distinguish adequate scholarly terminology in the the field or branch in which the scholarly programme is constituted.

Identify, evaluate and use various scholarly methodologies of humanistic or social sciences, which are used in the the field or branch in which the scholarly programme is constituted.

Independently conduct researches in the the field or branch in which the scholarly programme is constituted by using adequate methods and to write scholarly thesis in clear and organized way.

Cogitate interdisciplinary and to appreciate various scientific methods and approaches to specific topics and questions in researched social and humanistic field.

Write master thesis in Croatian or one of world languages regarding scientific and ethical requirements and to defend it before three-part committee.

Week by Week Schedule

1. Discussion about topic and accepting the thesis, assuming the requirements.
2. Writing master thesis.
3. Writing master thesis.
4. Writing master thesis.
5. Writing master thesis.

ECTS Credits 20.0

Media and Bioethics

64815

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The aim of this course is to offer the students an overview of the entire historical development and content of bioethical science, with an emphasis on the role of mediation of mass media in the conveying and shaping of public opinion regarding the most important bioethical issues.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize in an event or news typical content for bioethics
2. Demonstrate a critical attitude towards the event or news (distinguishing concepts, ideological lines and legal and ethical implications associated with that event or news);
3. Write or interpret the news according to one's own (bio) ethical viewpoint, applying the ethical minimum of good journalistic practice, in relation to the issues that relate to the personal and civil rights
4. Identify wrong ideological interpretations of events that concern bioethics
5. Argue the basic tenets of the most current bioethical topics
6. Gain the skills of preparation PR communications of bioethical themes
7. Learn to prepare analytical matrix for the analysis of media content of the bioethical themes

General Competencies

Define, describe and evaluate bioethics, its specific characteristics.

Apply, classify and distinguish professional terminology.

Identify, distinguish, evaluate and critically assess media effects and their impact on media audience and the society as a whole.

Rationally and in a well-argued manner defend one's own professional attitudes and insights.

In written and oral form clearly present and analyze complex academic and non-academic content.

ECTS Credits 5.0

Media and National Security

57242

Lecturer in Charge

Doc. dr.sc.
Anita Perešin

Course Description

Introducing the students to the fundamentals of national and international security and present the national security system of the Republic of Croatia. Present the importance, power and influence of the media in regard to the contemporary social changes, particularly in the area of security, and the role of the media, on the one hand, in the cooperation with the state apparatus in the fight against violence, and on the other, in the fight for the transparency of the security sector operations through the fight for the right of access to information and undertaking action to protect human rights in the circumstances where the security sector gains increased authority due to the emergence of new forms of violence and global terrorism.

Study Programmes

» Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Understand the way security sector operates
2. Understand the role of the media in the protection of national security
3. Recognize different models of media manipulation with the aim of provoke crisis situations
4. Differentiate the basis of having right to information and state obligation to protects classified information related to national security
5. Recognize models of human rights violations under the interests of national security protection

General Competencies

- to apply the knowledge on media tools covering political and security tasks.
- to understand the scope and responsibilities of national security sector bodies;
- to understand and be able to analyze the media's role in crisis situation that could have a negative impact on national security;
- to recognize different models of media manipulation with the aim of causing threats and crisis;
- to be able to recognize different methods of media manipulation and publishing of articles that could cause reaction able to jeopardize national security;
- to be able to recognize models of human rights violations under the interests of national security protection.

Media Effectiveness

57210

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

The aim of the course is to familiarize the students with the long history of the idea of the media influence, as well as with the theoretical perspectives of the scientific research on the impact of the media. Furthermore, to contribute to fundamental knowledge on the effects of the media on the society and individuals through analysis of theoretical approaches and schools, as well as insight into the underlying trends and theories.

Study Programmes

» Communication Sciences (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use key scientific terminology for the study of the influence of the media.
2. Explain the complexity of the phenomenon of media influence.
3. Identify key patterns of media activity and media content.
4. Use the principles of methodological approach in empirical research of the impact of the media.
5. Explain the historical development of the empirical research of media effects.
6. Identify a power of different media contents and the power of possible impact to the individual as well as to the sociate.
7. Identify and explain concepts like media agenda, spiral of silence, frame.
8. Use the key scientific terminology in the theory of medi effect.

General Competencies

Apply, classify and distinguish the professional terminology in various fields of communicology; Identify, distinguish, evaluate and critically assess media effects and their impact on the media audiences and society as a whole; Identify, evaluate and use a variety of scientific-research methods in the social sciences, which are applied in the field of communicology; Conceptually clearly present different information and perspectives, and critically assess the credibility of statements, assumptions and arguments mediated through a variety of media.

Media in Education

61961

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The course objective is to provide future teachers with an insight into scientific knowledge of the relation between children/the youth and the media, and demonstrate in a practical way how to teach using mass media in an educational setting.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the relation between children/the youth and the media.
2. Interpret the influence of the media on children and the youth.
3. Evaluate the importance of media literacy and media competence.
4. Assess the importance of media education within the educational process and of developing an awareness of the need for media education.
5. Recognize the functions of media in teaching,
6. Interpret the basics of journalism in order to be able to use media on a reflective and productive level.
7. Plan to use mass media as teaching aid in both class and extracurricular activities.
8. Apply theoretical principles in working with students.

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Ivan Uldrijan, dipl.nov.

Grading

In all the stages that the students go through as part of this course, their knowledge is tested successively and according to the level of their competence. In the first stage, their motivation for the course is tested as well as previous knowledge and any concerns and questions that they have are discussed with the professor and other students. In the second stage, the students choose a certain research subject in the field of media and didactics that they research and present to the other students with a Power Point presentation, encouraging discussion with the other students on the subject. In the third stage, the students' systematic knowledge of the course content is tested with the final exam on the obligatory literature.

General Competencies

The students will be able to:

Interpret the fundamentals of media pedagogy, media didactics and the concrete use of media in teaching.

Plan the teaching process using mass media as a teaching aid and tool.

Organize the process of setting and achieving the objectives of using media in teaching.

Plan the performance of teaching with the use of mass media.

Create extracurricular activities related to the use of mass media (school journalists' section etc.)

Forms of Teaching

» Predavanja

» Seminar

Week by Week Schedule

1. Forms of media in teaching, educating a media pedagogue (the necessary competences and envisaged goals).
2. The role of media, media literacy and media education in the life of today's children and the youth.
3. Media education – from concepts to school practice.
4. Children and the media: from myths to empirical discoveries (the role of the media in the everyday life and development of children).
5. Youth and the media: from minors as a problem to the problem of the minors.
6. The use of media in teaching – media didactics.
7. From an event to news – the basics of journalism and possibilities of implementing it in teaching.
8. Continuous assessment exam
9. Teaching with audio and visual media (from radio to photography).
10. Teaching with audio-visual media (from film and video to television).
11. Teaching with television – critical viewers and education.
12. New media in education – from computers to the internet and e-learning.
13. Internet and education.
14. Teaching with newspapers: newspapers as a didactic aid, newspapers for children and the youth and school newspapers in didactics, newspapers in various school courses.
15. Continuous assessment exam

Media Management

57209

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

Introduce the students to the methods, principles and characteristics of media operations, laws and legal regulations which govern the economic activity of the mass media, as well as the market rules underlying their functioning. In lectures and seminars the students will learn of the conditions in which the media operate, the methods and characteristics of their operations, the issues which they face in this regard and their impact on the media and journalists.

Study Programmes

» Communication Sciences (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain media management;
2. List and explain the trends of media management in the world;
3. Describe and use methods of business management of various media;
4. List, describe and be familiar with the trends of media management in Croatia;
5. List, define and explain the consequences of bad media management;
6. Define and explain the media monopoly and its consequences;
7. Explain and apply the legal regulations concerning media operations in the EU and Croatia;

General Competencies

Define, describe and evaluate media management and its central issues; apply, classify and distinguish professional terminology; recognize and produce a well-argued interpretation of the interdisciplinary nature of communication, linking the specific aspects of the media management risk with the specific characteristics of the social sciences, especially economics and economic aspects of social development; professionally and expertly apply the acquired specialized theoretical and practical knowledge in practical work;

Week by Week Schedule

1. Public media and the market;
2. Information market - concept, aspects, legal framework, structure,

Media Pedagogy

57234

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The course objective is to provide future teachers with scientific insights into and new scientific and critical ideas and discussions on media pedagogy and assist them in acquiring and adopting foundations for a media education from the view point of communications sciences so that the teachers are able to help their students in making critical decisions when it comes to traditional and new media (print, radio, film, television, video, internet) and apply them in their classes.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate the state of the media
2. Interpret the way of functioning and significance of the media,
3. Interpret the ways in which media influence children and the youth,
4. Analyze the significance of media literacy and pedagogy;
5. Use the media functionally and in a meaningful way,
6. Assess the educational content of various media (film, television, video, internet and others);
7. Assess the content of various media (film, television, video, internet and others);
8. Assess the content of various media (film, television, video, internet and others);
9. Argue why is it important to implement new media and new media technology in classes and extracurricular activities,

ECTS Credits 3.0

English Level L2

E-learning Level L1

Study Hours
Lectures 30

Lecturer
Lana Ciboci

Grading

The knowledge of the students is monitored systematically and in stages via discussions at the lectures and the continuous assessment exams, as part of the researches of the course and the final exam. This way, three cognitive phases are covered: familiarisation with and awareness of relevant contents (new knowledge and discussions at lectures), research and learning (finding a subject and preparation for the continuous assessment exams), and the final exam (taking the exam in accordance with the obligatory literature and the lectures), psychology and correlation exercises in the teaching methodology course.

General Competencies

After passing the "Media Pedagogy" course within the teacher education study, the students will be able to:

Interpret media content correctly,

Analyse various types of media content from a pedagogical, didactic, methodological and communicological standpoint,

Correctly interpret basic concepts of media pedagogy,

Scientifically assess various impostations of media pedagogy in various surroundings,

Present an awareness of the need for media pedagogy in the contemporary educational process.

Week by Week Schedule

1. Introductory lecture, interpretation of the objective and contents of the course and media pedagogy;
2. Theory of the media and information technology;
3. Social significance of media;
4. Theory of the media and information technology;
5. Social significance of media;
6. Media aesthetic, ethics and law;
7. Media and transformation of the students' experience;
8. Educational possibilities of mass communication;
9. Media and information technology in education and teaching;
10. Training for a critical reception of the contents of mass communication;
11. Educational value of the internet and the new media;
12. Educational possibilities of mass communication;
13. Media and information technology in education and teaching;
14. Mass media and their future role in education;
15. Media and information technology in education and teaching.

Media Training

57249

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

The aim of this course is to give students the basic knowledge and skills in verbal and nonverbal communication, familiarize them with the rules of the culture of reading and speech and provide encouragement for public appearances in the media.

Study Programmes

» Communication Sciences (Studij) (*public relations: specialist working group 3., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Self-critically assess their own oratorical skills and abilities
2. Evaluate and distinguish oratorical shortcomings and competences of their colleagues
3. Apply the new acquired knowledge from rhetoric to speech and posture
4. Show greater confidence in the public media appearance
5. Prepare and create public appearance
6. Demonstrate the ability to manage performance anxiety
7. Assess the overall value of quality public speech and public appearance
8. Assess the reasons for communication restrictions
9. Apply the skills and principles of interpretative reading

General Competencies

Apply, classify and differentiate professional terminology.
Expertly and professionally apply the acquired theoretical and practical knowledge in order to work in public relations.
Apply the skills of oral and written communication and presentation skills.

Week by Week Schedule

1. What is speech? Private and public speaking. Writing. Text. Language.
2. Fear of speech, logophobia; logophilia.
3. Acting, public speaking and stage fright.
4. Spoken genres (types of speech). Shaping methods and tools.

Metaphysics 2

53880

Lecturer in Charge

Prof. dr.sc.
Filip Grgić

Course Description

(1) To provide students with insight into some advanced topics in metaphysics, especially regarding the freedom of the will, determinism, causality and the laws of nature; (2) to teach them how to independently analyze metaphysical theories and how to set forth arguments and counterarguments; (3) to acquaint them with disputes over the appropriate method of metaphysical research, as well with the relationship between metaphysics and science; (4) to advance their understanding and usage of methods of philosophical research, including (a) methods founded on human intuitions, (b) methods founded on scientific results, and (c) methods founded on the critical analysis of texts.

Study Programmes

» Philosophy (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define some crucial concepts like determinism, indeterminism, compatibilism, incompatibilism, freedom of the will, causality, law of nature etc.
2. Demonstrate relevant theories (e.g. compatibilism, libertarianism, determinism, possibilism, impossibilism etc.)
3. Recognize advantages and shortcomings of particular theories
4. Develop their own arguments and counterarguments both within and outside existing theories
5. Apply competences from other areas primarily from logics, philosophy of mind and ethics to metaphysical problems and vice versa

General Competencies

Students will be able to: (1) understand the deeper connections between some basic metaphysical problems and problems of other philosophical disciplines, primarily of ethics, philosophy of mind and logics; (2) apply certain results of metaphysical considerations to other philosophical disciplines; (3) connect various topics from the history of philosophy with contemporary considerations; (4) develop critical thinking and the ability to summarize and explain difficult concepts and ideas.

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30

Grading

1. two short written assignments during the semester (both to be announced a week ahead) = 40% of the final grade; 2. a longer written assignment (min. 3000 words, i.e. around ten double-spaced pages); instructions and topics will be distributed during the first two weeks = 60% of the final grade. In order to pass the exam one needs to have at least 60% of the total grade. Grades will be formed as follows: 60-70 % = 2; 70-80 % = 3; 80-90 % = 4; 90-100 % = 5.

Week by Week Schedule

1. Introduction
2. Fatalism 1: Aristotle, De interpretatione 9 and Diodorus Cronus
3. Fatalism 2: Lazy argument by Richard Taylor, theological fatalism
4. Determinism and indeterminism: defining the concepts
5. Arguments for incompatibilism: consequence argument and criticism thereof
6. Libertarianism 1: agent-libertarianism
7. Libertarianism 2: event-libertarianism
8. Test
9. Hard determinism
10. Compatibilism 1: Conditional analysis
11. Compatibilism 2: The principle of alternate possibilities
12. Compatibilism 3: Strawson
13. Test
14. Freedom of the will and contemporary science
15. Closing discussion

Methods of Teaching Croatian

57254

Lecturer in Charge

Izv. prof. dr.sc.
Mario Grčević

Course Description

The course objective is to acquaint students with teaching as a highly complex system of mediating knowledge and skills on three levels of teaching methodology: a) the level of teaching methodology that mediates the general theory of teaching, i.e. generally valid principles and procedures applied within various subjects and teaching situations as well as complex teacher-student-teaching environment communication relationships; b) subject specific methodology as a narrower specification of teaching procedures characteristic for a specific field or fields (e.g. humanities, social sciences), c) subject specific methodology fully concentrated on specific content and objectives of individual subjects/courses and adequate teaching procedures.

Study Programmes

» Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify individual propositions of the theory of teaching;
2. Describe relevant elements of planning the teaching process;
3. Classify teaching forms, methods and aids;
4. Demonstrate direct planning of lessons;
5. Analyze the National curriculum framework
6. Choose teaching methods, forms, and aids with the student, objectives and learning outcomes in mind;
7. Differentiate the ways of organizing practice and repetition;
8. Define positive classroom atmosphere, good class management, and productive ways of establishing classroom discipline;
9. Identify the ways of evaluating and marking students.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Lecturer
Anela Mateljak Popić, dr. sc.

Grading

Students are monitored for their active participation in the course, critical thinking, and making enquiries about some topics. Students show the level of comprehension of theoretical bases by carrying out a teaching unit and critically analysing the teaching of their colleagues. The adoption of necessary knowledge and skills is evaluated also through compiling written lesson plans and a part of the operational teaching plan. The knowledge acquired during this course is additionally evaluated and improved during the Practical Training in Subject Specific Teaching Methodology courses and the Correlation Practicum in the Methodology of Teaching.

General Competencies

Teaching methodology mediated on all three levels contributes to a complete education of future teachers in relation to the ability of organizing, carrying out and evaluating the teaching activity by enabling students to:

- Describe theoretical postulates of subject specific teaching;
- Distinguish between various didactic, pedagogical and psychological theories;
- Compare different theories and postulates;
- Indicate individual premises of the theory of teaching;
- Identify the most important elements of planning the teaching process.

Week by Week Schedule

1. The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.
2. Defining the three levels of teaching methodology (general teaching, field specific and subject specific) i.e. the associated objectives, tasks, and content. Determining the importance of Teaching Methodology in the educational process.
3. Critical review of the proposed National curriculum framework for pre-school education and general compulsory and secondary education. Defining the notions of national and school curriculum, analysing the values, objectives, and principles set forth in the national curriculum framework. Special emphasis is put on the teaching topics on the borderline between subjects and on new subjects foreseen by the National curriculum, as well as on analysing the outcomes/achievements in the fields of social sciences and humanities.
4. Overview of basic school documentation that students will as future teachers deal with in schools. Special attention is paid to the operational teaching plan (school curriculum) as the basic document concerning teaching methodology. Analysing written preparation for teaching one unit.
5. Defining teaching methods, teaching forms, and teaching tools. Discussing various teaching methods classification criteria and overviewing basic teaching forms (frontal teaching, individual work, group work, pair work), as well as contemporary teaching tools. Analysing advantages and disadvantages of the discussed teaching methods, forms, and tools.
6. An overview of the lesson structure and methodological rules of structuring and carrying out lessons. Stressing the importance of planning. Indicating the basic steps of planning and the ways to compile written lesson plans.
7. Defining the notion of class management: what it represents, why it is important, and what the styles of class organization and management are. Pointing to the necessity of establishing positive classroom atmosphere to serve as the motivation for better performance of students. Analysing student disobedience and the lack of interest in school or a subject. Pedagogical means of establishing class discipline.
8. Point out the importance of practicing and repetition in teaching, and indicate the styles and ways of practicing with special emphasis on homework. Warn about standard and non-standard ways of evaluating students' achievements, with a review of the Secondary-School Final Exam (cro. Državna matura) and of how students are prepared for it.
9. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
10. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
11. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.

12. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
13. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
14. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
15. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.

Forms of Teaching

» Predavanja

- » The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.

Week by Week Schedule

1. Define course objectives and learning outcomes as well as student obligations.
2. Defining teaching methodology, its interests, objectives, and tasks. Determining the importance of Teaching Methodology in the educational process.
3. Critical review of the National curriculum framework for pre-school education and general compulsory and secondary education. Defining the notions of national and school curriculum, analysing the values, objectives, and principles set forth in the national curriculum framework. Special emphasis is put on the teaching topics on the borderline between subjects and on new subjects foreseen by the National curriculum, as well as on analysing the outcomes/achievements in the fields of social sciences and humanities.
4. Overview of basic school documentation that students will as future teachers deal with in schools. Special attention is paid to the operational teaching plan (school curriculum) as the basic document concerning teaching methodology. Analysing written preparation for teaching one unit.
5. Defining teaching methods, teaching forms, and teaching tools.
6. Discussing various teaching methods classification criteria.
7. Overviewing basic teaching forms (frontal teaching, individual work, group work, pair work).
8. Overviewing contemporary teaching tools. Analysing advantages and disadvantages of the discussed teaching methods, forms, and tools.
9. Audio-visual media (as communication tools, as socialization factors, as teaching and educational tools).
10. Artistic creativity in the teaching process: visual art (drawing in the classroom, the student's creative contribution, student and visual-art materials, visual-art creativity as a communication instrument, drawing as an alternative to the receptive way of learning, the supporting drawings, visual-art masterpieces in the teaching process).

11. Caricature in teaching (its content and functioning logic, caricature in the service of change); photographs, transparencies, and comic books in the classroom.
12. Drama art creativity and stage performances in the classroom: music, dance, role-play, meditation.
13. An overview of the lesson structure and methodological rules of structuring and carrying out lessons. Stressing the importance of planning. Indicating the basic steps of planning and the ways to compile written lesson plans.
14. Defining the notion of class management: what it represents, why it is important, and what the styles of class organization and management are. Pointing to the necessity of establishing positive classroom atmosphere to serve as the motivation for better performance of students. Analysing student disobedience and the lack of interest in school or a subject. Pedagogical means of establishing class discipline.
15. Point out the importance of practicing and repetition in teaching, and indicate the styles and ways of practicing with special emphasis on homework. Warn about standard and non-standard ways of evaluating students' achievements, with a review of the Secondary-School Final Exam (cro. Državna matura) and of how students are prepared for it.

Jerčić

Course Description

The course objective is to acquaint students with teaching as a highly complex system of mediating knowledge and skills on three levels of teaching methodology: a) the level of teaching methodology that mediates the general theory of teaching, i.e. generally valid principles and procedures applied within various subjects and teaching situations as well as complex teacher-student-teaching environment communication relationships; b) subject specific methodology as a narrower specification of teaching procedures characteristic for a specific field or fields (e.g. humanities, social sciences), c) subject specific methodology fully concentrated on specific content and objectives of individual subjects/courses and adequate teaching procedures.

Study Programmes

» Teaching stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify individual propositions of the theory of teaching;
2. Describe relevant elements of planning the teaching process;
3. Classify teaching forms, methods and aids;
4. Demonstrate direct planning of lessons;
5. Analyze the National curriculum framework
6. Choose teaching methods, forms, and aids with the student, objectives and learning outcomes in mind;
7. Differentiate the ways of organizing practice and repetition;
8. Define positive classroom atmosphere, good class management, and productive ways of establishing classroom discipline;
9. Identify the ways of evaluating and marking students.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Grading

Students are monitored for their active participation in the course, critical thinking, and making enquiries about some topics. Students show the level of comprehension of theoretical bases by carrying out a teaching unit and critically analysing the teaching of their colleagues. The adoption of necessary knowledge and skills is evaluated also through compiling written lesson plans and a part of the operational teaching plan. The knowledge acquired during this course is additionally evaluated and improved during the Practical Training in Subject Specific Teaching Methodology courses and the Correlation Practicum in the Methodology of Teaching.

General Competencies

Teaching methodology mediated on all three levels contributes to a complete education of future teachers in relation to the ability of organizing, carrying out and evaluating the teaching activity by enabling students to:

- Describe theoretical postulates of subject specific teaching;
- Distinguish between various didactic, pedagogical and psychological theories;
- Compare different theories and postulates;
- Indicate individual premises of the theory of teaching;
- Identify the most important elements of planning the teaching process.

Week by Week Schedule

1. The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.
2. Defining the three levels of teaching methodology (general teaching, field specific and subject specific) i.e. the associated objectives, tasks, and content. Determining the importance of Teaching Methodology in the educational process.
3. Critical review of the proposed National curriculum framework for pre-school education and general compulsory and secondary education. Defining the notions of national and school curriculum, analysing the values, objectives, and principles set forth in the national curriculum framework. Special emphasis is put on the teaching topics on the borderline between subjects and on new subjects foreseen by the National curriculum, as well as on analysing the outcomes/achievements in the fields of social sciences and humanities.
4. Overview of basic school documentation that students will as future teachers deal with in schools. Special attention is paid to the operational teaching plan (school curriculum) as the basic document concerning teaching methodology. Analysing written preparation for teaching one unit.
5. Defining teaching methods, teaching forms, and teaching tools. Discussing various teaching methods classification criteria and overviewing basic teaching forms (frontal teaching, individual work, group work, pair work), as well as contemporary teaching tools. ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours
Seminar 30

Grading

The class attendance is obligatory as well as class activity. They will have written assignments. The exam is oral.

Course Description

The course objective is to explain and describe the most important segments of modern and contemporary history of BiH and to introduce them the latest historiographic works on course subject.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define historical processes typical for modernization processes of BiH
2. List literature on BiH topic during Ottoman times, Austro-Hungarian Monarchy and Kingdom of Yugoslavia
3. Describe the most important processes and happenings in BiH
4. Explain cause and effect relations between processes and happenings in BiH
5. Analyze processes and happenings in BiH based on acquired knowledge
6. Identify basic problems of socio-political relations within BiH

General Competencies

After finishing the programme student will be able to:
list the most important literature of the historical period;
define historical processes typical for certain historical period;
describe historical processes;
explain cause and effect relations of historical events and processes;
defend his/her own opinion in discussions on different historical events and processes;
appraise the value of historiographic interpretations.

Week by Week Schedule

1. Time of Tanzimat and the beginning of modernization of B&H

2. The End of the Ottoman Empire and late attempt to create a nation
3. The Congress of Berlin and occupation of B&H
4. Austro-Hungarian Monarchy towards East: the B&H case
5. B&H and the making of Yugoslavian state
6. WWI, Kingdom of SHS/Yugoslavia and B&H
7. WW2 in B&H and the making of modern statehood on 'ZAVNOBiH' meeting
8. B&H as Republic in afterwar period
9. Political developments in B&H and acknowledgement of Muslims as nation
10. 'Croatian Spring' and its reflection on B&H
11. 1974 Constitution and building of state in B&H
12. The crisis and the fall of socialism in B&H
13. The democratic elections and toward independence
14. War in B&H
15. Peace of Dayton and afterwar B&H

Tihomir Vukelja

Course Description

The objective of the course is to encourage students to ponder about philosophical problems of quantum mechanics. The course offers an overview of the most important interpretations of quantum mechanics and helps students in shaping their own attitude toward the nature of contemporary physics.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. To outline and critically analyse the fundamental problems of philosophy of physics
2. To outline and critically analyse the main views on physical theories
3. To outline and critically analyse the main views on physical experiments
4. To outline and critically analyse the philosophical implications of classical physics
5. To outline and critically analyse the main interpretations of quantum mechanics
6. To outline and critically analyse the philosophical implications of quantum physics

Screening of student's work

- 1 ECTS Pohadanje nastave [EN]
- 1 ECTS Seminarski rad [EN]
- 3 ECTS Usmeni ispit [EN]
- 5 ECTS

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Grading

The exam is oral, at the end of the course. A student is evaluated on the basis of the knowledge demonstrated at the lecture and seminar discussions, knowledge demonstrated at the exam, and on the basis of the seminar paper grade.

Forms of Teaching

- » Predavanja
 - » Lecturea and discussions
- » Seminar
 - » discussions on specific topics and seminar papers

Week by Week Schedule

1. Introduction: the origin of quantum mechanics and the need for an interpretation. The problem of the nature of 'quanton'– theoretical and experimental aspects of the superposed quantum states and the uncertainty relations: neutron interferometry, the welcher Weg experiments.
2. The quantization of the electromagnetic field and photons: semi-classical theories, Hanbury-Brown and Twiss experiment, one-photon interference, the delayed-choice experiment and the wholeness of quantum phenomena. Stationary states and quantum beats.
3. Discussion of the presented experiments. Experiential level: quantum mechanics and technology. Theoretical level: pure states and mixtures. Interpretative level.
4. Quantum-mechanical realism. Probability in quantum mechanics. Epistemic interpretation, ensembles and propensities.
5. Niels Bohr and the Copenhagen interpretation.
6. Bohm's mechanics and hidden variables.
7. Einstein and statistical interpretation. Quantum logics.
8. Quantum mechanics and classical physics: discussion between Einstein and Bohr on the nature of the theory, the problem of classical limit of quantum mechanics.
9. The problem of time in quantum mechanics: experiments with time interference of neutrons and atoms, decay of unstable state, Franson's experiment and time uncertainty, the time-energy uncertainty relation.
10. The superpositions of macroscopically distinguishable states and the measurement problem in quantum mechanics: von Neumann's description of the measurement – conditions and consequences, Schrödinger's cat paradox, search for the macroscopic superpositions.
11. Solution of the measurement problem based on the alternative quantum mechanical dynamics: dual dynamics – reduction of the wave packet, matter and mind; unique dynamics – stochastic interpretations in general, programmes of the nonlinear stochastic modification of Schrödinger's equation.
12. Solution of the measurement problem based on the alternative interpretation of experience; decoherence by environment, many worlds and many minds. Modal interpretations and decoherent histories.
13. EPR dilemma, Bell's inequality and experiments.
14. GHZ theorem. Quantum nonlocality and relativity theory. Nonseparability of the quantum phenomenon.
15. Discussion.

Moral Enhancement (Ethics)

117139

Lecturer in Charge

Izv. prof. dr.sc.
Tomislav
Bračanović

Course Description

The objective of the course is to introduce students into philosophical and scientific debate about the morality of various kinds of human enhancement: physical enhancement, cognitive enhancement, mood enhancement, life span extension, and moral enhancement. Through the introductory lecture and especially through student seminar presentations on selected texts, it will be considered which are the most common argument for various forms of human enhancement, which are the standard criticisms of those arguments (especially from the so-called bioconservative perspective), and which are the basic concepts and directions of the wide debate developed in the course of this exchange of opinions.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reconstruct the basic argumentation for the claim that humans should be enhanced
2. Explain the basic moral concepts featuring in this proposal
3. Illustrate potential kinds and methods of human enhancement and their current difficulties
4. Compare the idea of moral enhancement with the ideas of physical and cognitive enhancement
5. Analyze and rationally argue either for or against the proposal of human enhancement.

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30

Grading

On the basis of (a) regular attendance and active participation in discussions, (b) oral presentation grade and (c) grades of two tests.

General Competencies

After completing the course, students will be able to: (1) indicate the relevance of human enhancement debate for various aspects of human life (e.g. politics, economics, education, sports); (2) interpret how different theories of human nature differ in their moral, social and political implications; (3) explain how development of contemporary science and technology changes traditional ethical debates.

Screening of student's work

1 ECTS Pohađanje nastave [EN]

2 ECTS Kolokviji [EN]

1 ECTS Referat [EN]

4 ECTS

Forms of Teaching

- » Predavanja
 - » 2 hours (introductory lecture)
- » Seminar
 - » 2 hours weekly

Week by Week Schedule

1. Introductory lecture
2. Seminar presentation: Michael Sandel (2009), "The case against perfection: What's wrong with designer children, bionic athletes, and genetic engineering"
3. Seminar presentation: John Harris (2007), Enhancing Evolution: The Ethical Case for Making Better People (chapters: "Has humankind a future?" and "Enhancement is a moral duty")
4. Seminar presentation: Julian Savulescu, Bennett Foddy and Megan Clayton (2004), "Why we should allow performance enhancing drugs in sport" & Bennett Foddy and Julian Savulescu (2007), "Ethics of performance enhancement in sport: Drugs and gene doping"
5. Seminar presentation: Larry Temkin (2011), "Is living longer living better?"
6. Seminar presentation: Anders Sandberg and Julian Savulescu (2011), "The social and economic impacts of cognitive enhancement"
7. Presentation summaries and general discussion
8. Test 1
9. Seminar presentation: Julian Savulescu and Anders Sandberg, "Neuroenhancement of love and marriage: The chemicals between us"
10. Seminar presentation: Ingmar Persson and Julian Savulescu, "The perils of cognitive enhancement and the urgent imperative to enhance the moral character of humanity"
11. Seminar presentation: John Harris, "Moral enhancement and freedom"
12. Seminar presentation: Ingmar Persson and Julian Savulescu, "Getting moral enhancement right: The desirability of moral bioenhancement"
13. Seminar presentation: Nicholas Agar (2013), "Why is it possible to enhance moral status and why doing so is wrong?"
14. Presentation summaries and general discussion
15. Test 2

Motivation in Teaching Process

144753

Lecturer in Charge

Pred.
Dunja Jurić
Vukelić

Course Description

The course objective is to provide students with an insight into basic theoretical assumptions and contemporary scientific findings in the area of psychology of learning and motivation, focusing on the role of the motivation in learning and academic achievement. Additionally, the course objective is to teach students how to apply acquired knowledge in educational practice, in the context of increasing internal motivation of students and motivation for achievement.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret and to compare the basic theoretical approaches in the study of motivation
2. Evaluate the findings of recent research on motivation
3. Explain developmental, individual and external factors affecting motivation
4. Apply the acquired knowledge on the determinants of motivation on organizing conditions in the class and involvement of children in teaching activities that encourage intrinsic motivation and the motivation for achievement
5. Show the material from their professional field using methods that stimulate interest and creativity of students
6. Apply the acquired knowledge to their own motivation to work

Screening of student's work

- 1 ECTS Pohađanje nastave [EN]
- 1 ECTS Kolokviji [EN]
- 1 ECTS Seminarski rad [EN]
- 3 ECTS

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Knowledge will be evaluated by passing two colloquia each of which brings up to 35 points. Students who will not pass the colloquium or students who will not be satisfied with the success will take a written exam, by volume, content and related ECTS credits identical to the requirements colloquia conducted during the semester. Attending at least 70% of lectures is obligatory. Regular attendance contributes 10 points to the final grade. Seminar paper is 20 points maximum.

Forms of Teaching

- » Predavanja
 - » Lectures will be held weekly.
- » Seminar
 - » Seminars will be held weekly.

Week by Week Schedule

1. Definition of motivation in the context of education
2. Four approaches to motivation: behavioral, humanistic, cognitive approach and social learning approach
3. Theoretical Review: theories of reinforcement, self-determination and the theory of need
4. Evolutionary and neuroscientific theory
5. Motivation and Learning
6. Relationship and the importance of cognitive and motivational factors in determining school success
7. Continuous assessment exam
8. Types of motivation: intrinsic, extrinsic motivation and achievement oriented motivation
9. Early socio-emotional development and the development of motivation in childhood

10. External factors affecting the development of motivation
11. Motivation and creativity
12. Motivation of teachers

13. Practical application: increasing the intrinsic motivation and motivation for achievement
14. The use of modern teaching aids
15. Continuous assessment exam

Multiculturalism, Multilingualism and Cultural Heritage

57141

Lecturer in Charge

Prof. dr.sc.
Jadranka
Gvozdanović

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours
Lectures 30

Grading

Active participation in class, presenting essays and written theses, exam.

Course Description

Course objectives

Gaining insight into the assimilation of foreign cultural elements into the history of the Croatian culture, understanding the language as a carrier of culture, as well as gaining insight into the processes of European integration.

Study Programmes

» Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and understand the multicultural and multilingual heritage of the Croatian people
2. Explain the reflexive and critical attitude in the light of the history and contemporary linguistic processes
3. Show the connection between language and culture
4. Advance expertise in the field of language and culture

General Competencies

The students will be able to describe the linguistic dimension of the Croatian multicultural history, analyze the processes of linguistic shaping of the Croatian identity, get to know the linguistic expressions of cultural memory and distinguish multilingualism on the Croatian soil.

Week by Week Schedule

1. The role of language in the transmission of culture
2. Loanwords as an expression of cultural contact
3. Principles of borrowing and linguistic adaptation
4. The history of German loanwords and their dating in Croatia
5. Loanwords from the Venetian language and their distribution
6. The history of the selection of variants in the literary language

7. The beginnings of Croatian standardization, the role of the Dubrovnik tradition
8. Overview of the lexicological and grammatical tradition
9. The role of foreign models
10. Conceptualization of the nation and social identity
11. The European situation compared to the Croatian
12. The history of multilingualism in European terms
13. Croatia and European integration
14. Croatia as an integral part of Europe
15. Overview and revising

Multivariate Statistical Methods

53913

Lecturer in Charge

Izv. prof. dr.sc.
Vanja Šimičević

Course Description

The aim of the course is to acquire knowledge and skills to use the major multivariate statistical analysis of the results at the level of understanding, planning and implementation of research analysis. Students will be acquainted with all fundamental multivariate statistical knowledge and techniques which are being used in sociological practice with emphasis on the specifics, advantages and limitations of particular methods of multivariate data analysis, develop motivation to work in sociological research, as well as knowledge of basic statistical methods and techniques and the motivation for their use in social research. The basic idea of the multivariate statistical analysis to simultaneously observe several interrelated variables, wherein each variable initially, as important.

Students have been developing abstract way of thinking and adopting statistical terminology. Understanding of statistical analysis procedures, which are subject to lecturing, are being verified in written forms, through tests and numeric exercises. Students are expected to demonstrate clear and logically consistent interpretation of calculated results

Study Programmes

» Science Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Estimate the statistical requirements for the implementation of selected multivariate techniques.
2. Design a plan of research using some of multivariate techniques.
3. Analyze data suitable for analysis of some of these multivariate analysis techniques using SPSS software package
4. Explain the results obtained by some of these multivariate techniques within the set of research problems
5. Evaluate conclusions by applying some of these multivariate techniques in research
6. Explain statistical and mathematical logic MANOVA, regression, correlation, discriminant, canonical and cluster analysis.

ECTS Credits 6.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Exercises 45

Teaching Assistant

Josip Ježovita

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, and orally

General Competencies

Apply the advanced statistical terms and information.

Design a research project.

Organize the implementation of a research project.

Use the computer software for the analyses of qualitative and quantitative data.

Organize the teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Develop the research question on the subject/process/phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Combine the different social research methods in the analyses of the relevant data.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report.

Week by Week Schedule

1. Introductory lesson and overview of the overall subject- matter.
2. One Way-Analysis of Variance (ANOVA)
3. A-priori and post-hoc Comparisons
4. Multivariate Analysis of Variance (MANOVA)
5. The Multiple Regression Model. Model Specification, Model development.
6. Least Squares Coefficient Estimators. The Explanatory Power of Linear Regression Equation.
7. Coefficient of Determination.
8. Stepwise Regression Model
9. Logistic Regression
10. Factor Analysis-FA
11. Principal Components Analysis
12. Mutual Factors Analysis
13. Factor axis rotation and interpretation
14. Cluster Analysis
15. Discriminant Analysis-DA

Museums and Historical Science

158263

Lecturer in Charge

Doc. dr.sc.
Mladen Tomorad

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours

Seminar 30

Grading

Class attendance: 30% Seminar
35% Colloquium 35%

Course Description

The aim of this course is to: introduce students with the methods of analysis of the material historical sources, problems of their treatment, analysis and interpretation; to introduce students with the museums and their work; the work with the material historical sources in museums (treatment, analysis, interpretation and presentation); the main museum on-line databases; the usage of the gained knowledge in research and teaching of history.

Study Programmes

- » Science Stream (Smjer) (*archival and historical sciences, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define institutions in which material historical sources are kept
2. Identify types of material historical sources and their ways of keeping
3. Classify museum institutions
4. Define museums
5. Use the models of presentation of museum sources
6. Use of the CIDOC Guidelines for museum object information
7. Explain the types of objects and the material from which are they crafted
8. Use of the main types of dating

General Competencies

- Name persons and museum institutions which marked the Croatian and the World history,
- Outline the importance of interdisciplinary research of the historical topics,
- Point out the essential from unessential in interpretation of historical events and processes,
- Interpret material historical sources.

Screening of student's work

- 2 ECTS Kolokviji [EN]
- 1 ECTS Istraživanje [EN]
- 2 ECTS Praktični rad [EN]
- 5 ECTS

Forms of Teaching

- » Predavanja
 - » Lectures
- » Vježbe u praktikumu
 - » Development of the museum databases.

Week by Week Schedule

1. Material historical sources
2. Types of historical sources. Classification and typology of sources.
3. Material historical sources and how to deal with them.
4. Museums - the place of keeping material historical sources.
5. Genesis and the history of museums.
6. Types of museum institutions.
7. Organization of the museums.
8. Museum documentation. International guidelines for museum object information.
9. Organizations for development of the museums (ICOM, MDC).
10. Relation between museums and historical sciences.
11. Classification of the museum object.
12. Chronology and dating. Materials and their production. Classification.
13. Language. Script. Translations and transliterations. Terminology and terms. International and domestic examples.
14. Museum databases and on-line databases.
15. Colloquium.

Neuropsychological Rehabilitation

53826

Lecturer in Charge

Doc. dr.sc.
Andrea Vranić

Course Description

The broad aim of the course is to give insight into the possibility of practical application of knowledge from cognitive psychology. The specific objective is to introduce students to the possibilities of cognitive training and cognitive rehabilitation programs. Students will be able to analyze individual needs of participants of such programs, to work in teams to design cognitive interventions, and to organize and implement cognitive empowerment programs.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and explain the interaction of cognitive and metacognitive factors in maintaining cognitive functionality in adulthood and old age
2. Recognize the importance of various cognitive interventions
3. Recognize and analyze deficits in cognitive functioning
4. Apply team work in developing specific cognitive task and interventions
5. Evaluate cognitive empowerment interventions

New Media and Digital Marketing

130706

Lecturer in Charge

Doc. dr.sc.
Jelena Jurišić

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

Vladimir Pavlič, dipl. ing.

Course Description

The goal of the programme is to explain to the students the basic laws of growth and development of digital media and marketing, and how they are interwoven with sociologic and business phenomena that they face every day. Through lectures and exercises, the students will learn basic concepts related to digital marketing, business strategy and marketing in digital media and learn basic business terminology.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, identify and explain on specific examples the basic information technology rules and the consequences arising from them.
2. Define, explain and apply the business 'long tail' concept.
3. List, identify and explain all the elements of the diffusion of innovations curve.
4. Define and devise a specific media communication plan for a product or a service on digital media platforms.
5. Identify the specificities of individual social networks and the marketing tools that are used on them.
6. Explain the business operations of Google and the benefits of their business model for business operations on the Internet.
7. Identify and theoretically explain the substitution and scalar media technology.

General Competencies

Define, describe and evaluate new media and digital marketing, their relationship and the central problems. Apply, classify and distinguish professional terminology. Individually or in teams conduct scientific research in the field of communicology with the help of modern scientific-research methods and write scientific papers in a clear and organized manner. Expertly and professionally apply the acquired specialist theoretical and practical knowledge in practical work.

Week by Week Schedule

1. Basic concepts of business on the Internet;
2. generation x, y and z;
3. long tail;
4. cyberology;
5. diffusion of innovations;
6. digital communications strategy, marketing strategy;
7. devising communications plan;
8. devising digital marketing plan;
9. marketing agency business operations;
10. management and communication in social networks;
11. business operations in social networks;
12. digital PR and viral campaigns;
13. marketing on social networks;
14. contextual advertising;
15. personalized digital marketing;

Non-Classical Logics

95332

Lecturer in Charge

Prof. dr.sc.
Srećko Kovač

Course Description

To give students an insight into basic types, characteristics and methods of non-classical logics, and into their main motivation and purpose; to give students a basic orientation in the relationship of non-classical logics to some main epistemological and ontological questions; to show a possible application of non-classical logics to the reasoning on different grades of the construction of a theory.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic distinctions between paracomplete (intuitionistic) and inconsistency-tolerant logics
2. Interpret the scope and limits of the validity of classical logical laws
3. Define and demonstrate the main specific features of single non-classical logics (intuitionistic, C-logics, discussive logic, three-valued and Belnap's four-valued logics)
4. Explain and build an intuitionistic tableau and many-valued matrix
5. Explain the purpose, meaning, and application of singular non-classical logics

General Competencies

After successfully finished course students will be able to (1) describe and interpret, by formal logical means, characteristics of the main stages in the process of the construction of a theory, (2) apply formal logical means in the discussion of the basic epistemological and ontological problems.

Week by Week Schedule

1. The distinction between classical and non-classical logics, 1+1
2. Aristotle's logic between classical and non-classical logics, 1+1

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

During the course, at each meeting short assignments are being written (for + or – mark) with the possibility of the joint work, during the semester three individual assignments are written (for a numeric mark). By written assignments and written exam mainly technical skills are checked, whereas at the oral exam the understanding of concepts and problems is checked.

3. The conditional and positive fragment of intuitionistic logic, 1+1
4. Propositional minimal intuitionistic logic, 1+1
5. Tableau for minimal intuitionistic logic, 1+1
6. Kripke's intuitionistic models, 1+1
7. Intuitionistic and classical logic, intermediate logics, 1+1

Course Description

The main objective of this course is to familiarize the students with the basics of the methodology of the public opinion and media market research, as well as the basic goals of using this type of research in business practice. In this way, we want to educate the students in how to properly devise, use and evaluate public opinion and media market polls. Accordingly, the course strives to ensure that the students are upon completion of their studies capable to use the market, media and public opinion research in concrete business practice, as important business tools in the context of reflexive business practices.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*mass communication research, 3rd semester, 2nd year*)
- » Communication Sciences (Studij) (*public relations, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*public relations, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name research methods and techniques that are applied in business organization operations.
2. Reproduce the most important methodological characteristics of individual methods of the public opinion and media market research.
3. Identify the most important benefits of certain methods of the public opinion and media market research.
4. Distinguish the most important specifics of particular methods of the public opinion and media market research.
5. Demonstrate the ability to communicate with research agencies in order to define research questions, define the optimal research design, as well as define the optimal research methods needed to solve specific business problems
6. Apply public opinion and media market polls in professional activities.

General Competencies

Define, describe and evaluate public opinion research and the central issues of the discipline.

Apply, classify and distinguish the professional terminology in various fields of communicology.

Identify, evaluate and use scientific-research methods used in the study of public opinion.

Individually or in teams conduct scientific research.

Week by Week Schedule

1. The notion of public opinion
2. The development of public opinion research,
3. Social determinants of the development of public opinion research,
4. Epistemological grounds of public opinion research,
5. Basics of qualitative and quantitative methodology of public opinion research,
6. Overview of the main types and methods of public opinion research,
7. Use of public opinion research in the sphere of politics and public affairs,
8. Public opinion research and public relations,
9. Use of public opinion research in the activities of business entities,
10. Basics of media consumption research as a special type of public opinion research,
11. Purposes of media consumption research,
12. Types of media consumption research,
13. Basic methodological specificities of media research,
14. The way media research is used in the activities of business entities.
15. Presenting seminar papers

Oral Latin

94511

Lecturer in Charge

Doc. dr.sc.
Šime Demo

Course Description

Command of basic Latin vocabulary, morphology, syntactic structures and phraseology; written and oral communication in Latin; the ability to communicate in Latin at the living Latin conferences, following journals written in Latin.

Study Programmes

- » Teaching stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write a letter in Latin
2. Write and tell one's own CV in Latin
3. Write a text about a set topic
4. Use acquired vocabulary
5. Assess one's own level of linguistic competence, as well as that of others
6. Analyze spoken texts

General Competencies

Use acquired vocabulary. Analyze spoken texts

Week by Week Schedule

1. Introduction, literature, paper assignments, salutation formulas
2. Vocabulary 1 (De vita scholastica)
3. Reading and working on selected chapters of Familia Romana (Epistula magistri)
4. Vocabulary 2 (De otio)
5. Reading of a selected letter (e.g. Vrančić), writing a letter to the family or friends
6. Vocabulary 3 (De cibis deque potionibus)
7. Reading and working on selected chapters of Familia Romana, talk on a selected topic (Convivium, Inter pocula)
8. Vocabulary 4 (De officiis)
9. Reading a biography (e.g. S. Crijević, Puer Romanus), writing a biography

Overview of the History of Croatian Literature

57149

Lecturer in Charge

Doc. dr.sc.
Davor Piskač

Course Description

The aim of the course is to train students as lecturers of the Croatian literature in primary and secondary schools.

Study Programmes

» Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe, identify and define the features of a particular literary period.
2. Describe, express and transfer an information about the meaning of a text.
3. Prepare the learners to learn, connect the knowledge and explain the interpreted texts
4. Analyze and distinguish individual parts of texts, point them out and when necessary compare with other texts
5. Analyze, pose a hypothesis and formulate, compose and write the synthesis of the elements of the text which is studied in the class
6. Distinguish, evaluate and assess the learners and support the decision in this regard with arguments.
7. Analyze literary text
8. Describe literary text

General Competencies

The overview of the history of Croatian literature is a part of the teaching of literature in primary and secondary schools. In terms of the taught subject matter it presents extremely important cultural knowledge about the development of the human spirit. With regard to human rights it raises the awareness of the relationships in the society, the family and the internal psychological processes of the individual. After finishing the course "Overview of the History of Croatian Literature", the students will be able to: notice the differences in terms of content and meaning in the field of literature and culture. This will contribute to the development of their cognitive skills and aesthetic sensitivity. As a result, the students will be able to better and more fully understand the traditional and contemporary culture across a diachronic and synchronic overview.

Seminar 15

Grading

STUDENT OBLIGATIONS
Class attendance is obligatory (minimum of 70%); Students are obliged to actively participate in classes; Students are obliged to write two essays; **ECTS CREDITS:** Class attendance 1 credit, class activity 1 credit, first essay 1,5 credits, second essay 1,5 credits; **GRADING AND EVALUATION:** Student class attendance and participation are graded – exam essays **ATTENDANCE AND ACTIVITY** Students are required to attend classes (minimum of 70%) in order to qualify for grading. For ten points from activity the students shall receive a higher grade by one. **ESSAYS** Students are obliged to write two essays. The first essay must be submitted to the address kroatologija@gmail.com by 15/11/2013 at the latest. The second essay must be submitted to the address kroatologija@gmail.com by 13/12/2013 at the latest. There are three available topics for the first essay: 1. The influence of antiquity on the Medieval, Renaissance and Baroque literature; 2. The character of a woman in the Medieval, Renaissance and Baroque literature; 3. The development of drama from the period of antiquity to the Enlightenment and Classicism. The students may choose from three topics for the second essay: 1. The conflict of reason

» Seminar

» Problem solving oriented class

Week by Week Schedule

1. Course details elaborated according to the schedule of teaching
2. Calendar:
3. The concept of world literature and of literary periods
4. The beginnings of literature (reading: Gilgamesh)
5. Literature of antiquity (reading: Sophocles: Antigone)
6. Medieval literature (reading: Carmina Burana)
7. Renaissance literature (reading: Dante: Inferno)
8. Baroque literature (reading: Pedro Calderon de la Barca: Life Is a Dream)
9. Literature of Enlightenment and Classicism (reading: Moliere: The Miser)
10. Literature of Romanticism (reading: Goethe: The Sorrows of Young Werther)
11. Literature of Realism (reading: Dostoevsky: Crime and Punishment)
12. Literature of Moderna (reading: Charles Baudelaire: The Flowers of Evil)
13. Contemporary literature (reading: Alessandro Baricco: Ocean Sea)
14. Final knowledge assessment and grading
15. x

Literature

Milivoj Solar (2003). *Povijest svjetske književnosti.*, Golden marketing TK, Zagreb

Additional Literature

Milivoj Solar (2014). *Eseji o velikim i malim pričama*, Ex Libris

and senses in the literature of Romanticism; 2. The attitude of the social system toward the individual in the literature of Realism; 3. The influence of the Avant-garde on the contemporary literature.

ESSAY GRADING AND POINTS: Each essay should have between 1200 and 1500 words (3-4 pages). Each essay shall receive between 1 and 10 points. An essay may not receive more than the maximum number of points from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good understanding of the topic 2 points 3. Good knowledge of the context surrounding the topic 1 point 4. Good use of professional language and expression 1 point 5. Systematically supported facts and meaning 2 points 6. Originality of ideas and their presentation and support 2 points. Essays are graded in the following manner: 6 points - sufficient (2), 7 and 8 points - good (3), 9 points - very good (4), 10 points - excellent (5).

Pedagogy

144706

Lecturers in Charge

Doc. dr.sc.
Marjan Ninčević

Prof. dr.sc.
Marko Pranjić

Course Description

The course objective is to prepare a future teacher for performing the educator's job as a master of arts by providing pedagogic knowledge and skills qualification.

Study Programmes

- » Psychology (Studij) (*elective (teaching module), 2nd semester, 1st year*)
- » Psychology (Studij) (*elective (teaching module), 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 2nd semester, 1st year*)
- » Teaching stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Correctly interpreting the basic concepts of pedagogy, explain pedagogic epistemology and interpreting the interaction of education and pedagogy.
2. • Correctly interpret key pedagogic concepts (educate, educator, education, enculturation, acculturation, socialization, the science of education, educational authorities, educational role models etc.);
3. • Validly interpret the scientific foundations of pedagogy;
4. • Differentiate between views of man and the according pedagogic procedures based upon or arising from them;
5. • Explain learning and teaching as parts of education;
6. • Classify different development theories in the framework of reflecting on and organizing education;
7. • Compare educational needs according to different theoretical backgrounds (natural sciences on education, social sciences and humanities on education, social problems in behaviour);
8. • Summarize the content of certain educational policies; • Test pedagogical thought in the face of contemporary pedagogic challenges;

ECTS Credits 4.0

English Level Lo

E-learning Level L2

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Filip Brčić, mag. hist.

Grading

Students will be monitored in all three stages of the course delivery. In the first stage, when the basic concepts of pedagogy are taught, the student's motivation is monitored based on active engagement in class, as well as regular attendance (20% of the final grade). In the second stage, the student's individual and group work in research on a specific pedagogical problem, multimedia presentation and reporting on it in front of colleagues, and participating in the same assignment of other students are monitored (30 % of the final grade). The third stage refers to the evaluation of the student's systematic knowledge of pedagogy by means of a written exam (15 questions) based on obligatory literature and professor's lectures (50% of the final grade).

Forms of Teaching

- » Predavanja
 - » Professor's lectures, with up-to-date novelties published in the field of pedagogy in relation to student, education, the discipline of pedagogy etc.
- » Seminar
 - » Individual preparation for the presentation of a book from the field of pedagogic practice and participation in seven similar preparations and presentations of other students.

Week by Week Schedule

1. •The educatee as the centre of not only education, but entire pedagogy. Various perspectives on man, from chemical materialism and different historical versions on the nature of man to the view shaped by different cultures and civilizations (European, Asian, African).
2. •The possibility of and the need for education (education as an activity that creates both man and society, looked at from the point of view of different scientific disciplines and professions that all have contributed to the interdisciplinary approach in pedagogy as a science and the practice based upon it).
3. •With maximum respect for education as a possibility and a need, limits of education are discussed as well, whereby both pedagogical optimism and pessimism are elaborated as an introduction to the informed opting for pedagogic interactionism, i.e. pedagogic realism.
4. •Pedagogy as a distinct science (educational science or sciences, basic concepts of pedagogy, the difference between pedagogy and educational science(s), the objectives of pedagogy, the fields of educational sciences, pedagogy and related sciences (sociology, psychology, anthropology, neurosciences, biology), epistemological division: humanistic-scientific pedagogy, empirical educational science, critical educational science.
5. •New challenges facing pedagogy (concern about its scientism, education and its references, interaction of education and pedagogy, interaction of pedagogy and culture).
6. •Communication in education (relevant characteristics of education, education as the change of behaviour, intentional and functional learning, education as interpersonal activity, education as social interaction, education as social communication, education as purposeful help in learning).
7. •Learning and teaching as parts of education
8. •Theories of behaviour change in education (psychoanalysis, behaviourism, insight, defence mechanisms, urge, and libido).
9. •Authority in education (authority as the triple relationship of the instructor, the subject, and the field; the difference between authority and authoritarianism, the relationship between paedocentrism and types of authority, educational models, who is an ideal educator).
10. Highly talented and disabled persons in education
11. Problematic behaviour of educatees in education and schooling,
12. Still insufficiently explored man
13. Alternative education
14. Different degrees of education and schooling
15. Learning as a pedagogic problem, education – the concept of human growing up, educational policy.

Personality Psychology

57111

Lecturer in Charge

Prof. dr.sc.
Josip Burušić

Course Description

The aim of the course is to familiarize students with the most important areas and topics of personality psychology, and enable them to establish their future professional work with individuals and groups on scientific knowledge in the psychology of personality so that they are able to integrate knowledge from different parts of psychology that relate to the area of the personality of the individual.

A further objective of the subject is reflected in the development of student competencies analysing, explaining and understanding human behaviour through the most important concepts and findings of personality psychology.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and describe different approaches to the study of particular phenomena within the personality.
2. Define different approaches to the study of particular phenomena within the personality.
3. List and describe contemporary research insights on specific phenomena that under consideration within the psychology of personality.
4. Analyze individual phenomena and establish their interrelatedness
5. Analyze human experience and behavior in terms of the most important concepts of personality psychology.
6. Explain and understand human experience and behavior in terms of the most important concepts of personality psychology.
7. Argue and publicly present their views on particular phenomena in personality psychology.
8. Assess critically certain insights of psychology of personality
9. Apply modern insights in their professional work
10. Develop an awareness of necessity for continued efforts to improve their knowledge in the field of personality psychology.

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Grading

The final student's grade is determined by the final exam. Provisional grade with which a student comes to the examination term is formed over the course of the subject in a way that a score is kept individual student activities. The maximum number of points that a student can achieve in certain activities is: Participation (arrivals + activities) 15 points (10 +5) Exam / colloquium 50 points Independent analysis of the activity in the form of research papers: 35 points The collected points are converted into a temporary assessment as follows: 51-60 points --- sufficient (2) 61-75 points --- good (3) 76-90 points --- very good (4) 91-100points --- excellent (5)

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Forms of Teaching

- » Predavanja
 - » na
- » Seminar
 - » na

Week by Week Schedule

1. What is a contemporary approach to personality?
2. Biological fundamentals of personality: evolutionary psychology of personality
3. Biological fundamentals of personality: behavioural genetics
4. Development and personality changes of an individual
5. Personality and emotions: Emotional intelligence
6. Social motivations
7. Goals
8. The concept of self
9. Self-respect
10. Private and public in human behaviour
11. Individual in interpersonal situations - self-revelation
12. Awareness of self
13. Self-presentation. Shyness
14. Social anxiety
15. Personal welfare

Philosophy and Culture: Croatia in the European Context

57138

Lecturer in Charge

Doc. dr.sc.
Marinko Šišak

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Students will be monitored through the presentation of seminar papers related to the subject matter as agreed with the teacher. Evaluate the will to continue their participation in the activity in the discussions and mastery of recommended literature.

Course Description

To introduce students with the basic characteristics of philosophy, its origins, cultural definitions and significance of spiritual and material life and identity of a nation. Insights into the key features and thinkers in the history of Croatian philosophy will show the interrelationship of Croatian philosophy with the whole western European thought and compatibility with the main trends in this opinion.

Study Programmes

» Science Stream (Smjer) (*kro-dipl (4422): elective courses 1, 2nd semester (science stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze main cultural and philosophical processes of European culture
2. Distinguish the main determinants of European culture and elements of Croatian culture that belong to the whole
3. Analyze key contributions Croatian philosophy and culture in creating a European cultural space.
4. Argue most belonging Croatian philosopher European spiritual and cultural tradition
5. Identify the main influences of European cultures on Croatian culture
6. Describe the main tendencies in the modern understanding of Europe

General Competencies

Understanding the possibility of interpreting the relationship between philosophy and culture. Arguments to explain the correlation Croatian philosophical and cultural heritage with European.

Screening of student's work

- 1 ECTS Pohađanje nastave [EN]
- 2 ECTS Pismeni ispit [EN]
- 2 ECTS Seminarski rad [EN]
- 5 ECTS

Week by Week Schedule

1. Philosophy and nation.
2. Cultural-historical characteristics of Philosophy.
3. Philosophy towards other social sciences and humanities.
4. Culture and Theories of Culture.
5. Development of the concept of Europe from the Middle Ages to today
6. Basic characteristics of Croatian towards other European cultures.
7. Ecclesiastical orders and the development of Croatian culture.
8. The role of Italian and other universities in the education of croatian humanist
9. Marulić and his reception in Europe.
10. Ivan Stojković and ecumenical Europe
11. Nikola Modruški and Croatian "Antiturcica"
12. Renaissance schooling and academies.
13. Reflection about Mediterranean town - Petris and Gozze
14. Stjepan Zimmerman and moral values of Europe
15. National institutions and their importance to the culture

Philosophy of Biology [Philosophy of Science]

85410

Lecturer in Charge

Izv. prof. dr.sc.
Tomislav
Bračanović

Course Description

The objective of the course is to introduce students into the standard philosophical problems of biology, its methodological, epistemological and meta physical aspects, the basic ideas of sociobiology and evolutionary psychology, and the implications of evolutionary theory for classical philosophical disciplines such as ethics, political philosophy and philosophy of religion. Specific topics to be dealt with in the course: the structure of evolutionary theory, units of selection problem, adaptationism and biological functions, nature-nurture controversy, evolutionary psychology and the modularity of mind, intelligent design debate, biological and cultural evolution.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and enumerate the central philosophical problems of biology
2. Explain and present different theoretical views within contemporary philosophy of biology
3. Analyze independently the most important writings in philosophy of biology
4. Recognize connections between biological knowledge and a series of philosophical disciplines, such as philosophy of science, ethics, political philosophy and philosophy of religion
5. Apply the basic principles of evolutionary thinking to other areas of human knowledge and action, such as society, history and culture
6. Explain the historical influence of biological theories on theories in social sciences and humanities
7. Explain how the development of biology affects many areas of contemporary life and society

ECTS Credits 4.0

Philosophy of Communication

64817

Lecturer in Charge

Doc. dr.sc.
Tomislav Janović

Course Description

Systematically expose various manifestations and forms of communication. Point out the common elements of all forms of communication. Present two main theoretical models of the communication process and highlight their advantages and disadvantages. Succinctly present evolutionary conditions of origin and development of human communication. Highlight the most important social, technological and ethical aspects of communication and information revolution and the emergence of the networked society.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Highlight the principal claims from selected texts in communication theory.
2. Use basic vocabulary in the theory of communication.
3. Identify common elements of all forms of communication.
4. Distinguish between two founding theoretical models of the communication process; point out their strengths and weaknesses.
5. Show the most important evolutionary conditions for the origin and development of human culture and communication.
6. Describe the most important social, technological and ethical aspects of the communication-information revolution and the emergence of the networked society.

ECTS Credits 5.0

English Level L2

E-learning Level L2

Study Hours

Lectures 15

Seminar 15

Grading

Elements of the grade: regular attendance: 10%, class effort: 10%, independent work (a short paper on an assigned topic): 20%, written knowledge assessments or written exam: 40%, oral exam: 20%

General Competencies

Define, describe and evaluate the philosophy of communication. Apply, classify and distinguish professional terminology. Identify and interpret in an argued manner the interdisciplinary nature of communicology by linking the specific segments of the history and characteristics of communicology with the corresponding segments of the history and characteristics of humanities and social sciences; Conceptually clearly present different information and perspectives, and critically assess the credibility of claims, assumptions and arguments mediated through a variety of media. Think in an interdisciplinary manner and respect the various scientific methodologies and perspectives on specific issues and problems.

Week by Week Schedule

1. Agreement on the mode of work, knowledge assessment and the preconditions for obtaining signatures and grades. Brief introduction to the course.
2. Dealing with other minds: What is communication? What is communicated and in what way?
3. The diversity of communication forms and the specific nature of human communication. Expansion of commonsense (pre-theoretical) notion of communication: Is there a single definition and universal theory of communication?
4. The first model: communication as a coded transmission of information. Information, signal, code, sign, meaning.
5. The second model: communication as a transfer and recognition of intention. Intended meaning, interpretation, context.
6. Non-standard types of communication: animals, machines, aliens.
7. The evolution of communication and the development of human communication skills. Natural and social environment.
8. Genetic and memetic (symbolic) information transfer. The origins and development of culture.
9. Elaboration of code (semiotic) model of communication: sign and structure, sign and meaning, types of signs and sign systems.
10. Elaboration of code (semiotic) model of communication: the notion of representation and representation theory. Mental, linguistic and cultural representation. Semiotic analysis of complex messages of contemporary mass culture.
11. Elaboration of intentional communication models: the problem of reconstruction of communication intention. Implicit and explicit content of the message. The role of context and the term of relevance.
12. Mass communication, networked society and new media. The concept of communication/information revolution.
13. Mass communication and the creation of public opinion: from persuasion to manipulation.
14. The fundamental issues of information and communication ethics.
15. Recapitulation of the course subject matter and preparation for the exam.

Philosophy of Mind and Cognitive Science

53893

Lecturer in Charge

Doc. dr.sc.
Tomislav Janović

Course Description

To give a historical overview of the main issues, concepts and theories of philosophy of mind: from Plato and Aristotle to Descartes, from Descartes to Ryle, and from Ryle to the present day to present the main positions on the mind-body relationship together with the main virtues and vices of these positions to lay out the conceptual foundations and empirical achievements of cognitive science and evolutionary psychology to advance the skills of philosophical analysis and argumentation (in both written and oral form) by interpretation and discussion of original texts.

Study Programmes

» Philosophy (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic theoretical vocabulary of philosophy of mind and cognitive science
2. Analyze simpler writings about the philosophy of mind and cognitive science and summarize their main problems and arguments
3. Evaluate the main theories and arguments of philosophy of mind and cognitive science; to identify the weaknesses of particular theoretical positions and lines of reasoning
4. List the most significant conceptual and empirical achievements of the contemporary scientific study of the mind/brain
5. Identify the relevance of the fundamental questions posed by the philosophy of mind for empirical disciplines dealing with human mental life or its behavioral manifestations (e.g. psychology, neuroscience, linguistics etc.)
6. Apply the learned concepts and logical-analytical tools in order to conduct a simpler research assignment in philosophy of mind

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Grading: regular attendance: 10%, active participation in class (readings & discussions): 10%, presentation on given topic (15-20 minutes, power point & handouts): 20%, written exam (or two tests) 40% (20%+20%), oral exam: 20%.

General Competencies

to understand and extract the main points of graduate level philosophical texts to analyze and critically evaluate philosophical positions, theories and arguments in oral and written form; to identify weaknesses of particular arguments and theoretical positions to articulate, justify and defend ones own view on a philosophical problem, both in oral and written form to recognize the conceptual and methodological relatedness of philosophy of mind and cognitive science to other philosophical disciplines, both traditional (ontology, epistemology, logic) and contemporary (philosophy of language and philosophy of science) to apply concepts and technical terms of philosophy of mind and cognitive science to other philosophical fields and other disciplines of the humanities and the social sciences

Week by Week Schedule

1. Basic information about the course, learning methods, students obligations, credits, and grading
2. Philosophy of mind, its subject, methods and historical development; mind/soul, mental states and their ontological status; folk- and scientific psychology
3. Ancient and medieval philosophy of mind: idealism, materialism, hylemorphism
4. Cartesian (interactionist) dualism
5. Post-Cartesian philosophy of mind: dualism without interaction (parallelism, occasionalism, epiphenomenalism), subjective and transcendental idealism; materialism of the Enlightenment
6. Psychological and philosophical behaviorism; Ryles Ghost in the Machine
7. Theory of psychophysical identity
8. Written exam (1st test)
9. Functionalism
10. Instrumentalism and eliminativism
11. Unresolved problems of physicalism: intentionality and subjectivity of experience
12. Unresolved problems of physicalism: qualitative character of experience (qualia); explanatory gap and the problems of consciousness
13. Representational theory of mind, transcendental deduction and cognitive science
14. Modularity of mind, evolutionary psychology and neuroscience
15. Written exam (2nd test)

Lecturer in Charge

Izv. prof. dr.sc.
Tomislav
Bračanović

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

On the basis of (a) regular attendance and active participation in discussions and (b) grades of two tests.

Course Description

The objectives of the course are to introduce students to the basic philosophical viewpoints on the nature of science as an intellectual enterprise, to specifically epistemological and metaphysical problems of scientific research and methodology, and to standard theories and solutions to these problems within the framework of contemporary philosophy of science. A particular emphasis will be on the following topics: logical empiricist philosophy of science, models of scientific explanation, falsificationism and the demarcation problem, Kuhn's notion of scientific revolutions, Lakatos scientific research programs, the relationship between theory and observation, realism-antirealism dispute, philosophies of particular sciences, value criticism of science.

Study Programmes

» Philosophy (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and enumerate the crucial authors and writings in contemporary philosophy of science
2. Demonstrate the basic problems of the general philosophy of science, as well as the basic problems of particular philosophies of science
3. Analyze and independently read classical works on general philosophy of science
4. Explain the most important theoretical viewpoints of contemporary philosophers of science and to illustrate them with examples from the history of science
5. Compare and evaluate the opposing philosophical views on various aspects of science

General Competencies

After completing the course, students will be able to: (1) recognize common assumptions and problems of philosophy of science and other philosophical disciplines, such as epistemology, metaphysics, philosophy of mind, logic and metaethics. (2) apply the knowledge and critical instruments of philosophy of science when assessing a range of theories from social sciences and humanities; (3) combine the knowledge of philosophy of science with the knowledge of history of science and history of philosophy in order to assess the significance of philosophy for contemporary education and science.

Screening of student's work

1 ECTS Pohađanje nastave [EN]
 4 ECTS Kolokviji [EN]
 5 ECTS

Forms of Teaching

- » Predavanja
 - » Two hours (90 min) of lectures per week.

Week by Week Schedule

1. Philosophy of science as a philosophical discipline
2. Scientific explanations: inductive reasoning, logical empiricist philosophy of science and deductive-nomological model
3. Scientific explanations: inductive reasoning, logical empiricist philosophy of science and deductive-nomological model
4. Scientific explanations: inductive reasoning, logical empiricist philosophy of science and deductive-nomological model
5. Popper's philosophy of science and the falsifiability principle
6. Popper's philosophy of science and the falsifiability principle
7. Kuhn's philosophy of science: the role for the history of science and social context
8. Kuhn's philosophy of science: the role for the history of science and social context
9. Test
10. Lakatos' methodology of scientific research programs and the idea of rational reconstruction of science; Feyerabend's "epistemological anarchism"
11. Lakatos' methodology of scientific research programs and the idea of rational reconstruction of science; Feyerabend's "epistemological anarchism"
12. Scientific realism and antirealism: observable-unobservable debate; Putnam's "no miracles" argument; Laudan's "pessimistic meta-induction" argument; constructive empiricism and empirical adequacy; underdetermination argument
13. Scientific realism and antirealism: observable-unobservable debate; Putnam's "no miracles" argument; Laudan's "pessimistic meta-induction" argument; constructive empiricism and empirical adequacy; underdetermination argument
14. Philosophies of special sciences and their special philosophical problems
15. Test

Political and Legal Philosophy

53882

Lecturer in Charge

Doc. dr.sc.
Tvrtko Jolić

Course Description

There are two objectives of the course: (1) to develop skills of critical thinking and argumentation on the fundamental issues of legal and political philosophy, (2) to provide students with an insight in the major questions of political and legal philosophy, including political obligation, the value of democracy, human rights, liberalism and distributive justice.

Study Programmes

» Philosophy (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic concepts of political and legal philosophy
2. Describe and interpret the various political and legal theories and directions of thought
3. Analyze classical and contemporary texts in political and legal philosophy
4. Argue in discussions related to the political and legal organization of a society
5. Develop their ability to think independently about some of the ideas studied.

General Competencies

After the exam students will be able to: (1) understand the connection between political and legal philosophy with other philosophical disciplines, primarily with ethics (2) apply knowledge and critical vocabulary of political and legal philosophy in the assessment of scientific theories from the other fields of social sciences and humanities, such as political science, law, sociology and history.

Forms of Teaching

- » Predavanja
» Lectures and discussions

Week by Week Schedule

1. Introduction to political philosophy: main problems and terms
2. Theories of the state of nature: collective and individual rationality, prisoner's dilemma, anarchism

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Grading is based on two written tests, one oral presentation and the discussions in the class during the semester.

3. Justification of the state: social contract, utilitarianism, principle of fairness
4. Who should rule: representative and direct democracy, general will, criticism of democracy
5. Freedom: Mill's principle of liberty, freedom and equality, two concepts of liberty
6. Distribution of property: initial acquisition, market
7. Rawls on justice: original position, veil of ignorance, two principles of justice
8. Critique of liberal political philosophy: individualism, communitarianism, feminism
9. Test 1
10. Egalitarianism: resources, capabilities and welfare
11. International justice: political realism, law of peoples
12. Human rights: institutional theory of human rights
13. Philosophy of law: natural law theory, positivism, Dworkin
14. Theories of punishment: rehabilitation, utilitarianism, retribution
15. Test

Political History

53922

Lecturer in Charge

Doc. dr.sc.
Ivana Jukić

Course Description

The aim of the course is to familiarize students with the main characteristics and guidelines within the Croatian political history and beyond in the 19th and early 20th century. The backbone of the course is to explain how the turbulent events such as annexations, wars and political movements have changed the policy and how each individual political community reacted to these changes and to identify how these changes have caused the emergence of dictatorship in political communities across Europe.

Study Programmes

» History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Show the underlying data of the Croatian political history of space and environment in the 19 and early 20th century.
2. Analyze trends and guidelines of Croatian politics during the period.
3. Compare Croatian politics of the 19th/20th. century in a European context.
4. Explain the differences in the perception of policy among the different social classes and their politics.
5. Describe the political systems that have shaped the Croatian and European political action.

General Competencies

After finishing the programme student will be able to:

1. explain cause and effect relations of historical events and processes,
2. construct a historical context,
3. defend his/her own opinion in discussions on different historical events and processes,
4. combine a different historical processes,
5. Appraise the value of historiographic interpretations.

Week by Week Schedule

1. Introductory lecture
2. Croatian-Italian relations

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Lecturer

Stipica Grgić, dr. sc.

Grading

The activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

3. Adriatic question
4. Eastern question
5. The Austro-Hungarian authorities of Bosnia and Herzegovina
6. Annexation of Bosnia and Herzegovina and its impact
7. The Balkan Wars
8. Political Systems: Europe and Croatia
9. Courses of Croatian policy until World War I
10. Characteristics of Croatian politics during First World War
11. Political developments in Croatia during reign of Charles I (IV)
12. Peace Conference in Paris
13. Agrarian ideology: peasant movements
14. Radicalization: dictatorship
15. Final review

Post-Renaissance Latinity Genres

144810

Lecturer in Charge

Doc. dr.sc.
Šime Demo

Course Description

Student will get familiar with literary genres of European and Croatian Neo-Latin post-Renaissance literature, together with their representatives.

Study Programmes

- » Croatian Latinity (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List literary and non-literary genres of Croatian Neo-Latin.
2. Evaluate individual work and give a synthetical assesment of it.
3. Write a commentary of a work (or its segment).
4. Explain ancient, Christian and other reminiscences in Neo-Latin works.
5. Write an exact translation of a text
6. List biographical data about authors

General Competencies

List literary and non-literary genres of Croatian Neo-Latin. Write a commentary of a work (or its segment).

Practical Counselling and Helping Skills

53861

Lecturer in Charge

Doc. dr.sc.
Adrijana Bjelajac

Course Description

Enable students to adequately provide psychological help to clients of different ages with different types of problems.

Study Programmes

» Psychology (Studij) (*specific and professional skills, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply competencies for working with people of different ages
2. Apply competencies for dealing with difficult issues and taboo themes
3. Apply competencies for working with people with different types of problems
4. Identify personal problems that could interfere with quality counseling work
5. Apply adequate strategies for self-care in the counselor role, with the aim of burnout prevention

General Competencies

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Assess the compliancy of psychological practice with the prescribed ethical principles of psychological practice in different fields of theoretical and applied psychology.

Grading

Class attendance - 20%;
Frequency of participation in class - 20%; Quality of participation in class - 20% (an additional requirement for the highest grade); Short theoretical exam - 20% (additional requirements for higher grades); Written response to client's problem - 20% (additional requirements for higher grades).

» Seminar

» Two hours of seminars per week

Week by Week Schedule

1. Fundamental concepts in the provision of psychological help
 - Personal ideas about providing psychological help, qualities necessary for proper psychological helping,
 - basic skills in the provision of psychological help (appropriate verbal and nonverbal communication, ensuring proper context)
2. Basic skills in the provision of psychological help (active listening)
3. Basic skills in the provision of psychological help (adequate course of conversation)
4. Basic skills in working with people from different age groups
 - The skills needed for working with adolescents
5. Basic skills in working with people from different age groups
 - The skills needed for working with middle-aged persons
6. Basic skills in working with people from different age groups
 - The skills needed for working with the elderly
7. Basic skills in working with clients with specific problems
 - The skills needed for working with clients with low self-esteem
8. Basic skills in working with clients with specific problems
 - The skills needed for working with clients with poor social skills, anxious clients (especially socially anxious)
9. Basic skills in working with clients with specific problems
 - The skills needed for working with grieving clients
10. Basic skills in working with clients with specific problems
 - The skills needed for working with depressed and suicidal clients
11. Basic skills in working with clients with specific problems
 - The skills needed for working with clients with the problem of anger
12. Basic skills in working with clients with specific problems
 - The skills needed for working with clients with recent traumatic experience and indirectly traumatized clients
13. Basic skills in working with clients with specific problems
 - The skills needed for working with clients with a (hidden) stigmatizing characteristic
14. Work on the development of coping strategies
15. Optional term for writing a short final exam, an oral evaluation of the course and conversation about impact of the course on the development of students individually

Practical Exercises in the Methodology of Teaching [Croatology]

144734

Lecturer in Charge

Prof. dr.sc.
Marko Pranjić

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of Philosophy by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Study Programmes

» Teaching Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams.

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:
interpret content in the sense of transposing data from one form to another
apply knowledge, experience, and skills in new situations,
analyse information (specific elements, relations between elements),
evaluate with the help of quantitative and qualitative criteria ,
synthesize in the form of a personal report,
provide arguments for one's attitudes,
suggest new interpretations and even theories.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Exercises 30

Seminar 15

Teaching Assistant

Rona Bušljeta, dr. sc.

Grading

Students are evaluated based on planned and executed lessons, seminar papers, workshops, design of the operational teaching plan, and teaching plans for philosophy, ethics and logic.

Forms of Teaching

» Seminar

» The biggest emphasis is put on shorter instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.

Practical application of theoretical bases learned in the Subject Specific Teaching Methodology course to the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National Curriculum Framework, Teaching plans for philosophy, ethics and logic, and individual Exam catalogues for philosophy, ethics and logic for secondary schools.

» Vježbe u praktikumu

» Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

Week by Week Schedule

- I. Because this is practical training, lectures boil down to a minimum and refer only to shorter theoretical explanations. The biggest emphasis is put on shorter instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.

Practical application of theoretical bases learned in the Subject Specific Teaching Methodology course to the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National Curriculum Framework, Teaching plans for philosophy, ethics and logic, and individual Exam catalogues for philosophy, ethics and logic for secondary schools.

Pointing out the importance of permanent professional development of teachers through designing a Professional Development Plan and referring the students to the web sites of the Education and Teacher Training Agency, Ministry of science, education, and sports, and domestic and foreign pedagogical literature.

In accordance with the requirements of contemporary didactics and teaching methodology, where the importance of individual work is pointed out, the students will be required to design and organize a creative workshop on a selected topic. The learning outcomes determined by the National Curriculum Framework have to thereby be accomplished (the fields of social sciences and humanities).

The students' attention will be drawn to the importance of class teaching lessons as the form of work aimed at getting to know the students, their needs and problems, coming together with one's students, and a more complete educational work. The students are expected to draw up and present The Class-Teaching Plan.

The cooperation between families and school will be pointed out through one of its forms – the parent meeting. The stress will thereby be put on the need to put parents in the role of active participants, and not passive listeners. The students are required to design and plan one parent meeting. Taking into consideration the importance of practicing in teaching and the State Graduation Exam, this course will demand of the students to compile several forms of written exams. The students will thereby be directed to consult the National curriculum framework, Teaching plans and textbooks for philosophy, ethics and logic, and Exam questions catalogues.

The students will in this course be taught how to draw up a simple questionnaire for getting feedback on their teaching or testing the expectations, opinions, or attitudes of the students and/or parents.

2. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
3. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
4. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
5. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
6. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
7. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
8. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
9. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
10. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
11. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
12. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
13. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
14. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
15. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

Practical Exercises in the Methodology of Teaching [History]

144736

Lecturer in Charge

Prof. dr.sc.
Marko Pranjic

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of History by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Study Programmes

» Teaching Stream (Smjer) *(required course, 3rd semester, 2nd year)*

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:
interpret content in the sense of transposing data from one form to another
apply knowledge, experience, and skills in new situations,
analyse information (specific elements, relations between elements),
evaluate with the help of quantitative and qualitative criteria ,
synthesize in the form of a personal report,
provide arguments for one's attitudes,
suggest new interpretations and even theories.

ECTS Credits	5.0
English Level	L1
E-learning Level	L1
Study Hours	
Exercises	30
Seminar	15

Teaching Assistant
Rona Bušljeta, dr. sc.

Grading

Every student will be monitored individually as the groups are small (maximum 10 students). Monitoring the lesson plans, teaching performance, and written assignments will enable the insight into the student's obtainment of knowledge of theoretical bases of the courses from the pedagogy module, but also the command of professional subject-matter knowledge. The students will be able to apply the competences acquired on this course during obligatory attendance at observation/demonstration classes in elementary i.e. secondary schools.

Forms of Teaching

- » Seminar
 - » The students are required to draw up in writing two lesson plans, a workshop plan, the operational teaching plan, the professional development plan, the class teaching plan, a parental meeting plan, several exam forms, and a questionnaire for evaluation.
- » Vježbe u praktikumu
 - » Teaching two lessons and holding a workshop.
- » Metodičke vježbe
 - » Teaching two lessons and holding a workshop.

Week by Week Schedule

1. Because this is practical training, lectures boil down to a minimum and refer only to shorter theoretical explanations. The biggest emphasis is put on shorter professor's instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.
2. Practical application of theoretical bases learned in the Teaching Methodology course during the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National curriculum framework, Teaching plan for elementary and/or secondary school, and individual Exam catalogues in case of secondary school.
3. Pointing out the importance of permanent professional development of teachers through designing the Professional Development Plan and reference to the web sites of the Education and Teacher Training Agency, Ministry of science, education, and sports, and domestic and foreign pedagogical literature.
4. Practical application of the knowledge on planning and teaching lessons with the help of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
5. In accordance with the requirements of contemporary didactics and teaching methodology, where the importance of individual work is pointed out, the students will be required to design and organize a creative workshop on a selected topic. The learning outcomes determined by the National curriculum framework have to thereby be accomplished (the field of social sciences and humanities).
6. Taking into consideration the importance of practicing in teaching and the State Graduation Exam, this course will demand of the students to compile several forms of written exams. The students will thereby be directed to consult the National curriculum framework, Teaching plans, Exam questions catalogues, and officially approved textbooks.
7. The students will in this course be taught how to draw up a simple questionnaire for getting feedback on their teaching.
8. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
9. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
10. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
11. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
12. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.

13. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
14. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.
15. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media.

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of Latin language by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Study Programmes

» Teaching stream (Smjer) *(required course, 3rd semester, 2nd year)*

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:
interpret content in the sense of transposing data from one form to another
apply knowledge, experience, and skills in new situations,
analyse information (specific elements, relations between elements),
evaluate with the help of quantitative and qualitative criteria ,
synthesize in the form of a personal report,
provide arguments for one's attitudes,
suggest new interpretations and even theories.

Week by Week Schedule

1. Because this is practical training, lectures boil down to a minimum and refer only to shorter theoretical explanations. The biggest emphasis is put on shorter instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.

Practical application of theoretical bases learned in the Subject Specific Teaching Methodology course to the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National Curriculum Framework, Teaching plans for latin language, and individual Exam catalogues for latin language for secondary schools.

Pointing out the importance of permanent professional development of teachers through designing a Professional Development Plan and referring the students to the web sites of the Education and Teacher Training Agency, Ministry of science, education, and sports, and domestic and foreign pedagogical literature.

In accordance with the requirements of contemporary didactics and teaching methodology, where the importance of individual work is pointed out, the students will be required to design and organize a creative workshop on a selected topic. The learning outcomes determined by the National Curriculum Framework have to thereby be accomplished (the fields of social sciences and humanities).

The students' attention will be drawn to the importance of class teaching lessons as the form of work aimed at getting to know the students, their needs and problems, coming together with one's students, and a more complete educational work. The students are expected to draw up and present The Class-Teaching Plan.

The cooperation between families and school will be pointed out through one of its forms – the parent meeting. The stress will thereby be put on the need to put parents in the role of active participants, and not passive listeners. The students are required to design and plan one parent meeting. Taking into consideration the importance of practicing in teaching and the State Graduation Exam, this course will demand of the students to compile several forms of written exams. The students will thereby be directed to consult the National curriculum framework, Teaching plans and textbooks for latin language, and Exam questions catalogues.

The students will in this course be taught how to draw up a simple questionnaire for getting feedback on their teaching or testing the expectations, opinions, or attitudes of the students and/or parents.

2. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
3. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
4. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
5. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

6. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
7. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
8. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
9. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
10. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
11. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
12. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
13. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
14. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

Practical Exercises in the Methodology of Teaching [Sociology]

144741

Lecturer in Charge

Doc. dr.sc.
Anita Dremel

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of sociology by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Study Programmes

» Teaching Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are: interpret content in the sense of transposing data from one form to another apply knowledge, experience, and skills in new situations, analyse information (specific elements, relations between elements), evaluate with the help of quantitative and qualitative criteria, synthesize in the form of a personal report, provide arguments for one's attitudes, suggest new interpretations and even theories.

ECTS Credits	5.0
English Level	L1
E-learning Level	L1
Study Hours	
Exercises	30
Seminar	15

Grading

Regular attendance and participation in discussions and analyses of taught lessons carry 1 ECTS credit unit. The drawing up of the operational teaching plan, written lesson plans for two teaching units and a workshop, the professional development plan, the class teaching plan, a parental meeting plan, several exam forms, and a questionnaire for evaluation carry 4 ECTS credit units. Lesson plans prepared and handed in in advance; teaching two 45-minute lessons, and designing and organizing a workshop carry 3 ECTS credit units.

Forms of Teaching

Practice – research methods of mass communication

144890

Lecturer in Charge

Doc. dr.sc.
Ivan Burić

Course Description

The aim of the course is to apply the acquired basic theoretical knowledge of research methods of mass communication through the implementation of independent research. Practicum educates and prepares students for the proper use of scientific methods to study mass communication.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research: specialist working group 4., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and define quantitative research methods
2. Demonstrate ability to independently design topic and subject of a research and write its plan
3. Create an analytical matrix and questionnaire and conduct content analysis and survey
4. Describe the research results and write research reports
5. Demonstrate ability to independently conduct an empirical quantitative research
6. Describe and process the results of quantitative research and data analysis and processing
7. Demonstrate ability practical application of theoretical and methodological knowledge

General Competencies

- Define, describe and distinguish research methods;
- Apply, classify and differentiate professional terminology;
- Identify, evaluate and use quantitative and qualitative scientific research methods of social science that are applied in communication studies;
- Independently conduct scientific research in the field of communications;
- Apply the acquired theoretical and practical knowledge in the field of scientific research in communication studies professionally

Forms of Teaching

ECTS Credits 3.0

English Level L2

E-learning Level L1

Study Hours

Exercises 30

Seminar 15

Teaching Assistant

Andelka Raguž, mag. nov.

Grading

40% written exam, 40% research (research report), 20% attendance

» Vježbe u praktikumu

- » Practicum educates and prepares students for the proper use of methods for scientific research of mass communication.

Week by Week Schedule

1. A short theoretical introduction - repetition: methodology and methods, ways of knowing, the characteristics of the scientific method, the development of a research project, the study of mass media, quantitative and qualitative research methods;
2. Content analysis: definition, features of method, objectives and purpose of the application using the methods, advantages and disadvantages of the method, methodological aspects of content analysis, content analysis procedure (examples and exercises)
3. Defining the subjects and objects of research, setting research questions and hypotheses, determining population and sample selection, the selection and definition of the unit of analysis (examples and exercises)
4. Defining the basic content units and structure of analytic matrix (examples and exercises)
5. Devising a code system. Testing (test analysis), (examples and exercise)
6. Data analysis and processing
7. Writing a survey report (example and exercise)
8. Survey: definition of the term, origins and development of the methods, types of surveys
9. Interviewing techniques: field surveys (oral, written), survey by telephone (telephone interviewing without the participation of the interviewer), online surveys, mail surveys, the importance of the role of the interviewer;
10. Questionnaire: the value of surveys, steps and rules in drafting questionnaires, foundations in the context of correlational studies, the content in the correct formulation of survey questions;
11. Questionnaire: types of questions according to their basic form (open or closed questions, numerical scale), design issues, uniformity issues, multiple issues, separation of attitudes and arguments, the order of questions, the length of questions and questionnaires, validation survey research, identifying potential errors questionnaires ;
12. Sample: the concepts of population and sample, representative sample, characteristics of sample, the sample plan (method of selection of the sample);
13. Probabilistic samples (conditions for the selection and methods of selection criteria), non-probabilistic samples (criteria, characteristics, selection methods, type);
14. Sample size: standard error of the sample, determine the sample size and relationship to size of the population, dispersion of the sample. Realization of sample: the unavailability of the respondents selected by the plan, acceptance and refusal to participate in the survey, failure to respond to questions, interviewer errors in the implementation of the sample;
15. Writing an research report

Practicum in Experimental Biological Psychology

53836

Lecturer in Charge

Doc. dr.sc.
Sanja Darmopil

Course Description

The overall objective of the course is acquisition of theoretical knowledge and practical skills to work in neuroscience laboratories in the field of experimental psychology.

Study Programmes

» Psychology (Studij) (*elective methodology courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the main techniques of neuroscience research,
2. Explain functioning of the basic research laboratories
3. Explain indications for use of one or another technique and their limitations
4. Explain functions of basic and clinical laboratories
5. Explain principles of imaging techniques and learn their performance

General Competencies

Students will receive an overview of the main methods of research in neuroscience and receive an insight into how the collected basic information about the structure and function of the nervous system. Also, students who are interested in scientific work can get a more detailed insight into the areas of research that they find interesting and become familiar with the operation of the laboratory.

Critically assess theoretical knowledge of basic psychology and its relationship with various branches of applied psychology.

Screening of student's work

Grading

Refer to: Practicum in
Biological Psychology

Forms of Teaching

- » Predavanja
 - » Presentation of principal techniques used in biological psychology research
- » Vježbe u praktikumu
 - » Work in neurohistology laboratory

Week by Week Schedule

1. P1 (1h) Experimental research methods in neuroscience
 2. P2 (1h) - Clinical research methods in neuroscience
 3. P3 (2h) - Methods of molecular biology and genetics in neuroscience
 4. P4 (2h)- Methods of analysis of materials that are process with basic methods of neuroscience
 5. P5 (2h) - Ethical principles in clinical research in neuroscience
 6. P6 (2h) - Cognitive testing and longitudinal tracking of psychological development in the laboratory for cognitive research
 7. P7 (2h) - Brain imaging methods
 8. P8 (1h) - Methods of functional brain imaging: EEG, PET, fMRI, MEG
 9. P9 (2h) - A multidisciplinary approach to the monitoring of children with developmental disorders and assessment of cognitive outcomes: review of the implementation of scientific research in the routine diagnosis
 10. S1 (2h) - work in a neurohistology laboratory
 11. S2 (2h) - Working in the laboratory for immunohistochemistry and in situ hybridization
 12. S3 (2h) - Working in a virtual immunology laboratory
 13. S4 (2h) - Virtual and practical demonstration of neurophysiological laboratory functioning
 14. S5 (2h) - Demonstration of work with children in a neuropsychology laboratory
 15. Demonstration of live magnetic resonance imaging
- S7 (2h) - - Demonstration of quantitative analysis of postmortem brain processed histologically or recorded by magnetic resonance imaging
- S8 (1h) - - Demonstration of work in a EEG lab

Prejudice and Discrimination Prevention

57198

Lecturer in Charge

Izv. prof. dr.sc.
Renato Matić

Course Description

The objective of the course is to prepare students for recognizing and understanding social activities and circumstances that result in prejudice and discrimination, as well as for autonomously recognizing the process of institutionalizing both prejudice and the social framework within which discrimination with time becomes an acceptable and desirable social activity. Learning skills include recognizing, preventing and combating prejudice, discrimination and hate crime.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the phenomenon of prejudice, and phenomenon of discrimination in a wide range of theoretical perspectives in sociology,
2. Present arguments regarding the significance of critical (self)awareness and interdisciplinarity,
3. Analyze the forms of social activity and social structures that produce prejudice and discrimination,
4. Recognize and reveal common and generally accepted institutional practice that encourages discrimination in social reality
5. Recognize the process of the institutionalization of discrimination and the social, framework within which discrimination with time becomes an acceptable and desirable social activity.
6. Assess and evaluate different preventive anti-discrimination programs and recommend improvements

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Exercises 30

Grading

Presence at lectures and seminars within the framework of fieldwork are recorded. Together with active participation in discussions and writing essays, it comprises 25% of the final grade. Individual oral presentations of assigned seminar topics and a report/paper based on independent research comprise 35% of the final grade. Written and oral quiz carry up to 40% (excellent).

General Competencies

- explain the initial assumptions of various political, religious and cultural orientations
- to work in a team with colleagues from different disciplines, different attitudes and orientations
- engage in solving social problems
- explain the key structural factors that shape the social world,
- explain the personal and local social issues in a broader social context, particularly in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization,
- explain the origin of social problems and conflicts while keeping in mind the way in which the social order is maintained and questioned,
- promote sociology and social research methods as relevant to solving current social problems and issues

Week by Week Schedule

1. Introduction to syllabus
2. Introductory discussion of the basic concepts 1: stereotypes
3. Introductory discussion of the basic concepts 2: prejudice, stigmatization,
4. Introductory discussion of the basic concepts 3: discrimination, hate crime, genocide
5. Social phenomena, and circumstances which enable prejudice, stigmatization, discrimination, hate crime, genocide
6. Introduction into actual examples of discrimination and hate crime
7. Ideology as the driver of prejudice, discrimination, hate crime and genocide
8. Phenomenon of Holocaust and Nazi state as a complete negation of humanity and human rights
9. Recognition of prejudice, discrimination and hate crime
10. Workshop 1: playing roles of people who are victims of discrimination and hate crime
11. Workshop 2: playing roles of people who are victims of discrimination and hate crime
12. Discussion 1: social possibilities to combat and overcome prejudice and discrimination
13. Discussion 2: social possibilities to combat and overcome prejudice and discrimination
14. Seminar presentations
15. Seminar presentations

Production process in the Media

64751

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

Enabling the students to work at the newspaper office - from searching for information, its processing and editing to sending the finished pages to print, or editing and broadcasting.

Study Programmes

- » Communication Sciences (Studij) (*media, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*media, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Be familiar with the production process of newspapers and television stations
2. Realize the importance and purpose of the newspaper office editorial team
3. Define the forms of journalist cooperation with the newsroom staff - editors, proofreaders, graphic designers, camera operators, video cutting editors etc.
4. Apply the acquired skills in editing of texts and TV features.
5. Be familiar with and use the skills of editing texts and features
6. Independently perform journalistic and editorial assignments

General Competencies

Define, describe and evaluate the production process in the media, its specificities and problems.

Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist theoretical and practical knowledge to working in the media.

Demonstrate accountability, professional ethics, autonomy and initiative in one's work.

Week by Week Schedule

1. Introduction to the goals and subject of the course
2. Sources of information
3. Editorial meeting and selection of topics
4. Text and graphic standards; text, shooting and editing of features

ECTS Credits 5.0

Study Hours

Grading

50% the written thesis, 50% the oral presentation before a three-member committee.

Course Description

Diploma thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Study Programmes

» Psychology (Studij) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Week by Week Schedule

1. Discussion of the topic, its approval and the acceptance of tasks.
2. Writing the thesis.
3. Writing the thesis.
4. Writing the thesis.
5. Writing the thesis.
6. Writing the thesis.

Psychological Counselling

53872

Lecturer in Charge

Prof. dr.sc.
Gordana Buljan-
Flander

Course Description

Through this course the students will learn the basics of psychological counseling which includes: definition of counseling, recognizing the difference between counseling and psychotherapy, the historical development of psychological counseling, adopting and applying the skills of active listening, the skills of showing understanding, clarifying difficulties and relaxation, the evaluation of thoughts and behavior, the assessment of feelings and physical reactions and they will learn of the opportunities for counseling work in Croatia.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the theory of psychological counseling.
2. Compare and critically evaluate the advantages and disadvantages of different theories of counseling and psychotherapy.
3. Describe and analyze the historical facts and early development of psychological counseling.
4. Critically evaluate the basic principles and methods of psychological counseling.
5. Compare counseling and psychotherapy.
6. Describe, analyze and recognize when to apply which techniques and skills of psychological counseling.

General Competencies

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Develop accountability, autonomy and initiative in one's work.

Value the importance of life-long professional education.

Psychological Testing Skills

53878

Lecturers in Charge

Doc. dr.sc.
Anita Lauri
Korajlija

Doc. dr.sc.
Maša Tonković
Grabovac

Course Description

The aims of this course are to introduce students to the fundamentals of psychological testing and developing the skills of tests applications. Through lectures, students will become familiar with different psychological instruments and gain knowledge about their use, ways of interpretation and writing test results.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and describe the various psychological instruments.
2. Describe the advantages and limitations of different psychological instruments and the conditions of their use.
3. Select and administer appropriate psychological instruments depending on the objectives of the assessment
4. Evaluate and assess the psychological instruments for a particular purpose
5. Prepare the data collected using psychological instruments for writing psychological report

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Forms of Teaching

- » Metodičke vježbe

Psychology of Aging

102937

Lecturer in Charge

Prof. dr.sc.
Jasminka Despot
Lučanin

Course Description

The aims of the course are to acquire knowledge: on the factors that affect the ageing process characterized by the age changes, on the old age as the final stage of a life-cycle; on the specifics of applying the psychological knowledge and skills in professional work with elderly persons.

Study Programmes

» Psychology (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the factors that affect the ageing process and age changes.
2. Differentiate between normal and pathological mental changes in old age.
3. Apply research methods in the study of ageing process and assessment procedures for the psychological evaluation of elderly persons.
4. Indicate professional psychological services for the elderly persons, and their carers.
5. Appraise the role of psychologist in the interdisciplinary approach to elderly persons.
6. Assess the possibilities to improve the quality of life in old age.

General Competencies

2. Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.
5. Select models of psychological assessment and counselling in working with individuals, groups and organizations.
6. Select models of psychological assessment and counselling in working with individuals, groups and organizations.
12. Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.
17. Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Psychology of Marketing

53795

Lecturer in Charge

Prof. dr.sc.
Goran Milas

Course Description

The main objectives of the course is to introduce students to the basics of marketing and psychology as well as the place and role of psychologists in the field of marketing.

The students shall learn the basics of marketing and the ways in which psychologists can help in explaining consumer behavior and improving marketing activities.

Study Programmes

» Psychology (Studij) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain psychology of marketing and role of psychology in understanding the consumer behaviour
2. Analyze various segments of psychological approach top marketing
3. Assess insights of psychology of marketing and assume a critical stance towards them
4. Apply the insights of psychology of marketing in own project
5. Write and design a project that will utilize the insights gained by the psychology of marketing

General Competencies

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations. Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Week by Week Schedule

1. Basic information and introductory remarks

Grading

Student research projects
During the semester, students may participate in a student research project in which they will together with another colleague or fellow to spend a shorter research in psychology and marketing to present the results. In this case, do not have to take the oral exam. Proposed research areas: * Lifestyles and consumption * Psychological profiles of purchasing styles * Psychological customer segmentation * Analysis of commercials * Taxonomy of purchasing decision-making process
The grading system Based on a research project: Assessment of the research project is also the final grade in the course. Based on the oral examination: In the event that a student is not involved in the research project not satisfied with the achieved grades, he/she is obliged to take the oral examination in the required reading.

2. Basics of marketing
3. Psychology and marketing
4. Consumer behaviour
5. Decision-making
6. Affective determinants of consumer behaviour
7. Cognitive determinants of consumer behaviour
8. Motivations and personlity as determinants of consumer behaviour
9. Attitudes and lifestyle as determinants of consumer behavior
10. Environmental determinants of consumer behavior
11. Market segmentation and product placement
12. Word of mouth communication and spreading of innovation
13. Marketing communication
14. Marketing research
15. Ethical issues of marketing psychology

Psychology of Mass Media and Mass Communication

161208

Lecturer in Charge

Prof.
Roland Mangold

Course Description

The aim of this course is to introduce students to the psychological effects and studies of media and mass communication and how this is related to the study of the media and the public, and the development of communication sciences.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*mass communication research, 3rd semester, 2nd year*)
- » Communication Sciences (Studij) (*media, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*media, 3rd semester, 2nd year*)
- » Communication Sciences (Studij) (*public relations, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*public relations, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List, reproduce and explain the theories from the curriculum
2. Use and explain technical terminology
3. Explain the interdisciplinary nature of communication sciences research and analyse it in the context of other concerned social sciences
4. Analyze critically and explain the psychology of media and mass communication and their importance for scientific and practical development of communication sciences
5. Justify and defend one's attitudes on the pertinent topics.
6. Demonstrate the ability to conduct, write and present small-scale scientific research in English (as a group-work)

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Teaching Assistant

doc. dr. sc. Jelena Jurišić

Grading

30% Activity in the classroom discussions and on the Moodle course; 30% Project; 40% Exam.

General Competencies

Define, describe and explain the relationship between psychology and the media and its central concerns.

Apply, classify and differentiate the technical terminology.

Identify, distinguish, evaluate and critically evaluate media effects and their impact on media audience and society as a whole.

Conduct scientific research, individually or in teams, in the field of communication sciences with the help of modern scientific research methods and writing papers in a clear and organized manner.

Apply oral and written communication and presentation skills in English.

Week by Week Schedule

1. Basic concepts of media psychology: Media as tools, characteristics of media;
2. History of media and media research (brief recapitulation of History of Mass Media Researches);
3. Basic concepts of media psychology: media genres, selective exposure, media effects, reception motives, uses and gratifications;
4. Research methods of media psychology (in part recapitulation of Methodology of Mass Media and Statistics in Communication Science Researches);
5. Available media (media situation and media context);
6. Entertainment media: Theories of entertainment;
7. Psychology of emotions / Measurement of emotions; Emotional media effects; Explanatory approaches to the phenomenon of paradox emotions ("sad film paradoxon"): meta emotions / social comparison / mood management / sensation seeking / suspense / terror management / emotional gratifications;
8. Information and knowledge media: Psychology of attention and cognitive processes (thinking, learning, judgement processes);
9. Processing news media (journal news, television news, internet news);
10. Learning with the media: multimedia / knowledge management / e-learning; Learning through the media use: The "Gutenberg galaxy" (McLuhan) / cultivation of cognitive skills (Salomon) / cultivation of beliefs (Gerbner);
11. Teaching with the media: the cognitive approach / the constructivist approach;
12. User centered design of information media: usability and user experience;
13. Evaluation of information media;
14. Social media: Media of one-to-one communication: telephone, e-mail;
15. Social psychology of the Internet; Personal websites; Social media (Web 2.0).

Psychology of Organisational Behaviour

53867

Lecturer in Charge

Doc. dr.sc.
Maša Tonković
Grabovac

Course Description

The course provides a detailed introduction to the study of the impact that individuals, groups and structure have on behavior in organizations.

It is designed to make students acquainted with the basic understanding of psychology applied in an organizational context and to develop the basic skills required for the application the knowledge acquired. Competences acquired in the course will enable students to understand and motivate individuals and groups in an organization and the ability of effective organizational action. Specific areas covered by the course include the adoption of competence necessary for understanding of individual differences relevant to organizational behavior, job satisfaction, motivation and emotion, perception and decision-making, social influence and group processes, conflict and negotiation, power and authority, leadership, organizational culture, socialization, innovation and changes.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the importance and role of individual differences and perceptions of organizational behaviour.
2. Predict factors that interfere with efficient organizational activity.
3. Assess the social impacts and group processes in an organization.
4. Select interventions to motivate individuals and groups in the organization.
5. Apply methods of effective communication and conflict resolution in the team.
6. Plan interventions aimed at increasing job satisfaction and improving organizational culture.
7. Select interventions aimed at improving the work design
8. Select interventions for successful adaptation to changes and stress management in the workplace.
9. Demonstrate the proposed activities and the results to bot professional and non-professional audience.

ECTS Credits 4.0

E-learning Level L1

Study Hours

Lectures 30

Seminar 15

Teaching Assistant

Iva Černja, mag. educ. psych.

Grading

Attendance 15%, paper 25%,
two colloquia or final exam
60%.

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Develop accountability, autonomy and initiative in one's work.

Week by Week Schedule

1. Introduction to the course; Individual differences in organization
2. perception and decision-making
3. Work-groups and teamwork
4. Student papers
5. Human resources
6. Communication in an organization
7. Conflict and negotiations
8. Student papers
9. Leadership
10. Organizational structure and culture
11. Student papers
12. Word design and technology
13. Innovation, change and stress
14. Student papers
15. Concluding lecture

Psychology of profession choices

53800

Lecturer in Charge

Doc. dr.sc.
Iva Šverko

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Grading

The rating is assigned based on active participation in class, few short seminars/essays and final exam.

Course Description

As part of the course, students will learn about the most important theories of vocational choice and career development on which are based programs of vocational guidance. They will also become acquainted with a set of procedures, tools and tests that are applied in the process of vocational guidance.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define key constructs in the field of psychology in career choice
2. Analyze major theories of career choice and career development
3. Evaluate tools and techniques for career guidance
4. Analyze and evaluate methodological studies in the field of vocational psychology
5. Apply theoretical concepts, tools and techniques in practical work of career counselor
6. Identify problems of vocational guidance in Croatia
7. Analyze career counseling school program for fostering vocational development in schools
8. Analyze personal vocational preferences and learn how to introduce oneself in competitive labor market

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Week by Week Schedule

1. Introductory lecture
2. Career planning and professional guidance: who, whom, how?
3. Characteristics of process of career planning and relations thereof.
4. Difficulties in career choices and available options for intervening.
5. Diferentialistic approach to career planning.
6. Web tools for professional guidance
7. Developmental approach to professional development.
8. School programme of professional development - get to know yourself.
9. School programme of professional development - get to know the world of work.
10. School programme of professional development - make a decision.
11. Social context of career planning: theory of limitations and choice.
12. Constructionist approach to the career
13. Writing a CV
14. Job interview
15. Colloquim

Psychology of Sleep and Wakefulness

53827

Lecturers in Charge

Doc. dr.sc.
Adrijana Bjelajac

Doc. dr.sc.
Biserka Ross

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Two tests or written exam
3/5; project and its
presentation 2/5.

Course Description

Analyze psychological, biological and behavioral characteristics of sleep and wakefulness, the relationship of sleep and wakefulness, methods in sleep research, characteristics of healthy sleep and different sleep disorders, characteristics of dreaming and psychological methods and techniques used in diagnosis and therapy of sleep disorders. Through lectures and students' presentations the students will critically evaluate theoretical and methodological concepts of sleep, and analyze their own sleep.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze psychological, biological and behavioral characteristics of sleep and wakefulness
2. Compare basic methods in sleep and sleepiness research
3. Explain sleep regulation mechanisms
4. Evaluate methods in dream research
5. Argue different positions on the functions of sleep
6. Classify indices of different sleep disorders
7. Apply specific treatments for different sleep disorders
8. Apply principles of healthy sleep on their own sleep
9. Evaluate their own sleep

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Screening of student's work

1.2 ECTS Pohađanje nastave [EN]

1 ECTS Kolokviji [EN]

0.8 ECTS Projekt [EN]

3 ECTS

Forms of Teaching

- » Predavanja
 - » two classes per week
- » Terenske vježbe
 - » keeping sleep diaries

Week by Week Schedule

1. Introduction-What is sleep? Definition of sleep from behavioral and physiological perspective. Importance of sleep research. States of consciousness. Sleep measurement. Introduction to student project.
2. Methods in sleep and sleepiness research. Sleep diaries. Sleep quality questionnaires. Morningness-eveningness questionnaires. Multiple sleep latency test. Sleepiness scales. Psychomotor vigilance task.
3. Characteristics and regulation of sleep and wakefulness: circadian and homeostatic mechanisms. Behavioral, physiological and psychological characteristics of sleep and wakefulness. Basic mechanism of sleep regulation.
4. Phylogenesis of sleep.
5. Methods in sleep research. Polysomnography and sleep stages. Sleep stage scoring practice.
6. Ontogenesis of sleep. Sleep development from birth to adolescence. Sleep of Croatian adolescents.
7. Ontogenesis of sleep. Adult sleep. Sleep and ageing. Sleep and longevity.
8. Methods in sleep research. Actigraphy. Validity of actigraphy method in sleep research. Use of actigraphy in diagnosis and therapy of sleep disorders. Comparison of different sleep research methods. Further instructions about the project.
9. Function of sleep. Traditional questions on the function of sleep. Sleep need. Sleep as an adaptive state. New approaches to research of sleep function.
10. Sleep and emotion. Sleep and emotional reactions.
11. Sleep and learning. Sleep and memory. Effects of sleep deprivation on learning and memory.
12. Sleep disorders. Classification of sleep disorders. Epidemiological studies of sleep disorders.
13. Diagnostics and therapy of sleep disorders. Pharmacological and nonpharmacological approach to treatment of sleep disorders
14. Dreaming. Neurocognitive theory of dreaming. Dream content analysis. Function of dreaming. Other theories of dreams. Insomnia. Psychological models of genesis and development of insomnia. Insomnia treatments.
15. Presentation of the students' sleep project

Psychotherapy Modalities

53871

Lecturer in Charge

Doc. dr.sc.
Adrijana Bjelajac

Course Description

The course is developed to introduce students with basic principles of psychotherapy process and various approaches to psychotherapy practice.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess the characteristics of psychotherapy process
2. Assess different aspects of professional responsibilities of psychotherapist.
3. Distinguish specificities of particular psychotherapy approaches and methods.
4. Distinguish psychotherapy from clinical psychology and psychiatry.
5. Argue importance of psychotherapy methods in protection of mental health.
6. Judge ethical questions in psychotherapy profession.

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Public Promotion of Science

57236

Lecturer in Charge

Doc. dr.sc.
Jelena Jurišić

Course Description

The aim of the course is to enable the students to adopting the theoretical and analytical framework for the understanding of science as a specific human activity aimed at developing credible convictions (insights) about the physical and social phenomena. In this context, the course has the additional aim of teaching students to devise and plan activities for public promotion of science.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the links and differences between lay (i.e. non-scientific) and science-based convictions
2. Specify and describe the fundamental determinants of the methodology of scientific research (as opposed to the lay experience of the world)
3. List and describe the elements of scientific research systems and their interrelationships
4. Explain the role of science as a human activity in the wider social and cultural context
5. Plan practical activities in public promotion of science

General Competencies

Define, describe and evaluate methods of promotion of science and their central problems. Define and explain the role of science as a human activity in the wider social and cultural context. Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist theoretical and practical knowledge in public relations. Identify, distinguish, evaluate and critically assess media content and its impact on the attitudes, behavior and decisions of individuals, audience and the society as a whole.

Week by Week Schedule

1. Man's experience of the world. What is knowledge? The problem of demarcation in classical epistemology

Public Relations Practicum

64753

Lecturer in Charge

Doc. dr.sc.
Jelena Jurišić

Course Description

Public Relations Practicum was conceived as a course which through interactive work, individual and in groups, links previously mastered theoretical and practical knowledge with the requirement of performing professional tasks in the future working environment. The practicum covers various writing skills, strategic planning, organization, practical approach to the issues of PR and simulations of real situations from the environment. The course expects active participation because it includes an introduction in which the students will be given advice on the subject and a practical part in which the students will be required to carry out exercises and simulations. The course includes a final assignment on the topic chosen by individual students. The assignment can be of any form and content which fall under the practical application of public relations. The final assignment serves as the basis of the final grade and periodical tasks are also taken into consideration for this purpose.

Study Programmes

- » Communication Sciences (Studij) (*public relations, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*public relations, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish, properly implement and use the techniques and tools in media relations, internal relations and relations with other participants,
2. Apply the ethical principles of the profession in daily work,
3. Demonstrate the ability to perform tasks at the level of an assistant or junior consultant in organizational public relations or as a consultant,
4. Apply the techniques and tools of risk and crisis management,
5. Demonstrate the ability to independently, professionally and efficiently devise a communication plan and present it,
6. Apply the communication techniques in social networks and new media

General Competencies

Apply, classify and distinguish professional terminology used in the public relations practice; Expertly and professionally apply the acquired specialist and practical knowledge to working in public relations; Demonstrate accountability, professional ethics, autonomy and initiative in work; Apply skills of verbal and written communication and presentation skills in the Croatian language ;

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours
Exercises 30

Teaching Assistant
Matilda Kolić Stanić, mr. sc.

Grading

Final grade is based on the student's continuous work during the semester and the evaluation of the seminar assignment.

Week by Week Schedule

1. Introductory talk about the course content. The skills of writing press releases. Exercise.
2. Access to the information components in PR. Demonstration examples - exercise - one-way information management.
3. Analytical approach - tools for environment study for the purpose of better decision making and risk management, and preparation for relations with other stakeholders.
4. Communication in social networks. Content management instructions. Exercise.
5. Working in an agency or a consulting firm - tips from practice. Tools used by consultants. Budgeting. Exercise.
6. Active creative communication. Campaign planning. Exercise.
7. Approach to stakeholder relations (stakeholder management). Relations management, socially responsible approaches, exercise.
8. Introduction to lobbying and public affairs. Exercise, quiz.
9. Approach to problematic situations (issues management). Issues diagnostics. Exercise on practical examples.
10. Crisis management. Simulation in groups.
11. Measuring and evaluation in PR. Tools. Exercise.
12. Introduction to the final (practical) assignment. Instructions, description of the assignment problem. Description of the criteria for assignment evaluation.
13. Ethics in the profession. Professionalism.
14. Entering the labor market. Practical tips.
15. Concluding class. Tutorial.

Qualitative Methods in Sociology

53915

Lecturer in Charge

Doc. dr.sc.
Marija Brajdić
Vuković

Course Description

The aim of the course is to provide for the students an insight into the nature and logic of qualitative research methods in sociology, and, by providing the constant mentorship, to teach them how to design and carry out a qualitative research project and write a complete research report. One of the important goals is to develop students' ability to act as reflexive researchers.

Study Programmes

» Science Stream (Smjer) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop a research design
2. Create the qualitative research instruments
3. Apply a sample logic in qualitative research
4. Apply scientific observation, individual interview and focus-group approaches
5. Explain the results of qualitative research
6. Write a research report
7. Develop a "researchers' mind"
8. Use reflexive research approach

General Competencies

Upon the successfully passed exam, students will be able to:

Design a research project.

Organize the implementation of a research project.

Combine the society related data in the coherent written and oral form.

Develop the research question on the subject/process/phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Combine the different social research methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report in the appropriate disciplinary style and discourse.

Publicly support sociology and the social research methods as being relevant in addressing of the actual social problems and issues.

Screening of student's work

1 ECTS Pohadanje nastave [EN]

1 ECTS Pismeni ispit [EN]

4 ECTS Istraživanje [EN]

6 ECTS

Forms of Teaching

» Predavanja

» Lectures with examples and exercise.

» Metodičke vježbe

» Working in teams on team projects.

Week by Week Schedule

1. Lectures: Introduction to the course. Knowledge assessment. Orientation. Reflexivity.
Excercises: How to write reflexive research diary. Excercise in writing a first part of the diary.
2. Lectures: What is Qualitative Research? Meanings, Interpretation and Social Construction of Knowledge. The role of theory in qualitative research.
Excercises: Selection of research topic, introduction to the topic
3. Lectures: Designing Qualitative Research
Excercises: Goals, purpose and research questions; teamwork selection
4. Lectures: Fieldwork – introduction, ethical, safety and political issues.
Excercises: Selection of the research method based on research questions
5. Lectures: Reflexivity and self in qualitative research
Excercises: Creating protocol for qualitative research
6. Lectures: Field notes and recording
Excercises: Testing the instruments, research techniques
7. Lectures: Sampling in different qualitative methods
Excercises: Sampling
8. Lectures: Interview method
Excercises: Informed consent, reporting on research to the ethical committee
9. Lectures: Individual (in-depth) interview
Excercises: Fieldwork report, introduction to data analyses, data saturation

10. Lectures: Opažanje
Excercises: Data analyses
11. Lectures: Analyses and presentation of the individual research results; reliability and validity and most common sources of errors and biases
Excercises: Interpreting research results, defending of reliability and validity of the data
12. Lectures: Presentation of qualitative research results
Excercises: Making report of research results for the purpose of written and oral presentation
13. Lectures: Using qualitative research data as the basis for quantitative research and for advocating changes in public policies
Excercises: Oral presentation of research results, code liste presentation
14. Lectures: Visual methods- photography and mapping
Excercises: Writing a research report
15. Lectures: Qualitative approach in social network research
Excercises: Presentation of research results for the purpose of advocating of public policy changes

Qualitative Research Methods in Communication Sciences

118528

Lecturer in Charge

Doc. dr.sc.
Ivan Burić

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

60% written exam, 20% term paper, 20% attendance.

Course Description

The aim of the course is to introduce students to the basic qualitative methods used in scientific research of media and communications through theoretical lectures and deepen the acquired theoretical knowledge about the methods of the seminar.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the types of qualitative research methods
2. Argue for or against the choice and use of research methods
3. Apply research methods
4. Analyze and interpret data
5. Demonstrate research results

General Competencies

The course allows students to acquire basic theoretical knowledge of qualitative research methods and after graduation acquirement can be expressed and applied in their scientific work (research) in the field of communications.

Week by Week Schedule

1. Purpose and aims of course. Basic concepts of qualitative methods in social sciences, differences between quantitative and qualitative research methods.
2. Theoretical foundations of qualitative research methods: Hermeneutics, phenomenology, ethnomethodology, symbolic interactionism, Chicago sociological school

3. Grounded Theory:
Basic principles of grounded theory, grounded theory as a theoretical source of legitimacy of qualitative research methods, theoretical sampling, coding, construction of theoretical concepts on the basis of data
4. Basic principles of sampling and the concept of validity in qualitative research:
Sampling in qualitative researches, types of samples in qualitative researches, the concept of validity in qualitative research methods
5. Observations and visual methods:
Basic features of observation as research methods, types of observations, conducting of research by observation, visual methods.
6. Interview:
Typical purposes of interview, preparing research, design research - regularity in conducting research by interview, data interpretation.
7. Focus groups:
What are focus groups? The main benefits of the method, methodological and theoretical reasons of using focus groups, a guide in the focus groups, the role of moderator and the basic principles of moderation, projective techniques - the role and purpose.
8. Ethnographic Research:
Ethnography: definition, the characteristics of the method, process of the method, examples of ethnography.
9. Qualitative content analysis:
Definition, the characteristics of the method, process of the method, examples of qualitative content analysis.
10. Case Study:
A case study: definition, characteristics of the method, advantages and disadvantages of the method;
11. Seminar:
Observations and visual methods
12. Seminar:
Interview
13. Seminar:
Focus groups
14. Seminar:
Case study
15. Mixed Methods Research:
What are mixed research methods, basic benefits, examples

Quantitative Research Methods

144629

Lecturer in Charge

Doc. dr.sc.
Dario Pavić

ECTS Credits 6.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Exercises 30

Grading

Oral and written exam,
obligatory class attendance,
written assignment.

Course Description

Course description

e-learning level 1

english level 1

Competency

Upon successfully passed exam students will be able to

Apply the advanced statistical terms and information.

Design a research project.

Organize the implementation of a research project.

Use the computer software for the analyses of quantitative data.

Outline causal relationships between the social phenomena.

Develop the research question on the subject process phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report in the appropriate disciplinary style and discourse.

Learning Outcomes

1. Explain the logic and phases of quantitative social research
2. define preliminary design of survey and other quantitative research
3. plan and design procedures for the implementation of qualitative research
4. practice fieldwork and analyses of data and interpret results, write report
5. analyze metrical characteristics of the conducted research and critically evaluate its advantages and shortcomings

Week plan

1. Lecture Characteristics of quantitative research methods; survey

Exercise Selection of survey topic

2. Lecture Introduction to survey method

Exercise Development of research design

3. Lecture Questionnaire

Exercise Planning and conducting of orientation research

4. Lecture Questionnaire

Exercise Operationalization

5. Lecture Sample

Exercise Creating questionnaire

6. Lecture Sample

Excercise Pilot research, finishing questionnaire
 7. Lecture Survey techniques
 Excercise Planning the sample
 8. Lecture Survey techniques
 Excercise Operationalization of the sample
 9. Lecture Survey techniques
 Excercise Preparing conduction of the fieldwork
 10. Lecture Data analyses planning, data presentation, report construction
 Excercise Data analyses, data presentation
 11. Lecture Measurement characteristics of survey, errors and biases
 Excercise Making report on survey results
 12. Lecture Content analysis
 Excercise Selection of content analysis topic; making of research design, preliminary analyses
 13. Lecture Analytical matrix
 Excercise Designing analytical matrix
 14. Lecture Sample in content analysis
 Excercise Sampling, analyzing
 15. Lecture Analysis of redundancy, making report
 Excercise Data analyses, reporting on results

Grading

Oral and written exam, obligatory class attendance, written assignment.

Study Programmes

- » Science Stream (Smjer) (*required course, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the logic and phases of quantitative social research
2. Define preliminary design of survey and other quantitative research
3. Plan and design procedures for the implementation of qualitative research
4. Practice fieldwork and analyses of data and interpret results, write report
5. Analyze metrical characteristics of the conducted research and critically evaluate its advantages and shortcomings

General Competencies

Upon successfully passed exam students will be able to:

Apply the advanced statistical terms and information.

Design a research project.

Organize the implementation of a research project.

Use the computer software for the analyses of quantitative data.

Outline causal relationships between the social phenomena.

Develop the research question on the subject/process/phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report in the appropriate disciplinary style and discourse.

Week by Week Schedule

1. Lecture: Characteristics of quantitative research methods; survey
Excercise: Selection of survey topic
2. Lecture: Introduction to survey method
Excercise: Development of research design
3. Lecture: Questionnaire
Excercise: Planning and conducting of orientation research
4. Lecture: Questionnaire
Excercise: Operationalization
5. Lecture: Sample
Excercise: Creating questionnaire
6. Lecture: Sample
Excercise: Pilot research, finishing questionnaire
7. Lecture: Survey techniques
Excercise: Planning the sample
8. Lecture: Survey techniques
Excercise: Operationalization of the sample
9. Lecture: Survey techniques
Excercise:Preparing conduction of the fieldwork
10. Lecture: Data analyses planning, data presentation, report construction
Excercise: Data analyses, data presentation
11. Lecture: Measurment characteristics of survey, errors and biases
Excercise: Making report on survey results
12. Lecture: Content analysis
Excercise:Selection of content analysis topic; making of research design, preliminary analyses
13. Lecture: Analytical matrix
Excercise: Designing analytical matrix
14. Lecture: Sample in content analysis
Excercise: Sampling, analyzing
15. Lecture: Analysis of redundancy, making report
Excercise: Data analyses, reporting on results

Quantitative Research Methods in Communication Sciences

118527

Lecturer in Charge

Doc. dr.sc.
Ivan Burić

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

60% written exam, 20% term paper, 20% class attendance

Course Description

There are two basic aims of course. First aim of the course is to introduce students to the basic quantitative methods used in scientific research of media and communications through theoretical lectures and deepen the acquired theoretical knowledge about the methods of the seminar.

Second aim of the course is to prepare students for conducting research by quantitative methods (questionnaire, content analysis) and familiarize them with basic procedures of data processing in SPSS.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*mass communication research, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe all types of quantitative research methods
2. Argue for or against the choice and use of research methods
3. Apply research methods
4. Analyze and interpret data
5. Demonstrate research results

General Competencies

The course allows students to acquire basic theoretical knowledge of qualitative research methods and after graduation acquirement can be expressed and applied in their scientific work (research) in the field of communications.

Week by Week Schedule

1. Course introduction and basic research questions appropriate in context of quantitative research methods
2. The basic principles of quantitative research methods in the social sciences.

3. What is the measure? What is the measuring instrument in the social sciences? Direct vs. indirect measurement. The characteristics of social phenomena and problems in their measurement. The concept of variable and function variables in the study. Scales and scaling.
4. Theory testing and quantitative methods of research. How to test the theories? Operationalization and building of a system of empirical indicators. Examples of operationalization.
5. Creation of Likert scale
6. Measurement errors and their characteristics:
Random and systematic error, the validity of the measurement and the type of validity, reliability, reliability tests
7. Data Base Preparation:
Creation of data matrix, data input in SPSS, defining of variables and preparing data for statistical processing.
8. Basic of descriptive statistic:
Mean, median, mode, variance, standard deviation,
9. Data processing in SPSS I:
Tables of frequencies, measure of central tendency
10. Data processing in SPSS II:
Crosstabs, tests of statistical differences (t-test, analysis of variance)
11. Data processing in SPSS III:
Correlation, examples of regression and factor analysis
12. Experiment: definition, advantages and disadvantages of lab experiment, the basic techniques of the experiment;
13. Perform experiments, draft and structure of the experiment
14. Longitudinal research-quantitative perspective: development, types of longitudinal research
15. Presentation of results, replication of the studies;

Regional and Universal in Croatian Art

57144

Lecturer in Charge

Prof. dr.sc.
Diana Vukičević-
Samaržija

Course Description

Course objective is to define artistic works and Croatian heritage in European context. Describing the artistic periods, phenomenon's and personalities which were part of then obtaining European art and culture in comparison with creativity which can be described as regional.

Study Programmes

- » Science Stream (Smjer) (*elective courses 2, 1st semester, 1st year*)
- » Science Stream (Smjer) (*elective courses 2, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze particular artistic periods in Croatian art and compare with period in European art.
2. Create definition of works of art in Croatia which are part of European cultural heritage.
3. Define antiquity heritage which has defined streams of Croatian art.
4. Describe creativity of particular renaissance artists which with sense of belonging to Italian renaissance.
5. State the thesis about Croatian art.
6. Explain peripheral, provincial and border art.
7. Distinguish artistic circles their influence on particular Croatian regions.
8. State creative particularities of transition period from gothic to renaissance.
9. Explain duration of styles and its late acceptance.
10. Describe art of the second half of 20th century: geometric abstraction, lyrical abstraction when groups Gorgona, Exat 51 and happenings of new tendencies affiliate Croatian art in European mainstream and becomes fashionable art expression.

General Competencies

Train students for aesthetic interpretation of artistic heritage. Analyze particular artistic periods, works of art, personalities and to recognize their significance in European art, also as references in Croatian and foreign literature. Except visual analysis students will define details of cultural history. Making presentations and processing texts in Word. Acquired knowledge's will qualify students for activities in culture and for presentation of Croatian culture outside Croatian borders.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Written exam, essay obligatory. Activity of students will be monitored throughout semester.

Week by Week Schedule

1. Introductory lecture. Introductions in themes. Students duties and topics of their presentations
2. Thesis of croatian art.
3. The town of roman antiquity – core of the modern town- Diocletian palace –Split, Zadar, Poreč ,Pula
4. The heritage of antiquity - influence on the early medieval art at Croatian principality - later kingdom.
5. Early medieval art in Croatian state and Carolingian influence.
6. Monumental landscape during late middle ages - westeuropean influence and regional differences.
7. Juraj Dalmatinac and Venetian gotico fiorito at Adriatic coast.
8. Ivan Duknović's works represent early renaissance style. He worked in Rome, Trogir and Buda at Corvin's court. Schiavoni – Klović, Francesco and Lucian Laurana, Andrea Meldola and Federico Benković
9. Gothic style in renaissance period – new stylistic category or regional differences . The palace in Dubrovnik
10. Monumental landscape upper – north Croatia at early modern Period
11. Beginning of modern art – painting – sculpture secession symbolism and influence central Europe
12. Kršnjavi and (interpretation) Croatian culture on the end of twenty century
13. Art and society
14. Art in Croatia and european mainstream – artistic groups (1955-1957) Nove tendencije, Exat 51, Gorgona
15. Older Art historian historiography, visual presentation of Ancient World as Sketches and literary works by travel writers-artists (Adam) - Theoretical thesis about Croatian art – Ljubo Karaman, and contemporary literature.

Regression Analysis

53873

Lecturer in Charge

Doc. dr.sc.
Toni Babarović

Course Description

Understanding of the theoretical basis of the regression analysis; analysing and evaluating research papers in which the method was applied; creating research designs where regression analysis should be used as an adequate method of analysing the collected data; independent practical application of regression analysis in psychological research using the SPSS software package

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and use the statistical and mathematical logic of regression models.
2. Evaluate and assess the statistical requirements for the implementation of regression models
3. Design a research plan suitable for processing by regression analysis and logistic regression
4. Analyze data using regression models using the software package SPSS
5. Interpret the results obtained by regression analysis or logistic regression within the set of research problems
6. Explain statistical parameters obtained by regression models
7. Describe the role and logic of the general linear models in ANOVA designs
8. Evaluate the quality regression models and results applied in research
9. Assess the range and limits of the statistical conclusions derived from regression analysis results

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Exercises 15

Grading

Activity in class (lectures and exercises) - 10%; Seminar papers - 30%; Homework - 10%; Written exam - 20%; Oral exam - 30%.

General Competencies

Application of theoretical knowledge of the regression analysis in various fields of applied psychology and research in psychology

Obtained skills of data analysis using regression analysis in SPSS software package.

Analysis and evaluation of scientific papers in the various fields of psychology in which regression analysis was applied as a method of analysing and data processing.

Designing and conducting own research from the platform of the regression analysis as adequate data processing method.

Learning outcomes on the level of the programme:

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Week by Week Schedule

1. Bivariate correlation and statistical prediction
2. The logic of multiple regression and basic concepts
3. The basic model of the regression equation
4. Requirements for the use of regression analysis
5. The relation between sample and population - testing the significance of regression parameters
6. Partial and semipartial correlations
7. The role of suppressor variables
8. Stepwise regression analysis
9. Hierarchical regression analysis
10. Validation of regression results
11. Logistic regression
12. Moderator and mediator variables in the regression model
13. The logic of the General Linear Models
14. ANOVA as GLM
15. ANCOVA as GLM

Religious Elements of Croatian Culture

57140

Lecturer in Charge

Prof. dr.sc.
Mijo Korade

Course Description

Each national culture is multilayered and determined in multiple ways. This also applies to the Croatian culture, which emerged in the area marked by integration of at least three major cultural circles. In the area of today's Croatia before Croats had settled here, Christianity was extensively flourishing, becoming an integral part of the identity and pouring itself into the culture and its manifestations. The division of Christianity in the 11th and then the 16th century, and contacts with other religions, especially on the borders of the Croatian territory, led to further enrichment of cultural expressions. Lectures, on which the students' individual should build upon, are conceived as a foundation which will facilitate understanding and authentic evaluation of religious content present in the broadest aspects of the Croatian culture, and should contribute to the shaping of croatologic perspective.

Study Programmes

» Science Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the meaning of the basic terms of the course: culture and religion.
2. Describe the relationship between religion and culture, the importance of religion for culture and culture for religion.
3. List and explain the basic religious components of Croatian culture, place them in their context.
4. Analyze individual religious component as part of the cultural identity of Croats.
5. Describe the importance of individual components for the present moment in the Croatian culture and indicate its potential development.
6. Describe religious content present in the broadest aspects of the Croatian culture, helping to shape croatologic perspective.

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Lecturer

Mislav Kovačić, dr. sc.

Grading

Class attendance 10%,
preliminary exams 30%,
seminar paper 20%, written
exam 40%.

General Competencies

The students are expected to master the terminology of culturology and religious studies and be able to establish the relationship between religion and (Croatian) culture. On the examples chosen from religious-cultural elements, which include Christianity and other religions that enriched the Croatian culture in the past and present, the students will be trained to actively participate in discussions about the presence of the religious in the cultural, and the need of the culture for the religious from the microscale of Croatia to the global processes.

Week by Week Schedule

1. Introductory questions; delineation of the course title concepts
2. Bible in the Croatian culture: translations, publications, cultural echoes
3. Passion heritage and the symbolism of the cross
4. Croatian Christmas songs
5. Religious themes in Croatian literature
6. Religious themes in Croatian visual art
7. Religious themes in Croatian music
8. Religious themes in Croatian film
9. Croatian theology: distinguished movements and figures
10. Branko Fučić, a religious person of culture or a cultured religionist
11. Religious components of the Croatian micro-culture: the history of the islands of Lošinj and Rab
12. Contribution of Reformed Christianity to Croatian culture
13. Contribution of the Judaism to Croatian culture
14. Vladimir Devidé, a touch of Japanese religion in Croatian culture
15. Culture as the basis of ecumenical and interreligious dialogue

Research Group – Interpretation of Medieval Sources

79379

Lecturer in Charge

Doc. dr.sc.
Tomislav Popić

ECTS Credits 6.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30

Grading

Attending course 10%; Analysis of the sources 40%; Oral exam 50%.

Course Description

The aim of the course is to familiarize students with types of sources, tools and methods of researching medieval history and working on sources to develop skills and competencies necessary for independent research. Attention will primarily be on different types of written sources (public and private documents, notary, city and chapter registers and protocols, legal normative documents, narrative sources), but the importance of the material culture (objects of everyday use, architecture, art works) will also be pointed out. Analysis of certain documents will be carried out in order to deepen the practical application of knowledge in traditional auxiliary historical sciences and to develop practical skills required in working with sources. Special attention will be paid to the content analysis of selected sources in order to indicate a wide range of possible research topics.

Study Programmes

» Science Stream (Smjer) (*research groups, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define main problems in approaching medieval sources
2. Describe main stages in development of public and private notary and chapter protocols
3. Explain the function of narrative sources in the middle ages
4. Identify published source collections relevant to the study of medieval Croatia
5. Name the most important archives and archival collections in Croatia and abroad relevant to research of Croatian medieval history
6. Use topographical manuals in resolving toponyms in sources
7. Analyze main parts of a document

General Competencies

After successfully graduating student will be able to:
 identify the most important person and institutions in the Croatian and the World history,
 compile a list of literature for each historical period,
 tell what is the interpretation of history,
 distinguish difference between important and non-important facts within historiographic interpretation,
 interpret a historical sources,
 appraise the value of historiographic interpretations.

Screening of student's work

- 1 ECTS Pohađanje nastave [EN]
- 2 ECTS Istraživanje [EN]
- 1 ECTS Referat [EN]
- 2 ECTS Usmeni ispit [EN]
- 6 ECTS

Forms of Teaching

- » Predavanja
 - » lectures
- » Vježbe u praktikumu
 - » practice

Week by Week Schedule

1. Sources for Croatian medieval history, relevant archives in Croatia and abroad, collections of published sources for Croatian medieval history
2. Field of historian's study - theoretical and practical considerations
3. Manuals for working with sources - latin dictionaries, dictionary of abbreviations, chronological tables, indictions, genealogical and archontological manuals, heraldic collections, maps and topographic works
4. Normative sources - statutes, capitularies, customary law collections
5. City books
6. Notariate and notary documents 1
7. Notariate and notary documents 2
8. Chapters and chapter documents
9. Public documents - royal and ban's privileges and grants
10. Judiciary sources 1
11. Judiciary sources 2
12. Narrative sources
13. Archaeological sources
14. Visit to the Archive of Croatian Academy of Sciences and Arts in Zagreb
15. Recap

Research Group – Interpretation of Sources for Croatian History: the 19th Century

130523

Lecturer in Charge

Doc.
Kristina Milković

ECTS Credits 6.0

English Level Lo

E-learning Level L1

Study Hours
Seminar 30

Grading

From students is expecting practical work with historical sources and to write an essay. There is not exam.

Course Description

Subject has 2 goals: 1. to introduce to theorys and methods in the field of research of the croatian history and 2.) analysis and interpretation of selected sources.

Study Programmes

» Science Stream (Smjer) (*research groups, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. To introduce to theorys and methods in croatian historiography which deals with 19. century
2. Analyse methodes and theoryes which can be applied to historical sources
3. Get acquainted with scientific research
4. Be able to interpret historical sources
5. Visit archives
6. Get acquainted with research work in archives

Screening of student's work

2 ECTS Pohađanje nastave [EN]

2 ECTS Esej [EN]

2 ECTS Praktični rad [EN]

6 ECTS

Forms of Teaching

- » Predavanja
 - » lectures will be deal with selected historical problems
- » Vježbe u praktikumu
 - » interpretation of selected historical sources

Week by Week Schedule

1. Introductory lecture: The Beginnings of Professional Historiography in Croatia in the second Half of the 19 Century

2. Approaches, Methodes and Theoris in Interpretation of Croatian History of 19 Century in 20 Century and Contemporary Historiography
3. Croatian History of the 19 Century in Foreign Historiography
4. Historiography and Tradition: collective memory
5. Political Uses of the Past and Political Mythology
6. Sources for the Croatian History of the 19 Century in Hrvatski državni arhiv - Visitation of Archives
7. Sources for the Croatian History of the 19 Century in Arhiv Hrvatske Akademije znanosti i umjetnosti - Visitation of Archives
8. Sources for the Croatian History of the 19 Century in Državni arhiv u Zagrebu - Visitation of Archives
9. Analysis of Selected Historical Sources
10. Analysis of Selected Historical Sources
11. Analysis of Selected Historical Sources
12. Analysis of Selected Historical Sources
13. Analysis of Selected Historical Sources
14. Analysis of Selected Historical Sources
15. The Final Discussion

Research Group – Researching and Writing about the 20th Century

96375

Lecturer in Charge

Izv. prof. dr.sc.
Ivica Lučić

Course Description

Aim of course lies in the training of students for the practical work of research and writing. The course is organized as a specific workshop, through which participants gain new and expand existing knowledge which could help them in drafting their own works. Getting familiar with the archives, published sources, literature in general and expanding knowledge about the possibilities of research in Croatia shall endeavor to help the students to better conceptualize their written work, applying valid methods in research and ultimately better write their own final project.

Study Programmes

» Science Stream (Smjer) (*research groups, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define different types of resources needed for writing historiographical works.
2. Order different locations where they could find some sources for the particular subject.
3. Reproduce existing historiographical achievements to shed light on particular topics.
4. Explain the importance and pass independently through unpublished sources
5. Write their own work based on unpublished sources and literature.
6. Apply this knowledge to explore other topics.

General Competencies

After successfully graduating student will be able to:
Identify the most important person and institutions in the Croatian and the World history,
Compile a list of literature for each historical period,
Tell what is the interpretation of history,
Distinguish difference between important and non-important facts within historiographic interpretation,
Interpret a historical sources,
Appraise the value of historiographic interpretations.

ECTS Credits 6.0

English Level L1

E-learning Level L1

Study Hours

Seminar 30

Teaching Assistant

Stipica Grgić, dr. sc.

Grading

Student activity will be monitored throughout the semester. Attendance is mandatory. Commitments need to be resolved in time. They are not only a prerequisite for signature, but will be taken into account when determining the final grade. The final exam will be in the form of an oral examination. Research for a joint project - 5% of the total grade. Presentation of the topic of research and presentation of a book - 10% of the grade. Independent research (written work) - 50% of the total grade. Final oral exam - 35% of the total grade.

Week by Week Schedule

1. An introductory lecture. Introducing the students to the objectives and contents of items and their obligations.
2. Problems conception of scientific and other professional papers. What elements they should contain? Structure of a paper. Selection of appropriate research topics.
3. Classification and distribution of resources. Primary, secondary and tertiary sources. Why and how to share and use them. Primary sources and archives. Explanation regarding the joint work on materials in the Croatian State Archives.
4. Writing a bibliographical and scientific notes. Other forms of work: historiographic Reviews. Croatian historiography today: Professional journals dealing with the publication of the works of historians in the Republic of Croatia and their classification.
5. Visiting Croatian State Archives in Zagreb. Meeting with tasks of this institution and with material that students will process within the agreed project.
6. Work in progress workshop. Brief presentation of independent research topics (objectives, hypotheses, used sources/literature, what is new in the paper?). The deadline to submit reviews.
7. Field work in one of Zagreb's museums or memorial houses (according to the interests of the group and the possibilities available at that time).
8. Newspapers as a source. Advantages and disadvantages of different sources. Press in Croatian 19th Century - a brief overview.
9. Croatian newspapers in the 20th Century: Overview of the most important newspapers for certain periods and the possibility of their use for scientific purposes.
10. Archives and museums as custodians of historical sources. Using MS Word, Excel, PowerPoint, Adobe Reader, Photoshop and other software for the design and processing of data.
11. Sources Online. How do we use them? Display of the most important sites in Croatia and neighboring countries that offer digitized material.
12. Independent presentations of student Group I.
13. Independent presentations of student Group II.
14. Independent presentations of student Group III.
15. Repetition. Reflexion about the usefulness of the course and suggestions for his improvement. Talk about final oral exam. Deadline for submission of archival work (processed data from CSA).

Research group – Sources of Egyptian, Greek and Roman History

96373

Lecturer in Charge

Doc. dr.sc.
Mladen Tomorad

Course Description

Introduction to the working methods of the historical sources, ancient history, Problems of processing, analysis and interpretation of these types of sources. During the introductory lectures students will be familiarized with the most important sources of the history of Egypt, Greece and Rome. In practical work to teach students how to interpret the available historical sources and how to use them in various forms of historical research and writings. Introduce students to the Museum's holdings of institutions in Croatia and databases of museum institutions in the world. Introduce students to the world's largest databases of written historical sources.

Study Programmes

» Science Stream (Smjer) (*research groups, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name the most important historical sources of Egyptian, Greek and Roman history,
2. Describe the critical-analytical classify these sources,
3. Identify historical sources toward the content and theme,
4. Analyze these sources,
5. Explain the causal connections between the content of these sources,
6. Define basic research methods ancient history: analyze the sources and literature, play and qualify the facts and the facts correctly arguments to use when writing papers,
7. Explain an online database of digital resources, museum databases, portals and research projects.

ECTS Credits 6.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. A written essay which will be based on the sources of some historical person, event or issue ancient history. Critical-analytical processing of resources.

General Competencies

After successfully graduating student will be able to:
 identify the most important person and institutions in the Croatian and the World history,
 compile a list of literature for each historical period,
 tell what is the interpretation of history,
 distinguish difference between important and non-important facts within historiographic interpretation,
 interpret a historical sources,
 appraise the value of historiographic interpretations.

Grading

50% scientific research draft,
50% syllabus.

Course Description

The aim of the course is to help students in the preparation, design and development of the final syllabus of their future graduate thesis and the draft of research that will be conducted within its frame, including searching and researching the literature relevant for the topic and the proposed scientific research.

Study Programmes

» Communication Sciences (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, research and critically read scientific literature;
2. Demonstrate the ability to create a draft for a scientific project;
3. Plan the course of scientific research and prevent larger errors and omissions;
4. Define, enumerate and explain the research problems, hypotheses, variables and methods that will be used to reach relevant and measurable results;
5. Demonstrate the ability to create a syllabus for a graduate thesis;

General Competencies

Apply, classify and distinguish the professional terminology in the research area of communicology;

Identify, evaluate and use a variety of scientific-research methods from the field of social science which are applied in communicology.

Independently conduct scientific research in the field of communicology with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect the various scientific methodologies and perspectives on specific issues and problems.

Week by Week Schedule

1. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
2. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
3. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
4. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
5. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.

6. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
7. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
8. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
9. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
10. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.

Risk Management and Crisis Communication

57217

Lecturer in Charge

Izv. prof. dr.sc.
Danijel Labaš

Course Description

The aim of the course is to provide the students with insight into the scientific knowledge about the importance of risk management and communication during the crisis, and on the examples of global and local practices to explore the basic rules in communication during crisis situations.

Study Programmes

» Communication Sciences (Studij) (*public relations, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, distinguish and critically explain crisis communication;
2. Define and explain the characteristics and ways of managing crisis situations;
3. Demonstrate the ability to research the current situation and based on the results devise a plan for managing the issues of public importance;
4. Prepare a crisis situation management plan;
5. Prepare a plan for communication with the media and the public in case of crisis situation;
6. Use the skills of crisis communication in a time of crisis.

General Competencies

Define, describe and evaluate crisis communication and its central issues;
Apply, classify and distinguish professional terminology;
Independently or in a team carry out scientific research in the field of communicology with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;
Expertly and professionally apply the acquired specialist theoretical and practical knowledge to working in public relations;
Apply the skills of oral and written communication and the presentation skills;

Week by Week Schedule

1. Crisis and issues management - definition and the necessary knowledge;
2. The consequences of ignoring problems in the company and/or business operations; compliance with the standards of crisis communication and the preparation of the procedures for effective crisis communication

Risks of Mass Communication

64749

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

100% exam.

Course Description

Course objectives are to familiarize students with the negative aspects of the mass media as a generator of risk in contemporary society. In the context of sociological studies of society of risk and communication research of potential risk factors of the media, the course will offer students various aspects of theoretical and empirical research into media content.

Study Programmes

- » Communication Sciences (Studij) (*mass communication research, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*mass communication research, 3rd semester, 2nd year*)
- » Communication Sciences (Studij) (*media, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*media, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Combine mass media and the term "risk society"
2. Analyze and classify risks of communications and provide examples
3. Explain theoretical concepts of the mass communication risks using real life examples
4. Assess dangers arising from risk communications for individuals, culture and democracy of the society
5. Identify and analyse mass media content from the point of view of their risk for the public

General Competencies

Define, describe and evaluate the risks of mass communication, the history of their development and the central issues;

Apply, classify and distinguish the professional terminology;

Identify and provide a reasoned interpretation of interdisciplinary nature of communications, linking specific aspects of risk of mass communication with the characteristics of humanities and social sciences and various aspects of social development;

Identify, distinguish, evaluate and critically assess the risks of mass communication, media and their influence on the attitudes, behaviour and decisions of individuals, the public and society as a whole;

Professionally and skilfully apply the acquired theoretical and practical knowledge in the field of media and journalism, relationships public and scientific research in communication studies.

Week by Week Schedule

1. Presenting an overview of terms and the subject area
2. Perception of risk
3. Urban sociology and risk society
4. Manipulation of public opinion as a risk of public communication
5. Information when taken as "goods" - a risk of public communications.
6. Mimetism in media
7. Media "hyperemotion" as a risk of objective communication.
8. Risks of american cultural imperialism
9. Media as "fast food" - risks of communication.
10. Overinformation as a risk of successful communication
11. Celebrity culture and information on worthless individuals as a risk of mass communication.
12. Content of mass communication as threat of risk of loss of self-respect and dignity.
13. Danger of loss of privacy as a risk of mass communication.
14. Terrorism as risk of mass communication.
15. Failure of democratic processes in society - a risk of faulty mass communication in society.

Roman Military in Croatia

102942

Lecturer in Charge

Doc. dr.sc.
Mladen Tomorad

Course Description

In this course it will be discussed issues related to the Roman conquest and colonization of this area, the movement of the legions in our soil, stay legion troops and auxilia cohort, as well as locations where there are proven legionary camps.

Prepared to and influence of individuals in the military organization, as well as their recruitment, but also retirement after military service and their impact on civil society, and political structures. Through this structure, we brought to the conclusions of the Roman army on a global historical scene, as well as the importance of this area for the whole territory of the Roman Empire.

To perform the course it is necessary to attended undergraduate level study of history, as well as a higher level of knowledge of ancient history. I suggest teaching in the form of seminars, with a tendency to form a course in a working group in a new program of study history.

This course is brings and a lot of potential guest speakers from fellow scientists who are narrowly specialized in dealing with individual legions stationed on Croatian soil.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define knowledge of Roman expansion in the area of the continental Croatia - causes and consequences.
2. Explain the consequences of the Roman conquest: Romanization of indigenous communities and other conquered territory (urban development, administrative apparatus, social structure, the formation of political positions, economic exploitation).
3. Explain the structure of military administration and closer to its implementation on the ground Croatian.
4. Show archaeological remains in the area of the Roman legion camps: (Burnum, Tilurium).

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours
Seminar 30Teaching Assistant
Vlatka Vukelić, dr. sc.

Grading

Seminars on a given topic, active and critical participation in other programs of study, successfully passed the examination. Throughout the entire class, expression, ending with success deposited tasks.

5. Reconstruct the arms of a Roman soldier and structure of the Roman legions in the Roman camp.
6. Evaluate the symbolic importance of the celebration of triumph and compare this event with the events of the modern world-historical.

General Competencies

After finishing the programme student will be able to:
 describe historical processes,
 explain cause and effect relations of historical events and processes,
 construct a historical context,
 defend his/her own opinion in discussions on different historical events and processes,
 distinguish difference between important and non-important facts within historiographic interpretation,
 combine a different historical processes,
 appraise the value of historiographic interpretations.

Week by Week Schedule

1. Pannonia - Introduction and Comments
2. Recruitment of soldiers and organization of the Roman army
3. The life of a Roman soldier
4. Rome and enemies
5. Roman camp
6. Roman military equipment on Croatian soil
7. The remains of the Roman army on Croatian soil
8. Militaria Sisciensia
9. Centurions Roman military practice-management
10. Roman military diploma
11. Gods and the Roman army
12. Roman missiles
13. Celebrating triumph
14. Gladiators - urban soldiers
15. Field work

School Pedagogy

57253

Lecturer in Charge

Doc. dr.sc.
Irena Klasnić

Course Description

The course objectives are the following:

To introduce students to the subject of School Pedagogy.

To introduce leading school theories.

To explain the process of functioning of the school and the school system in the Republic of Croatia and the world, and critically reflect on development trends.

To motivate students to track the latest research in the field of school pedagogy.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective cou, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*dipl-ns-smjer (4407);, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define a School Pedagogy and recognize its relationship with other sciences and disciplines.
2. Report the leading school theories and explain their characteristics.
3. Distinguish types of schools and school systems, describe their origin and development.
4. Analyze school factors.
5. Analyze the functioning and administration of the school in a contemporary context.
6. Identify alternative school.
7. Compare and critically judge the school system with the Croatian school systems of Europe and the world.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Grading

Students are monitored through their regular attendance, active participation in the course and field work, critical thinking and review specific topics. Furthermore, students are evaluated through their involvement in research and multimedia presentation certain educational issues. Finally, the written exam is graded based on the obligatory literature, which will clearly indicate the students' knowledge of the School Pedagogy course content.

General Competencies

The School Pedagogy course will within the teacher education programme prepare the students to:

plan cognitive, affective and practical objectives concerning school pedagogy;
analyze special characteristics of the Croatian schooling system.

Interpret the functioning of the interdisciplinary concept of planning and the strategies for the development of quality teaching in the face of new social challenges.

Screening of student's work

1 ECTS Pohađanje nastave [EN]

1 ECTS Pismeni ispit [EN]

0.5 ECTS Seminarski rad [EN]

0.5 ECTS Participation in field work - visit the Croatian School Museum.

3 ECTS

Forms of Teaching

» Predavanja

» Direct teaching

Week by Week Schedule

1. At the first lecture, the students will be introduced to all obligations expected from them. The course content will be provided to the students via Power Point presentations accompanied by various forms of animation as well as direct discussions with the professor. The students will also present some of the topics in a selected form.
2. School Pedagogy: definition of the discipline, relation between school pedagogy and other sciences
3. Dominant theories of the school: emergence of the theories, spiritual pedagogy, structuralist-functionalist theory of the school, symbolic interactionism and the theory of the school, radical theory of the school
4. Types and development of schools
5. Development of the school system in Croatia- field instruction (visit to the Croatian School Museum).
6. School system in the world and the Republic of Croatia: elementary schools, secondary schools, higher education institutions, special schools, schools for adult education, alternative schools, state and private schools
7. External and internal school reforms: causes of change, approaches to changes, Croatian national framework curriculum
8. Factors of schools
9. School and family
10. Educational potential of the contemporary school, factors and structure of schools
11. Managing schools and school efficiency, creating recognisability of the school, school management, human potential
12. Alternative schools

13. School as an innovative environment- how to organise school?
14. School of expectations and quality school, school for children, not children for school
15. The future of Croatian education: Croatian schools in the process of globalization, the search for a different education- Is there any hope in our schools?

Scientific Research Methodology

53897

Lecturer in Charge

Izv. prof. dr.sc.
Tomislav
Bračanović

Course Description

The objective of the course is to familiarize students with essential elements of scientific research in general, with specific features of research methodology of humanities and philosophy in particular, with methods of searching and analyzing bibliographical databases, and with the skills of oral and written presentation of one's research results. The course will consist of lectures and seminars involving practical work with selected texts.

Study Programmes

» Science Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic research vocabulary specific of the field of philosophy
2. Apply the acquired methods and concepts when conducting their own philosophical research
3. Analyze, search through and refer to various sorts of bibliographic sources (e.g. evaluative and non-evaluative databases)
4. Define (in both oral and written form) philosophical arguments, views and theories in accordance with standard principles of research methodology and academic writing
5. Recognize typical violations of research integrity and rules of academic publishing.

General Competencies

After completing the course, students will be able to: (1) recognize essential features of both philosophical and non-philosophical scientific writing; (2) compare and assess various research traditions and approaches to philosophy; (3) present their own views and arguments in both oral and written form; (4) prepare and complete smaller research projects.

Forms of Teaching

- » Seminar
- » Two hours of seminars (90 min) per week.

Social Cognition and Perception

57109

Lecturer in Charge

Prof. dr.sc.
Renata Franc

Course Description

Exploring, understanding and critical evaluation of contemporary theoretical and research approaches in the field of social cognition and perception of individuals and groups.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess critically theoretical approaches and knowledge in the field of social cognition and perception of individuals and groups
2. Synthesize knowledge from various fields of psychology in explaining the process of social cognition and perception
3. Critically evaluate current research in the field of social cognition and perception
4. Develop creative thinking on contemporary forms of intergroup cognition and perception.
5. Develop the ability of relatively independent conducting of team projects and research in changeable circumstances.
6. Develop skills of partly independent processing of data obtained from research and presentation of findings, and also skills needed for critical evaluation and appropriate professional reporting.

General Competencies

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Analyze scientific literature in psychology and related disciplines, and produce new scientific knowledge.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Exercises 15

Teaching Assistant

Jelena Maričić, dr. sc.

Grading

Class attendance 5%; Activities in class - 5%; Group project - 20%; Colloquia - 2 x 35% or 70% Written exam.

Week by Week Schedule

1. Introduction to the organization of the course, an introductory lecture, - analysis of the film (on the topic of social cognition and perception of the group)
2. The dimensions of social perception
3. Stereotype content model, concerning perceptions of groups and individuals
4. Prejudice development
5. Perception of the nations Image theory
6. The role of threat and emotions in social cognition and perception
7. Social conditioning and functions of intergroup attitudes (historical development)
8. The first colloquium
9. Social motivation - motivation to respond without prejudice
10. Stigmatization
11. Social representations as an alternative to the classic social cognition
12. Research methods and possible applications of theory of social representation
13. Collective memory
14. Presentation of student projects
15. The second colloquium

Social History

53923

Lecturer in Charge

Prof. dr.sc.
Mladen Ančić

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. The exam is oral.

Course Description

Course objectives are to familiarize students with the design and condition of historical research paradigms within the broad spectrum of the term of social history.

Study Programmes

» History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the concept of multidisciplinary
2. Explain how social theory affects scientific research of history,
3. Compare contemporary paradigm of historical science,
4. Describe how and why scientific paradigm change,
5. Apply the trends that are opening the latest research results,
6. Apply knowledge within the overall development of the scientific field of the Croatian historiography.

General Competencies

After successful completion of their studies, students will be able to: emphasize the importance of interdisciplinary observing certain historical themes, analyze ways of making inferences about historical processes and events, distinguish the important from the unimportant in the interpretation of historical events and processes, interpret some historical sources, judgments about the value of certain historical interpretation.

Week by Week Schedule

1. Introduction with the students, the topics that will be processed, student obligations, literature and Examination.
2. The history of social history
3. Meaning of social history in the modern humanities
4. Social Theory 1 backbone of social history
5. Social Theory 2 backbone of social history
6. Social theory and their impact on scientific research history

7. Anthropology and the Research of history
8. Multidisciplinary approach in the research of the past
9. Contemporary paradigms of historical science
10. Recent trends in the research of history
11. Paradigms of contemporary social history and Croatian historiography 1
12. Paradigms of contemporary social history and Croatian historiography 2
13. Paradigms of contemporary social history and Croatian historiography 3
14. Paradigms of contemporary social history and Croatian historiography 4

Social Impact Analysis

144625

Lecturer in Charge

Doc. dr.sc.
Marija Brajdić
Vuković

Course Description

Analysis of social impact is an effort to advance the value and assessment of social consequences that are likely to follow from the implementation of certain policies or programs, and specific actions by public or local politics, or individual public or private organizations. The importance of carrying out the analysis of social impacts is a direct consequence of recognizing the complexity of human communities and the realization that negative, unintended consequences may obscure the initial desired positive effect of the implementation of policies / programs / changes. The aim of this course is to enable students to recognize the different levels of potential social impacts as a result of the implementation of policies / programs / changes, learn to prepare an analysis of social impact, identify important indicators of social impacts according to the different dimensions of its importance for the individual, family and community, and to enable them to independently create project of social impact assessment.

Study Programmes

» Science Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply knowledge related to social impact.
2. Recognize patterns of social development.
3. Use corpus of knowledge related to findings and methodology of social impact.
4. Analyze and critically evaluate studies of social impact.
5. Define role of public in social impact assessment.
6. Design social impact assessment project.
7. Identify social impacts of public policies and projects.

Forms of Teaching

- » Predavanja
 - » Lectures with assignments and discussion.
- » Metodičke vježbe
 - » Working in teams on a specific project, developing the approach, research questions and instruments, together with the budget in order to measure the social impact of a given social project.

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

At the very beginning of the course students will choose a topic that will be crucial for the preparation of the project of social impact analysis. Individual project submitted in the form of detailed project design is a prerequisite for success on the course. Overall grade will be based the success in project preparation, active participation in class, and success in the final written exam.

Week by Week Schedule

1. Course introduction, overview of social research methods in general
2. Introduction to SIA, history of SIA
3. Methodological approaches
4. Preliminary activities of the SIA process, SIA chain
5. Selection of impacts, difference between social change and social impact
6. Cultural impacts
7. Lifestyle impacts
8. Health impacts
9. Community impacts
10. Economic impacts
11. Environmental impacts
12. SIA indicators
13. Methods of data collection
14. Data analysis
15. Presentation of results, translating key findings into policies

Social media

118530

Lecturer in Charge

Doc. dr.sc.
Jelena Jurišić

Course Description

The objective of the course is to provide students with basic knowledge from the field of social media, that is, to acquire and understand scientific and technical terminology and the historical development of the Internet and social media. The goal is also to familiarize students with the contemporary changes in the modes of communication and to employ critical thinking of such changes and circumstances. The role of online communication in all the spheres of society.

Study Programmes

» Communication Sciences (Studij) (*specialist working group 1, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish and understand the fundamental scientific and technical terminology in the field of online communication and social media.
2. Compare critically the advantages, disadvantages and the role of the social media.
3. Explain the role of social media in a variety of social spheres: economy, politics, religion, education and so on.
4. Compare and classify different types of social media.
5. Use social media in a socially responsible and beneficial way.
6. Explain the one's own choice of the use of social media
7. Write a seminar paper related to some of the current issues in social media.

General Competencies

Define, describe and evaluate social media, the history of their development and central issues.

Apply, classify and differentiate technical terminology.

Identify, evaluate and use a variety of scientific methods in social science, applied in communication sciences.

Professionally apply acquired theoretical and practical knowledge on the sphere of social media.

Course Description

Introducing the students to the content of the course, the scientific principles and results concerning the origin, development and functioning of the legal and political institutions in the Croatian territory. This process will be analyzed in the overall European context of the functioning of institutions and legal systems of Western Europe. In this process of comparative analysis of the legal and political systems of Croatia and Western Europe, the students will become familiar with the evolution of the legal-political system in accordance with the legal-political changes that have occurred. In the study and interpretation of the course content there is a necessary overlap between different levels (theoretical and positive-legal) and scientific disciplines that deal with these issues so they could be brought closer to the needs of the study and the Croatian society.

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the development of the legal and political system in Croatia
2. Recognize the basic features of the Croatian legal and political system
3. Apply the acquired knowledge to the understanding of the evolution of Croatian legal institutions
4. Explain the historical development of Croatian statehood
5. List the main features of the Croatian political system
6. Compare the stages in the relationship between Croatia and EU
7. Relate all the protagonists in the development of Croatian statehood
8. Compare the development of the Croatian state and its neighbors
9. Develop awareness of the importance of Croatian independence
10. Use all relevant sources for deconstruction of imposed historical values

General Competencies

Apply general knowledge about the society and social processes;
Prepare the information about the society;
Explain social change through classical and contemporary sociological approaches;
Analyze the personal and local social issues;
Present the origin of social problems;
Choose an adequate methodological approach to the research of social phenomena;
Devise a research question about the subject.

Sociology of Development

132301

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

Subject Sociology of Development is one of fundamental problems subject within the framework of the study in the stream Sociology of Development and Security. The title of the subject itself implies so. Planned learning outcome at this broader level is that individuals: Comprehend (acquire proficiency in) theoretical and empirical knowledge (accomplishments) on the concept of social development, especially the concept of sustainability and sustainable development with orientation to consider the survival in modern world of degrading natural life basis.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe conceptual definitions, theoretical concepts of development, growth, sustainability and survival;
2. Define dimensions, indicators and variables of social growth and models of measuring development;
3. Analyze learning knowledge (accomplishments), know-how and skills of analysing social (un)developing phenomena and analysing them;
4. Develop mental maps of desirable types of social developing processes for the world and Croatia;
5. Apply knowledge (accomplishments) on one's own personal development, development of one's own micro-social milieu and development of their homeland Croatia;
6. Explain acquired knowledge (accomplishments) and comprehension of the development to other (young people who do not have a privilege to attend this course);
7. Apply acquired knowledge (accomplishments) and know-how in a professional career, but also in personal life.

ECTS Credits 4.0

E-learning Level L1

Study Hours

Lectures 30

Lecturer

Andreja Sršen, dr. sc.

Grading

Emphasis is on oral exam (at the preliminary exam and the final exam) with the duration of about 30 minutes per candidate. As it is expected only about 15-20 students at the fourth year of the study, it is planned to monitor them individually – tutorial guidance. Essays are designed as texts of individual literacy. Student will take consultations from lecturers via their continually open emails. Maximum of tolerated nonappearance is 3x (1/5). Continual record-keeping of attendance is managed.

General Competencies

Combine the general knowledge of society and of social processes.

Outline the opposing viewpoints and alternative hypotheses in the various social issues.

Outline causal relationships between the social phenomena.

Demonstrate the social impacts of the public policies.

Illustrate the key structural factors that are shaping the society.

Analyse personal and local social questions in the broader social context, especially in the context of social class, ethnicity, gender, religion, capitalism, individualisation, nationalism, and globalization.

Publicly support sociology and the social research methods as being relevant in addressing of the actual social problems and issues.

Plan own engagement in resolving of the various social issues.

Screening of student's work

1 ECTS Pohadanje nastave [EN]

1 ECTS Esej [EN]

Sociology of Domestic Violence

131014

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

The main goal is to enable students for sociological approach to research and understanding domestic violence and for creation of relevant domestic violence prevention and intervention programs. Students should be able to constructively and critically assess social response to domestic violence and on the basis of that to contribute to its improvement.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl(5393): elective courses, 3rd semester (science stream), 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reconstruct historical development of theoretical approach to etiology of domestic violence and development of social responses to domestic violence.
2. Combine domestic violence dynamics and social context in which domestic violence occur.
3. Compare different sociological models of domestic violence explanation.
4. Relate gender discrimination to domestic violence.
5. Analyze social conditionality of domestic violence.
6. Classify different aspects of gender discrimination in relation to social context.
7. Analyze strength and weakness of social responses to domestic violence.

Nikša Dubreta

ECTS Credits 4.0

English Level L1

E-learning Level L2

Study Hours

Lectures 15

Seminar 15

Grading

Short written essay and oral presentation in seminary 30% + oral exam 70%.

Course Description

The main goals of the elective are focused on introduction of students to classical and contemporary social theories of drug use. Also, to indicate the importance of macro and immediate social context of drug use as relevant indicator in understanding and evaluation of drug effects.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define key terms in the field of sociological research of drug use.
2. Evaluate the role and importance of social and cultural context as a constitutive part of drug effects.
3. Interpret different sociological approaches in studies of drug use phenomenon.
4. Judge the importance of drug use problem at the societal level.
5. Formulate research program at the graduate level with regard to issue of drug use.
6. Evaluate elements of media and public discourse on drugs.

General Competencies

Combine the general knowledge of society and of social processes.

Outline the opposing viewpoints and alternative hypotheses in the various social issues.

Outline causal relationships between the social phenomena.

Demonstrate the social impacts of the public policies.

Plan own engagement in resolving of the various social issues.

Illustrate the key structural factors that are shaping the society.

Combine the different theoretical approaches in the investigation of the social phenomena.

Point out the importance of the concepts of culture, socialization, stratification, social structure and institutions in the explanations of the social phenomena.

Publicly support sociology and the social research methods as being relevant in addressing of the actual social problems and issues.

Week by Week Schedule

1. Sociological aspects in definition of key terms drugs, types, classifications, use/abuse, addiction etc.
2. Levels and aspects of social and cultural context;
3. Social learning theory;
4. Societal reaction and sequential model of deviance;
5. Anomie theory, drug use and delinquent subculture;
6. Socio-pharmacological approach;
7. Alfred Lindesmith toward sociology of addiction;
8. Subcultures and immediate context of drug use;
9. Youth counterculture and drug use;
10. Concept of moral panics and drug use;
11. New British sociology and "normalization thesis";
12. Social representation of drug use phenomenon;
13. Late capitalism and "economy" of drugs;
14. Sociopolitical influences on image construction of drugs and drug users;
15. Prohibitionism and antiprohibitionism.

Sociology of science and technology

144417

Lecturer in Charge

Doc. dr.sc.
Marija Brajdić
Vuković

Course Description

Understanding the roles of science and technology in broader societal context – as well as the influences of that context on the practices and uses of science and technology would seem to be a prerequisite to a successful career in the social sciences. This course seeks to contribute to such improved understandings by introducing students to the area of research typically characterized as “science and technology studies”(STS) its basic ideas as well as open debates. Each week we will explore and discuss difficult questions that have inspired STS scholars for many years. The readings for the seminar have been selected to challenge the common-sense ideas that students have likely developed about these everyday concepts.

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic concepts and debates of the science and technology studies
2. Analyze the role of public in future and advancement of science and technology, and in scientific and technological debates and controversies
3. Evaluate key issues and controversies related to the funding and advancement of science and technology
4. Identify and describe the role of science and technology in social change
5. Evaluate science and technology policies and their impact on the future of societal development

Forms of Teaching

- » Predavanja
 - » Lectures with discussion.
- » Seminar
 - » Presenting and discussing seminar literature in teams.

Week by Week Schedule

1. Science. What is science?

Seminar: Robert Merton, Thomas Kuhn, Thomas Gieryn, Robert Evans.

ECTS Credits 4.0

English Level L3

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Students will be grouped into teams that will be responsible for the reading, preparation and presentation of specific seminar topics. Students will also be responsible for an individual project that will be evaluated in the form of the final essay. The rating of the course is awarded on the basis of teamwork seminar (40%), active participation in class (20%) and the quality of essay (40%).

2. Objectivity and Truth.

Seminar: Sandra Harding, Steven Shapin

3. Facts. Ignorance.

Seminar: The social construction of scientific knowledge.

4. Bodies. Gender. Transhumanism.

Seminar: Londa Schiebinger, Jenny Reardon

5. Technology. Technology and work.

Seminar: Langdon Winner, Trevor Pinch, Wiebe E. Bijker, Ruth Schwartz Cowan, David Noble

6. Modernity.

Seminar: Bruno Latour, Ulrich Beck

7. Nature, culture and society.

Seminar: Strong programme. Donna Haraway, Michael Callon

8. Disciplines.

Seminar: Stephen Turner, Adele Clarke

9. Rewards in science and academia.

Seminar: Margaret W. Rossiter, Bruno Latour, Steve Woolgar

10. Commercialization of science.

Seminar: Henry Etzkowitz, Daniel Lee Kleinman, Steven P. Vallas

11. Science and public. Public understanding of science.

Seminar: Brian Wynne, Phil Brown

12. Expertise and non-experts.

Seminar: Brian Wynne, Phil Brown

13. Scientific controversies.

Seminar: Pam Scott, Evelleen Richards, Brian Martin, Daniel Sarewitz.

14. 14. Lecture: Science and policy.

Seminar: Sheila Jasanoff

15. 15. Lecture: Science, technology and environment. How

Seminar: Nico Stehr, Joachim Spangenberg, Charles Perrow, Vaughan Diane

Sociology of Social Changes

78823

Lecturer in Charge

Izv. prof. dr.sc.
Krešimir
Peračković

ECTS Credits 4.0

English Level Lo

E-learning Level L1

Study Hours

Lectures 30

Grading

Obligatory class attendance and discussion, final written exam.

Course Description

Introduce students to sociological theories of social change, starting from the basic sociological concepts and contemporary theories of social change to the definition of sociology as science of social change

Study Programmes

» Science Stream (Smjer) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic concepts and major theories of social change
2. Compare different approaches of social change and theoretically synthesize in the form of model
3. Use the fond of aquired knowledge for the purpose of theoretical conceptualization of potential research problem
4. To analyze data from secondary sources and conclude which social processes are relevant

General Competencies

Upon successfully passed exam, students will be able to:

Combine the general knowledge of society and of social processes.

Plan own engagement in resolving of the various social issues.

Illustrate the key structural factors that are shaping the society.

Analyse the social change using classical and contemporary sociological approaches.

Compare the macro and micro level of the sociological analysis.

Combine the different theoretical approaches in the investigation of the social phenomena.

Analyse personal and local social questions in the broader social context, especially in the context of social class, ethnicity, gender, religion, capitalism, individualisation, nationalism, and globalization.

Analyse the origin of the social problems and conflicts while bearing in mind the ways in which the social order is maintained, and is challenged.

Forms of Teaching

» Predavanja

Week by Week Schedule

1. Keynote lecture: Social change as the subject of sociological research
2. Social changes in the classical sociological theories
3. Fundamental determinants of recent theoretical approach to the social change
4. Basic concepts in sociology of social change: the development and progression, regression and stagnation, social crisis, social processes, social mobility
5. Modernization and neomodernization
6. Theory of Piotr Sztompka : Sociology as a science of social change
7. The impact of technological development on social change
8. Factors of contemporary sociocultural change
9. Approach of M. Castells in the study of contemporary political change
10. Croatian society and social changes in XXth century
11. Analysis of examples of social change: Transition in Croatia
12. Analysis of examples of social change 2 : Globalization of recent sociological perspective
13. Contemporary social movements - actors of social change
14. Operationalization of theoretical concepts and draft research
15. Concluding remarks and final debate

Sociology of Social Control and Police

159978

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

The aim of the Course is to develop comprehensive factual and theoretical knowledge within a number of areas in which comparative studies of social control and policing can be undertaken: social control concepts and philosophies, the role of the police in the community, the relationship between society and law enforcement agencies, the societal context of policing. During the Course, students will develop the critical understanding of different models of policing and their impact on social control in different eras of policing and in different communities, including efforts at police reform. They will apply this knowledge in practical work to fully understand community cohesion and collective efficacy as the resource and operating tools of community social control.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl*(4420): *elective courses, 1st semester (science stream), 1st semester, 1st year*)
- » Science Stream (Smjer) (*soc-dipl*(5393): *elective courses, 3rd semester (science stream), 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain different concepts of social control.
2. Compare formal and informal social control
3. Explain relations between social cohesion, collective efficacy and social control
4. Analyze the role of police in supporting informal social control
5. Explain the main concepts in the field of sociology of policing.
6. Explain the role of the police in the society.
7. Identify professional dilemmas and ethical challenges of modern policing strategies.
8. Explain the impact of policing on social control.

Speaking and Presentation Skills in English

66554

Lecturer in Charge

Pred.
Vedrana Vojković
Estatić

Course Description

Acquiring techniques and strategies for listening comprehension for academic purposes, improving students' speaking and presentation skills through reading and analyzing texts, as well as discussing topics related to their fields of study, further development of language competence on phonological and semantic level, autonomous integration of acquired speaking and presentation skills in short presentations related to students' fields of study or interests.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and apply the basic principles of successful presentations in the English language
2. Use key words and expressions in the English language necessary to prepare a proper introduction and conclusion to a presentation
3. Use key words and expressions in the English language necessary to structure the presentation and to describe graphs, charts, tables etc
4. Use strategies to pose and to answer questions in the English language
5. Apply the basic techniques and strategies for successful listening in an academic setting
6. Show presentation skills by presenting a specific topic from their fields of expertise in the English language
7. Support their opinions on a topic from their fields of expertise in the English language

General Competencies

Apply and classify professional terms in various branches of communication sciences in the English language,
critically evaluate, present arguments and defend positions on topics from students fields of study in the English language,
apply speaking and presentation skills in the English language.

ECTS Credits 5.0

English Level Lo

E-learning Level L1

Study Hours
Exercises 60

Grading

Regular attendance and active participation. Preparations, independent reading, written assignments and presentation. Final exam including the written and the oral part. regular attendance and active participation 30%; written assignments 20%; presentation(s) 20%; written exam 15%; oral exam 15%.

Week by Week Schedule

1. Placement test
2. Basic features of a successful presentation
3. Use of different tenses in the English language (adverbs of time and tenses)
4. Essential words and expressions for presenting information about yourself, the institution etc. in the English language
5. Presentation introduction (key words and expressions in the English language + preparation methods)
6. Content and formal structure of the presentation
7. Functional styles - differences between formal and informal styles
8. Essential words and expressions for describing graphs, charts and tables in the English language
9. Non-verbal communication
10. Presentation conclusion (key words and expressions in the English language)
11. Successfully posing and dealing with questions, and providing appropriate answers at the end of the presentation (key words and expressions in the English language)
12. Presentation assessment
13. Essential techniques and strategies for successful listening in an academic environment
14. Student presentations on selected topics
15. Review and evaluation of work in the course

Seminar 60

Grading

Regular attendance and active participation 30%; written assignments 20%; written exam 15%; presentation(s) 20%; oral exam 15%.

Course Description

The objective of the course is to enable students to acquire the techniques and strategies required for listening in the German language, as well as skills required to successfully deliver presentations in academic settings in the German language.

Study Programmes

- » Communication Sciences (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 2nd semester, 1st year*)
- » Communication Sciences (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and apply the basic principles of successful presentations in the German language
2. Recognize and use key words and expressions in the German language necessary to prepare a proper introduction and conclusion to a presentation
3. Recognize and use key words and expressions in the German language necessary to structure the presentation and to describe graphs, charts, tables etc.
4. Recognize and use strategies to pose and to answer questions in the German language
5. Apply the basic techniques and strategies for successful listening in an academic setting
6. Prepare a presentation on a specific topic from their fields of expertise in the German language
7. Argue to support their opinions on a topic from their fields of expertise in the German language

General Competencies

- identify the basic elements of presentations and key information when listening in German (specialised topics) - critically evaluate, present arguments and defend positions on topics from students fields of study in the German language - present opinions and views on topics from students fields of expertise in the German language

Week by Week Schedule

1. Placement test
2. Essential words and expressions for expressing ones opinion, agreement or disagreement in the German language
3. Essential words and expressions for presenting information about oneself, the institution etc. in the German language
4. Register and style
5. Basic features of a successful presentation
6. Presentation introduction (key words and expressions in the German language)
7. Presentation conclusion (key words and expressions in the German language)
8. Essential words and expressions for describing graphs, charts and tables in the German language
9. Essential words and expressions for describing, comparing and providing examples in the German language
10. Essential words and expressions for defining and drawing conclusions in the German language
11. Essential words and expressions for dealing with mistakes and unpleasant questions in the German language
12. Successfully posing and dealing with questions, and providing appropriate answers at the end of the presentation (key words and expressions in the German language)
13. Essential techniques and strategies for successful listening in an academic environment

Course Description

Understanding of the theoretical basis of the MANOVA models, discriminant, canonical and cluster analysis; analysing and evaluating research papers in which these multivariate methods were applied; creating research designs where these methods should be used as an adequate methods of analysing the collected data; independent practical application of MANOVA models, discriminant, canonical and cluster analysis in psychological research using the SPSS software package

Study Programmes

» Psychology (Studij) (*elective methodology courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the statistical and mathematical logic of MANOVA, discriminant, canonical and cluster analysis
2. Evaluate and assess the statistical requirements for the implementation of these multivariate methods.
3. Design a research plan suitable for applying these multivariate methods
4. Assess and analyse the data suitable for MANOVA, discriminant, canonical and cluster analysis using the software package SPSS
5. Interpret the results obtained from one of these methods within the given research problem
6. Explain statistical parameters obtained from the analysis
7. Evaluate the quality of the data and results obtained by these multivariate analysis
8. Assess the range and limits of the statistical conclusions derived by factor MANOVA, discriminant, canonical and cluster analysis
9. Estimate the quality of the scientific interpretation of the results obtained these methods.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Activity in class (lectures and exercises) - 20%; Seminal work - 30%; Written exam - 50%.

General Competencies

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Week by Week Schedule

1. Statistical logic of MANOVA - multivariate extension of ANOVA
2. Significance of multivariate F-test and interpretation of the MANOVA results
3. Using covariates – MANCOVA
4. Logic of Discriminant analysis and analogy with MANOVA
5. Formation of discriminant functions; discriminative weights and discriminative loadings
6. Significance and interpretation of discriminant functions
7. Error estimates in group classification and validation of the results of discriminant analysis
8. Logic of Canonical analysis
9. Requirements for the canonical analysis
10. The formation of canonical functions; canonical weights, canonical loadings and cross-loading
11. Significance and interpretation of canonical functions
12. The relation between canonical analysis and other multivariate techniques
13. Cluster analysis - basic logic and methods of use
14. Methods of calculating the distance between the cases and the formation of clusters
15. Determining the number of clusters to retain

Strategic Thinking

57250

Lecturer in Charge

Pred.
Daria Mateljak

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours
Exercises 30

Grading

The final grade shall be based on the student's work during the semester, the results of the written exam and seminar paper.

Course Description

Provide students with an insight into the key strategic issues concerning the management of organizations and projects in the domain of public relations and building of organizational relationships. Enable the students to solve strategic problems which they will face in their work in PR. Familiarize them with the basic management theories, practices and skills in the domain of strategic thinking.

Study Programmes

» Communication Sciences (Studij) (*public relations, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish and use the techniques and tools of strategic thinking and management,
2. Analyze the organizational situation, its context, participants and diagnose organizational problems,
3. Apply into practice the tools and techniques of organizational analysis, decision-making process and creative approach to solutions,
4. Demonstrate the ability to self-consciously, professionally, independently and effectively participate in the development of organizational business plans
5. Demonstrate the ability to effectively and confidently present issues and solutions,
6. Apply ethical principles of organizational behavior and social responsibility
7. Recognise, distinguish and correctly apply the principles of project and process management.

General Competencies

Define, describe and evaluate strategic thinking and central issues. Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist and practical knowledge in the field of media and journalism, public relations and scientific research in communicology. Demonstrate accountability, professional ethics, autonomy and initiative in work.

Week by Week Schedule

1. Introductory class: course review, student expectations, basic concepts, several examples, micro drill/interactive game
2. Thinking: types of thinking, water logic - rock logic, creative thinking, reflexive thinking, strategic thinking
3. Strategy (2 class blocks): definition, historical review, the development of strategic thinking, theorists / practitioners, types of strategies, strategic applications: politics, diplomacy, military strategy, business strategy, practical examples
4. Strategy (2 class blocks): definition, historical review, the development of strategic thinking, theorists / practitioners, types of strategies, strategic applications: politics, diplomacy, military strategy, business strategy, practical examples
5. Organization basics: organization formation, organization structure, types of organizations, theoretical view: managing and system theories, homework: observing the surroundings
6. Analysis of strategic planning: the basics of analytics, why analytics are important, types of analysis according to objectives, external analysis: market, environment, organization; homework assigned in some of the analytical techniques (group work)
7. Setting goals and evaluation: goals, the difference between goals, tactics and strategy, practice in setting goals, the connection between goals, expectations, results, evaluation of achieved goals, analyzing the effectiveness
8. Tactics of strategic planning: Connection between strategies and tactics, definitions, examples, action plan, tactic management, tactic evaluation
9. The notion of leadership (strategic leadership): strategy and team (organization) health, what is leadership?, types of leadership, theoretical approaches and practical realization, an exercise
10. Team management: types of teams, team structuring, team control, team evaluation
11. Organization and guidance: elements of corporate identity, vision, mission, purpose, business strategy, a practical exercise
12. Internal relations and corporate culture: building organizational relations, internal relations strategies, corporate culture, lateral and vertical management
13. Networking strategies: Organization and environment, business and interest-based joining, alliances, lobbying strategies
14. Organizational environment in the multimedia world: interest-influence groups, activism, the Internet and Web 3.0, social networks, guerrilla methods
15. Ethical principles in the implementation of strategies: the definition of ethics, the application of ethics in business, ethical dilemmas, ethics in the implementation of strategy, corporate social responsibility

Stress and Psychotrauma

144889

Lecturer in Charge

Izv. prof. dr.sc.
Lana Mužinić

Course Description

Introduction to the concept of stress, influence of stress on mental and physical health, and new possibilities in diagnosis, prevention, and treatment of adverse consequences of stress, especially psychological trauma.

Study Programmes

» Psychology (Studij) (*specific and professional skills, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the concept of stress from different theoretical points of view.
2. Distinguish between stress, stressor, and stress reaction.
3. Describe the role of the central nervous system and endocrine system in stress reaction
4. Describe genetic and epigenetic factors associated with reactivity to stressor (trauma).
5. Describe biological and psychophysiological stress-related indicators (biomarkers).
6. Explain the concept of psychological trauma.
7. Describe the use of biomarkers, especially psychophysiological ones, in the diagnosis and treatment of posttraumatic stress disorder.
8. Describe morphological changes in the brain and their functional role in individuals with posttraumatic stress disorder.
9. Explain the principles of prevention, treatment, and rehabilitation of stress-related disorders.

General Competencies

Students will be familiar with the concept of stress, ways of its prepoznavanja, its role in traumatic disorders, and with biomarkers, morphological changes and their functional role in the treatment and rehabilitation of stress disorders.

Week by Week Schedule

1. Concept of stressors, stress reaction
2. Biological basis of stress reaction

Adrijana Bjelajac

Course Description

The course is developed to acquaint students with psychological practices and job demands within a specific organization, to integrate theoretical knowledge and practical skills acquired throughout their studies, and to develop skills necessary for specific psychological practice through immediate work experience.

Study Programmes

- » Psychology (Studij) (*specific and professional skills, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Integrate acquired theoretical knowledge and skills with psychological practice
2. Judge professional role of a psychologist within an organization
3. Evaluate their own professional competences
4. Appraise the importance of life-long learning
5. Assess the importance of communication skills for successful psychological practice

Week by Week Schedule

1. Students are obliged to attend work for two consecutive weeks, 8 hours a day. They are obliged to keep the work diaries daily and submit them to the course lecturer on a daily basis. At the beginning and the end of semester they are obliged to attend an orientation and supervision session with the course lecturer. They also need to write a seminar essay on the topic and literature that the mentor assigns and submit it to the course lecturer. They need to acquire the evaluation of the psychologist under whose mentorship they work.

Teaching Competencies in Modern Curriculum

144752

Lecturer in Charge

Doc. dr.sc.
Marjan Ninčević

Course Description

Objective/competences:

Generally define school, teaching, teacher and student from the point of view of contemporary pedagogy. Generally determine the art of teaching. Analyse basic tenets of the theory of teaching. Analyse the models of the relationship between theory and practice in pedagogy and didactics and develop basic teaching skills or professional teacher's competences, which among other things include attitude and tact in communication with students. Acquire the models of class-teaching atmosphere development as well as class cohesiveness in the context of interculturalism. Acquire teacher's competences in the field of curriculum development methodology.

Study Programmes

- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 1st semester, 1st year*)
- » Science Stream (Smjer) (*non profession-specific and/or profession-specific elective course, 3rd semester, 2nd year*)
- » Teaching stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop pedagogical competences necessary to every teacher for work in the educational process in contemporary school
2. Identify competences of critical analysis of the teaching process in primary and elementary school
3. Explain key concepts related to the field
4. Identify theories and practice in contemporary curriculum
5. Identify different theoretical positions and criteria relevant when developing theoretical models
6. Design theoretical models with a critical attitude

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours

Lectures 15

Seminar 15

Grading

Students will be monitored in all three stages of the course delivery. In the first stage, when the basic concepts of pedagogy are taught, the student's motivation is monitored based on active engagement in class, as well as regular attendance (20% of the final grade). In the second stage, the student's individual and group work in research on a specific pedagogical problem, multimedia presentation and reporting on it in front of colleagues, and participating in the same assignment of other students are monitored (30% of the final grade). The third stage refers to the evaluation of the student's systematic knowledge of pedagogy by means of a written exam (15 questions) based on obligatory literature and professor's lectures (50% of the final grade).

7. Identify teacher competences in the field of curriculum development methodology.
8. Develop the pedagogical perspective when understanding and explaining pedagogical practice

General Competencies

On the level of the programme, the course makes the student capable of:
Correctly interpreting basic concepts: teacher, competences, pedagogical competences

Analysing pedagogical competences that every teacher needs to be able to work in school

Defining curriculum and what it should be according to the theories of curriculum

Understanding similarities and differences between didactics and curriculum

Developing a curriculum.

Week by Week Schedule

1. Teacher competences (concept, definition, elements)
2. Teachers (knowledge, abilities, specific quality of the teaching profession, professional development of teacher).
3. Teacher's competences (cognitive, functional, personal, related to the subject/field, methodological, didactic, reflexive)
4. Social competences of teachers (how to develop and apply social competences. The main areas of abilities that define social competences)
5. Emotional intelligence and communication in teaching and learning (importance of communication. The structure of the communication cycle and the flow of information. Dialogue as the process of exchange, processing and improvement of information. Communication cycle. Listening as communication – active listening).
6. Developing teacher's competences (monitoring one's work – reflexive competence. Mastering development phases. Motivation).
7. Art of lesson planning – methodical path (Planning and preparing, elaboration of basic situations in teaching and learning, the selection of methods, procedures, forms of work, techniques and strategies of learning, ways of evaluating, timing).
8. Basic teacher skills while holding lessons (beginning, duration with transitions and the end of a lesson)
9. Components of teaching when revising and practicing (types, frequency, and organization of revision. The process of practicing. The content of practicing. Corrective practicing.)
10. Team teaching (concept of team and team learning. Purpose and objective of team teaching/learning).
11. Material-technical and pedagogical aspects of teaching and learning (space, equipment, authentic reality)
12. Quality indicators (curriculum, achievements, learning and teaching, support to students, school ethos, resources, management, carrying out, quality commitment).
13. Art of achieving class discipline (authority of teacher, art of restitution).
14. Art of developing class atmosphere (basic factors).
15. Curriculum development (conceptual definition of curriculum, understanding the role of the national curriculum framework, curricular cycle)

Textbook as a Teaching Tool

118712

Lecturer in Charge

Prof. dr.sc.
Marko Pranjić

Course Description

The course objective is to provide future teachers with the insight into scientific findings regarding the characteristics of a desirable textbook; train them to critically approach and analyse and finally select a textbook based on the quality of content and didactic organization; prepare them to be able to adequately use the textbook as a teaching tool in the educational process.

Study Programmes

- » Teaching stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*required elective group_2nd semester, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the role and importance of the textbook in the process of education and learning,
2. Outline the examples of legal regulations relevant for the process of textbook creation,
3. Judge on the transmission and transformation dimension of the textbook,
4. Distinguish didactic instruments of textbook units,
5. Describe didactic instruments of the first and last pages of a textbook,
6. Interpret didactic criteria of textbook instruments,
7. Analyze the educational role of the textbook,
8. Identify a desirable textbook,
9. Select among officially approved textbooks,
10. Use a textbook adequately in the process of teaching and learning.

E-learning Level L1

Study Hours
Lectures 30Lecturer
Rona Bušljeta, dr. sc.

Grading
Lecture attendance, preparation for classes (reading the assigned literature), and participation in discussions (20% of the final grade), seminar paper (30% of the final grade), and the exam (50% of the final grade).

General Competencies

On the level of the programme, this course will train the future teachers to:
Theoretically and practically implement relevant knowledge obtained in the educational courses (pedagogy, didactics, teaching methodology, psychology of education).

Present arguments regarding advantages and disadvantages of certain theoretical tenets.

Evaluate textbooks based on certain qualitative and quantitative criteria.

Select individual theoretical positions for practical application.

Screening of student's work

1 ECTS Pohađanje nastave [EN]

1 ECTS Seminarski rad [EN]

1 ECTS Usmeni ispit [EN]

3 ECTS

Forms of Teaching

» Predavanja

» The course content will be delivered with the help of power point presentations. The students will be able to independently and collaboratively participate in constructive discussions with the lecturer.

Week by Week Schedule

1. Determine the importance and role of the textbook as a teaching tool.
2. Connection between teaching (the theory of teaching) and the textbook.
3. Defining relevant determinants of a desirable textbook.
4. Textbook and education. Stressing the importance of the organization of textbook as a teaching tool.
5. Legal regulations concerning the process of textbook creation. The overview and analysis of the teaching plan, textbook standards, Law on textbooks for elementary and secondary schools, the National curriculum etc.
6. Explaining the common practice regarding the processes of creation, approval, and selection of textbooks in the Republic of Croatia, and the comparison with the European policy and practice.
7. Textbook transmission and transformation role. Theoretical and practical differentiation of the mentioned roles.
8. Developing the didactic and educational instruments of the textbook.
Specific definition of:
Didactic and methodological instruments on the first and last pages of the textbook,
Didactic and methodological instruments of a textbook unit,
9. Didactic and methodological criteria of textbook instruments.
10. Establishing desirable criteria of pictorial and textual textbook instruments and defining their importance for the process of learning and teaching.
11. Transmission (content-related) textbook role.
12. The importance of the content in the processes of teaching and learning and didactic and methodological criteria of organizing the content.
13. Connecting the dimensions of content and didactic organization of a textbook in the processes of teaching and learning (theoretically).
14. Connecting the dimensions of content and didactic organization of a textbook in the processes of teaching and learning (practically).

15. Presenting a seminar paper in the form of a review of a scientific paper, a book or legal provisions connected with textbooks and/or individual didactic-methodological and content-related analysis of officially approved textbooks.

The Ancient Roads and Communications on Croatian Territory

62011

Lecturer in Charge

Doc. dr.sc.
Mladen Tomorad

Course Description

Course objectives are to develop students' sense of historical continuity in our region, as well as the global importance of Croatian historical and geographic area in ancient times. Since the ancient times the value of a given area valorized the construction of roads, course will try to show a dense network of Roman *via publica*, but many vicinal road which runs through Croatian territory. Since the Roman road very often emerged in prehistoric ways, and that they were usually a template for building a modern road route, the goal is to emphasize the historical importance of territorial cohesion in the wider European context.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe long-term studies that seek to analyze the problem of multi-disciplinary research area that connected, the Adriatic coast and its hinterland - new insights,
2. Explain the significance of the works that were created on the subject - reports on specific field of research in this area,
3. Relate to now unknown or ignored aspects of the subject matter,
4. Analyze the knowledge and connections of ethnic groups that inhabited the Croatian territory,
5. Evaluate the importance of road communication in antiquity.

The Interpretation of Literary Text

57155

Lecturer in Charge

Doc. dr.sc.
Davor Piskač

Course Description

The interpretation of a literary text is part of the teaching of literature in primary and secondary schools. In terms of teaching it presents extremely important tools for the analysis and interpretation of literary texts. It enables awareness of the relationships within a literary work and what impact these relationships have on the reader, the society and the development of literature and culture in general. After completing the course “Interpretation of literary texts” the students will be able to: observe the content and the differences in meaning in the field of literature and culture. This will contribute to the development of cognitive skills and aesthetic sensitivity in the students. As a result, the students will be able to better and more fully understand literature across a diachronic and synchronic overview.

Study Programmes

- » Teaching Stream (Smjer) (*kro-dipl (13096): elective courses 1 (teaching stream), 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*kro-dipl (13096): elective courses 1 (teaching stream), 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe, identify and define the features of a particular literary genre.
2. Describe, the students should be able to express, recount and convey information about the meaning of the text’s content.
3. Describe, the students should be able to connect knowledge and explain the interpreted texts.
4. Explain pose a hypothesis and formulate it, orally compose, explain and write a synthesis of the meaning of the interpreted text.
5. Evaluate and distinguish, evaluate the students' interpretations and explain the decision.
6. Explain interpretation of poetry
7. Explain interpretation of narrative text.
8. Explain interpretation of drama

General Competencies

Make the students capable of literary interpretation and the identification, detection and supporting the meaning of a literary text.

Grading

STUDENT OBLIGATIONS
Class attendance is obligatory (minimum of 70%); Students are obliged to actively participate in classes; Students are obliged to write two essays; ECTS credits: Class attendance 1 credit, class activity 1 credit, first essay 1 credit, second essay 1 credit; Student participation in class and exam essays are graded – For ten points from activity the students shall receive a higher grade by one. Students are obliged to write two essays out of four possible choices: 1. Interpretation of a lyric poem: Pablo Neruda: “Noćas bih mogao napisati” 2. Interpretation of a novel: Alessandro Baricco: “Svila” 3. Interpretation of a drama: Miro Gavran: “Paralalni svjetovi” 4. Interpretation of a travelogue: Antun Gustav Matoš: “Ferije”. Each essay should have between 1200 and 1500 words (3-4 pages). Each essay shall receive between 1 and 10 points. An essay may not receive more than the maximum number of points from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good understanding of the content of the interpreted text 1 point 3. Good knowledge of the context surrounding the interpreted text 1 point 4. Good use of meta-language 1 point 5. Systematically supported facts and meaning 2 points 6. Originality of ideas and their presentation and support 3 points. Essays are graded in the following

From top to bottom, the buttons are: a blue globe icon; a white button; a white button labeled 'COM'; a white button labeled 'CRO'; a white button labeled 'CRO'; a white button labeled 'CRO-S'; a white button labeled 'CRO-T'; a white button labeled 'HIS'; a white button labeled 'PHI'; a white button labeled 'PHI-S'; a white button labeled 'PHI-T'; a white button labeled 'PSY'; a white button labeled 'SCI'; a white button labeled 'SCI' (highlighted in orange); a white button labeled 'SOC'; a white button labeled 'TEA'; a white button labeled 'TEA' (highlighted in orange); and a white button labeled 'TEA'.

The Life of a Provincial Family in Ancient Times

79210

Lecturer in Charge

Doc. dr.sc.
Mladen Tomorad

Course Description

Using comparative methods the students develop a sense of historical, economic, political and cultural continuity and specific social identity in our region. The particular area of study was reduced to the continental part of the Croatia, romanized and urbanized, during the Roman conquest of the 1st ct. BC to 1st ct AD. Maximum effort will represent just a comparative method of studying life in the ancient world, as well as the first comparison of life in Rome, with life in ancient Pannonia, and after that, on the basis of published studies, which have so far segmental type, as possible, set up the basic features and common points, and the backbone of life of ancient man in Pannonia. There will be the following elements of ancient life: daily life in Rome and province, home furnishings, leisure, clothing, hair, jewelry and cosmetics, marriage, raising children, funeral customs and traditions associated with the cult.

- * Study the existing stereotypes of Roman population
- * Offer new content and a new approach to the topic
- * Explain the importance of the creation of social classes: senatorial and knightly class, the colonial elite, the lower strata of society, way of life and the difference among the population on the basis of personal and civic - legal status and ethnicity
- * To examine the issue of slavery, the population in urban areas and roadways, economic activities (agriculture and animal husbandry, crafts and trade, rustic and banking, etc.) through the prism of participants and beneficiaries, traditional Roman economy and innovation, occupations (traditional influence in the performance certain duties: comparison peregrine and immigrant population)
- * More specifically explain the customs, arts and culture and the Roman provincial population - opportunities and their interdependencies between study
- * Consider the above in context: the age of conquest, colonization and Romanization as a political and cultural processes, organization of the Roman state administration (division into provinces), material culture and permeating Roman and indigenous culture in onomastics, religion and fine arts, and in the context of the late Roman period - the emergence of Christianity.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
Seminar 30Teaching Assistant
Vlatka Vukelić, dr. sc.

Grading

Participation in lectures and making two seminars related to the assigned topic. Evaluating the multiple relations and to participate in teaching, preparing seminar papers and secondary assessment of written and oral exam.

Study Programmes

- » Science Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Science Stream (Smjer) (*elective courses, 4th semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify new content and a new approach to the topic
2. Describe the importance of the creation of social classes: senatorial and knightly class, the colonial elite, the lower strata of society, way of life and the difference among the population on the basis of personal and civic-legal status and ethnicity
3. Describe the issue of slavery, the population in urban areas and out urban area, economic activities (agriculture and animal husbandry, crafts and trade, rustic and banking, etc.) through the prism of participants and beneficiaries, the traditional economy and Roman innovations occupations (traditional influence in the performance of certain duties: comparison peregrine immigrant population)
4. Explain the customs, arts and culture and the Roman provincial population - opportunities and their interdependencies between study
5. Compare the time of the conquest, colonization and Romanization as a political and cultural processes and the organization of the Roman state administration

General Competencies

After finishing the programme student will be able to: 1. define historical processes typical for certain historical period; 2. explain cause and effect relations of historical events and processes 3. construct a historical context 4. compare historical processes of different periods

Week by Week Schedule

1. Introductory lecture, introduction to the subject and literature
2. Historical sources (material and written); totality of life in Rome early Principate
3. Explanation of terms: colonies and municipiums-importance in the Roman province
4. Roman administration and Roman province in today's Croatia; Provincial Economy
5. Warfare, military, veterans, pacification and urbanization Illyria
6. The legal system, urban planning, Pax Romana, trade
7. Taxes, laws, piracy and robbery, roads
8. Jewelry and cosmetics, dance, house and furniture, leisure, clothing and hair
9. Architecture, basilica, baths, forum, colonial and city administration / regents, officers, quaestors, bequests
10. Slaves and column "friends night", family, food, streetscape
11. The management and treatment of the country, housing extra muros / rustic, Roman road
12. Monet, tools, games, education, education, transport Intra Muros
13. Indigenous people, the process of Romanization, philosophy, science, religion, calendar, arts, crafts

14. Province in Late Antiquity, the emergence and influence of Christianity on the territory of modern Croatia, during the fall of the Roman Empire on the territory of Illyria-specific characteristics and differences
15. Field work

The Media: A Critical Approach

96364

Lecturer in Charge

Doc. dr.sc.
Tomislav Janović

Course Description

To lay out the basic structure of all social scientific explanations to elucidate the connection between the individual and the collective explanation levels in the social sciences to introduce the key explanatory mechanisms of the social sciences and to reveal their structure, limits and heuristic value to help students to formulate and identify valid explanations of social phenomena and differentiate them from pseudo-explanations

Study Programmes

» Communication Sciences (Studij) (*specialist working group 1, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use technical terms and concepts from social sciences which are relevant to the understanding of human communication.
2. Identify the main characteristics of human social behavior that have allowed the development of interpersonal and mass communication.
3. Describe the role of communication in the collective decision-making and social changes, with particular regard to the process of formation of the so-called public opinion.
4. Apply the most important mechanisms of the formation of collective beliefs and the formation of public opinion.
5. Explain the role of the media in the political communication and social change.

General Competencies

To understand and extract the main points of graduate level philosophical or scientific texts to analyze and critically evaluate theories and arguments in oral and written form; to identify weaknesses of particular arguments and theoretical positions to apply theories, concepts and technical terms of philosophy and methodology of science to other philosophical fields and/or other disciplines of the humanities and the social sciences to recognize the common conceptual ground of all disciplines dealing with social phenomena and to appreciate the importance of foundational and methodological issues for these disciplines

ECTS Credits 5.0

Theories of European Integration

64855

Lecturer in Charge

Izv. prof. dr.sc.
Mladen Puškarić

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

Written exam, term exam,
seminar, presentation.

Course Description

The objective of the course is to provide students with basic knowledge in the field of European integration theories. Students will learn how theories indicate the process and effects of integration process, as well as evolution and development of the process. Students will be able to understand relationship between national and EU institutions.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl(5393): elective courses, 3rd semester (science stream), 3rd semester, 2nd year*)
- » Teaching Stream (Smjer) (*elective courses, 1st semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze different theories of European integration.
2. Identify the fundamental origin of different theories.
3. Apply knowledge in understanding of European integration process.
4. Explain the differences in theories.
5. Describe time and circumstances of development of different theories.
6. List chronologically development of theories
7. Relate particular theories to process of European integration.
8. Compare relations between particular theories.
9. Develop interest for studying process of European integration
10. Apply knowledge in oral and written presentation.

General Competencies

Combine the general knowledge of society and of social processes.

Outline the opposing viewpoints and alternative hypotheses in the various social issues.

Illustrate the key structural factors that are shaping the society.

Point out the importance of the concepts of culture, socialization, stratification, social structure and institutions in the explanations of the social phenomena.

Analyse personal and local social questions in the broader social context, especially in the context of social class, ethnicity, gender, religion, capitalism, individualisation, nationalism, and globalization.

Analyse the social change using classical and contemporary sociological approaches.

Evaluate published sociological research with suggestions of possible improvements.

Week by Week Schedule

1. Meaning of Integrations Theories
2. Meaning and characteristics of integration
3. Economic Integration
4. Federalism and European Integration
5. Altiero Spinelli
6. Functionalism
7. David Mitrany
8. Neofunctionalism
9. Jean Monnet
10. Neofunctionalism
11. Hoffman

Theory of History

61951

Lecturer in Charge

Prof. dr.sc.
Miroslav Bertoša

Course Description

The aim of the course is to familiarize students with the basic data and theoretical viewpoints on historical science. Acquaint them with recent theoretical frameworks and their application to concrete historical research. Enable students to explore and interpret works of historiography.

Study Programmes

» History (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic problems of the theory of history,
2. Identify the most important information and people from the theory of history,
3. Explain the causal theoretical point of view and historical periods,
4. Analyze various theoretical and historical themes
5. Describe the basic theoretical directions.

General Competencies

After finishing the programme student will be able to:

1. identify the most important person and institutions in the Croatian and the World history,
2. write an essay on different historical period,
3. defend his/her own opinion in discussions on different historical events and processes,
4. design his/her own conclusion on different historical events and processes,
5. reconstruct historiographic tools in making conclusions of historical processes and events,
6. Appraise the value of historiographic interpretations.

Week by Week Schedule

1. Introduction to the theory of history and different starting points in the theoretical study of history
2. The theoretical framework of ancient historiography and its presence in modern historiography

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours
Lectures 30

Grading

The activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. Written exam, with the possibility for oral.

3. The theoretical framework of medieval historiography and its presence in modern historiography
4. The theoretical framework of the historiography of humanism and the Renaissance and its presence in modern historiography
5. Age of the Enlightenment and the new organization of knowledge and science, historiography in place a new system of knowledge
6. Pragmatic, apragmatic and objective historiography
7. Historical facts
8. The sign and the history of semiotics and its impact on historical science
9. History and science issues in the history of science
10. Historical science and morality
11. Poststructuralist historiography and its relevance
12. The theory of narrative and historical science
13. The cultural turn in historiography
14. Historical science and logic
15. Social conditioning of historical knowledge

Theory of Language

57150

Lecturers in Charge

Prof. dr.sc.
Branka Tafra

V. pred. dr.sc.
Lucia Miškulin
Saletović

Course Description

The course is aimed at acquiring knowledge on the language as a system and as a social phenomenon. Secondly, it is aimed at providing insight into the history and development of linguistics. Finally, it is aimed at equipping students with metalanguage and knowledge needed for understanding and critical reviewing of linguistic issues and topics.

Study Programmes

» Teaching Stream (Smjer) (*kro-dipl (4423): elective courses I, 1st semester (teaching stream), 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe a short overview of the development of linguistics.
2. Describe genetic and typological classification of languages.
3. Distinguish between synchrony and diachrony, as well as between syntagmatic and paradigmatic relations.
4. Explain the difference between phonetics and phonology and exemplify what a sound, a phoneme, an allophone, a letter and a grapheme are.
5. Describe types of morphemes, word classes and morphological categories.
6. Describe functions of words and syntactic categories.
7. Describe the main foci of semantics, onomastics, terminology and phraseology.
8. Categorize lexical units and relations.
9. Describe typology dictionaries and explain the differences between dictionaries and encyclopaedia.
10. Analyze the social aspects of language use and language as a means of action.

General Competencies

After successfully completing the course, students will be able to: - apply knowledge on the language as a system and as a social phenomenon in examining and teaching Croatian language and culture - critically review linguistic topics and issues

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours

Lectures 30

Grading

There are two partial tests in the semester. Students who pass both tests are exempted from the written part of the final exam and take only the oral part of the final exam. The oral exam also includes a critical review of a professional or research paper on linguistics (students select one of the recommended papers).

Theory of Literature

57152

Lecturer in Charge

Doc. dr.sc.
Davor Piskač

Course Description

The aim of the course is to enable students to understand the nature of literary texts.

Study Programmes

» Teaching Stream (Smjer) (*kro-dipl (4424): elective courses I, 2nd semester (science stream), 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe, identify and define the features of a particular literary genre.
2. Relate the knowledge and explain functional styles.
3. Analyze and distinguish individual styles, and compare them with other literary styles.
4. Describe and pose a hypothesis about the nature of style in literature and formulate, compose and write the synthesis of their own insights.
5. Distinguish, evaluate and assess the learners and support the decision in this regard with arguments.

General Competencies

The theory of literature is a part of the science of literature and has importance within the teaching of literature in primary and secondary schools. It provides important information, procedures and methods for the understanding of the nature of literary texts and the influence that a text might have on an individual and the society. After completing the course "Theory of literature", the students will be able to: observe the differences in terms of content, meaning and aesthetics in the field of literature. They will be able to evaluate and select appropriate texts for teaching in primary and secondary schools. This will contribute to the development of their cognitive skills and aesthetic sensitivity. As a result, the students will be able to better and more fully understand literature across a diachronic and synchronic overview.

from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good understanding of the topic 2 points 3. Good knowledge of the context surrounding the topic 1 point 4. Good use of professional language and expression 1 point 5. Systematically supported facts and meaning 2 points 6. Originality of ideas and their presentation and support 2 points. Essays are graded in the following manner: 6 points - sufficient (2), 7 and 8 points - good (3), 9 points - very good (4), 10 points - excellent (5).

Theory of Psychological Testing

57115

Lecturer in Charge

Doc. dr.sc.
Maša Tonković
Grabovac

Course Description

Provide knowledge in the field of psychometrics, which will enable students to understand the methodological characteristics of psychological tests.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the meaning of psychometric characteristics of the tests and the relationships between them
2. Identify limitations in making decisions based on psychological test which are due to its psychometric properties
3. Apply all steps in the validation of psychological instrument independently
4. Analyze the psychometric properties of psychological tests
5. Identify good and bad psychological measuring instruments
6. Interpret individual scores on tests
7. Evaluate the validation study of psychological test
8. Create a research design for validation of psychological tests

General Competencies

Upon completion of the course, students will be able to:

Analyze scientific literature in psychology and related disciplines, and produce new scientific knowledge.

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Week by Week Schedule

1. Test - definition and importance
2. Composite tests and basic properties of overall test score
3. Item analysis
4. Classical and modern reliability theory, the concept of measurement error

Exercises 15

Grading

Students work is continuously evaluated and students are awarded points for active participation in class, preparing seminars and passing midterm tests. On the basis of their engagement through the year, a student is assigned a grade which is then moderated with his/her success on the final oral exam.

5. Methods for estimating reliability: different procedures and their interpretation
6. Reliability heterogeneous tests; correction for attenuation
7. Item response theory
8. Test validity – different approaches
9. Structural validity: factor validity and MTMM technique
10. Prognostic validity and selection problem
11. Standardization, scoring and norming of the measuring instrument
12. Interpretation of test results
13. Understanding individual differences in test scores
14. Analysis of the psychological profile
15. Test

The Violence of Children and Minors

57205

Lecturer in Charge

Izv. prof. dr.sc.
Irena Cajner
Mraović

Course Description

Enable students for sociological approach to juvenile violence which includes application of classic and modern sociological theories as well as quantitative and qualitative social research methods. Students should be able to identify and understand critical approach to social reaction in cases of juvenile violence, by which they will be able to participate in creating public policies for prevention of juvenile violence.

Study Programmes

- » Science Stream (Smjer) (*soc-dipl (4421): elective courses, 2nd semester (science stream), 2nd semester, 1st year*)
- » Teaching Stream (Smjer) (*elective courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze manifestations of juvenile violence
2. Analyze special features of juvenile violence.
3. Relate social context and juvenile violence.
4. Create research focused on risk factors in juvenile violence.
5. Design juvenile violence prevention programs.
6. Reconstruct different models of social reaction to juvenile violence.

General Competencies

Identify causal relations among social phenomena.
Indicate relevant concepts of culture, socialization, social stratification, social structure and institutions in explaining social phenomena.
Develop research question about subject/process/phenomenon of public interest.
Evaluate sociological research as a basis for improvement.

Grading

1. colloquium 25%; 2. colloquium 25%; Written seminar 25%; Active participation in seminars 25%.

Forms of Teaching

- » Predavanja
 - » Processing of teaching material
- » Seminar
 - » Students read in advance the default text and continue the process of learning in the class on the basis of discussion about this and other group activities.

Week by Week Schedule

1. Introduction, reminder of the input competence.
2. Juvenile violent assaults.
3. Juvenile sexual violence.
4. Juvenile violence against property.
5. Juvenile violence against public order.
6. Social responses to juvenile criminal violence.
7. The first colloquium: Juvenile criminal violence.
8. Some key aspects in studying and understanding school bullying. Comparative research on school bullying..
9. The assessment of school bullying: scales and surveys, methodological problems and their solving options.
10. A social-ecological model for school bullying prevention and intervention: understanding the impact of adults in the social ecology of youngsters. Parent-child relationships and school bullying.
11. The etiological case to the role of the bystander in school bullying. Respect or fear: The relationship between power and school bullying.
12. Victimization by school bullying and social exclusion: links to peer rejection, classroom engagement and school achievement.
13. Peer bullying in sport. Cyberbullying. peer bullying in kindergarten.
14. Second colloquium: School bullying and juvenile violence in other social contexts.
15. Final remarks.

TV Journalism

57245

Lecturer in Charge

Izv. prof. dr.sc.
Nada Zgrabljic
Rotar

Course Description

Bring TV journalism closer to the students through practical exercises in which they will apply and improve journalistic skills which are used in television, while gathering and analyzing information and shooting, editing and publishing video clips in a variety of television genres.

Study Programmes

» Communication Sciences (Studij) (*media: specialist working group 2., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define TV journalism and explain its characteristics.
2. Present and explain the differences between television and other forms of journalism.
3. Professionally use the skills of a television journalist.
4. List, differentiate and use the most important television genres.
5. Demonstrate the skill to independently collect, verify and format information.
6. Demonstrate the skill to independently record and edit short TV clips.
7. Demonstrate the ability to independently publish YouTube video clips.

General Competencies

Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist theoretical and practical knowledge to work in journalism. Identify, classify, use and critically evaluate various media and newspaper genres, their role in media content and impact on the audience. Demonstrate accountability, professional ethics, autonomy and initiative in their work.

Week by Week Schedule

1. Course introduction;
2. Television journalism - characteristics, specificities, importance;
3. Exercises in searching, collecting, verifying and processing information;
4. Exercises in searching, collecting, verifying and processing information;

Word Formation in the Croatian Language

61938

Lecturer in Charge

Izv. prof. dr.sc.
Sanja Vulić
Vranković

Course Description

The aim of the course is to enable the acquisition of theoretical and analytical framework, in order to clearly realize the difference between word formation and other linguistic disciplines and parts of grammar.

Study Programmes

» Teaching Stream (Smjer) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate between motivated and unmotivated words
2. Analysis and the ability of establishing word formation patterns.
3. Analysis and the ability of defining units in word formation.
4. Analysis and the ability of morphological description of the basic constituents.
5. Analysis and the ability of establishing word formation patterns.

General Competencies

Independent word formation analysis of all types of motivated words in the Croatian language.

Week by Week Schedule

1. The relation between word formation and other linguistic disciplines and parts of grammar.
2. Linguistic terms relating to word formation
3. The relation between formative and lexical meaning of a word
4. Basic divisions in word formation in Croatian
5. Marginal word formation methods
6. Pure noun-forming suffixes
7. Pure noun-forming suffixes
8. Complex noun formation (methods)
9. Pure complex noun formation
10. Pure adjective-forming suffixes
11. Pure adjective-forming prefixes and adjective-forming prefixes and suffixes

Working with Groups

53842

Lecturer in Charge

Doc. dr.sc.
Eva Anđela Delale

Course Description

To develop general and specific competences related to mastering basic knowledge and skills of group work; planning, assessment and group treatment outcomes evaluation skills. To understand, assess and familiarize the processes and dynamics of group work and develop sensibility and personal capacities to direct group processes. To participate in different specific groups and develop group leading skills.

Study Programmes

» Psychology (Studij) (*specific and professional skills, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and distinguish the nature of group work and group processes.
2. Arrange and apply theoretical and scientific knowledge in planning and application of group interventions.
3. Evaluate their own individual competence in conducting work with groups.
4. Assess the importance of specific communication skills, leadership styles and co-working for the successful conduct of group work.
5. Appraise the importance of reviving personal experiences and proper cognitive, emotional and physical processes in work with others.
6. Assemble ethical principles of group work and accept differences in planning, observation and participation in group activities.

ECTS Credits 3.0

English Level Lo

E-learning Level L1

Study Hours
Exercises 30

Grading

Obligations during the course:
Regularly class attendance: up to 60 points. Final practical work in planning group work: up to 20 points. Written exam: up to 10 points. Demonstration of group work skills: up to 10 points. The final course grade is determined by the following points collection arrangement:
Excellent: 91-100 points Very good: 81-90 points Good: 75-80 points Sufficient: 70-74 points Non-sufficient: 69 points and less

General Competencies

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Screening of student's work

Grading

Final exam

Course Description

The aim of the course is to familiarize the students with the most important aspects of working with children with special educational needs. The students will get to know the formal, normative framework which regulates the position of students with special educational needs in the Croatian educational system, developmental characteristics of disabilities according to the Diagnostic and Statistical Manual of Mental Disorders (terminology, definitions, etiology, phenomenology) and the organization of school and kindergarten work with special reference to the work of professional services.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective (teaching module), 1st semester, 1st year*)
- » Psychology (Studij) (*elective (teaching module), 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Properly explain the basic concepts of the subject teaching methodology,
2. Apply and adopt terminology that refers to children with special educational needs,
3. Identify hearing and speech-language disorders,
4. Evaluate contemporary insights and achievements in working with pupils with special educational needs in accordance with the European and global achievements,
5. Adapt educational goals to the capabilities of hearing impaired children and children with speech-language disorders,
6. Point out the necessity of sensitizing the educational and wider community to the processes of inclusion.

General Competencies

Students will be able to:

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Develop accountability, autonomy and initiative in one's work.

Week by Week Schedule

1. Introduction to the field of rehabilitation and education of children with special needs / history of educational integration
2. Overview of diagnostic and therapeutic procedures in rehabilitation and education of children with special needs
3. Children with cognitive disabilities
4. Specificities of rehabilitation of children with sensory impairments
5. Specificities of rehabilitation of children with speech-language impairments
6. Children with difficulties in communication
7. Specific learning difficulties
8. Psychodiagnostic assessment of children with developmental disabilities
9. Emotional, social and behavioral problems of children with developmental disabilities
10. Working with parents of children with developmental disabilities
11. The attitudes of parents and primary school teachers toward integrated pupils with disabilities
12. The role of compensatory activities in working with children with disabilities
13. The value of playing in the education of children with disabilities
14. Course overview and analysis
15. Final knowledge assessment
